Sudden Death At Summerside

(Special to The Guardian)
SUMMERSIDE, Feb. 4.—The almost sudden death took place under particularly sad circumstances to-night in the Prince County Hospital of Capt. Louis Razavet of Summerside at the early age of forty-one years. On Wednesday last whilst working in Mr. B. Graham Roger's fox ranch of which he was the caretaker, he got a slight scratch on the leg from the point of a nail in anything serious however, but on Monday he had a high temperature and a doctor, who was called in, found that he was suffering from blood poisoning and took him to the Prince County Hospital. Everything possible was done for him, but without avail and he passed away at seven o'clock Tuesday night.

Capt. Razavet was a native of France and left his native country when a youth and took to the sea for several years. He came to Summerside occasionally on large sailing vessels and later was in command of the old schooner Malabar, owned by the late Captain Joseph Read, of Summerside. About sixteen years ago he married Miss Gallant, daughter of Mr. and Mrs. Charles Gallant, of Egmont Bay and took up his residence at Summerside six years ago.

He took charge of Mr. B. Rogers' extensive fox ranch and last summer accompanied a valuable consignment of silver foxes to Russia, returning home in the early part of the winter. He was an expert fox rancher and a most honorable citizen in whom much confidence was reposed.

He leaves to mourn a widow and three children ranging in age from two to thirteen years, to whom The Guardian extends sincere sympathy. The funeral will be held on Thursday morning at nine o'clock at St. Paul's Church, Rev. Urban Gillis officiating.—S.

YOUTHFUL TRAVELLERS REACH CANADA

(Canadian Press)
HALIFAX, N. S., Feb. 4.—Among the four hundred passengers who landed at Halifax from the trans-Atlantic liners arriving here from English and continental ports were three little boys all travelling alone to join their parents who have made homes for themselves in Canada.

Master Robert G. Watkin, aged 8, disembarked on the Cunard liner Antonia. He boarded the ship at Liverpool and is on his way to Sandwich, Ontario. His people live at 511 Brock Street in that town. Robert is a bright little lad and the passengers made much of him on the trip over. Some kind friend to make sure that Robert would not forget where he was bound sewed a card on his coat giving his name and destination. He left on the Maritime Express in care of Canadian National Railways officials.

Two bright young voyagers arrived on the Cunard liner Auranita, they were Ronald Batschler, aged 8, who is going to join his father and mother at 137 Bloor St., Toronto, and Camara Cividin, aged 12, who is on his way from sunny Italy to join his father at Michal, British Columbia. The young Italian does not know a word of English, but he was welcomed to Canada by Canadian National interpreters, one of whom accompanied him on the special Canadian National boat train which left Halifax at eight o'clock for the west.

IRISHTOWN SCHOOL

The half-yearly examination of Irishtown School was held, and proved a very encouraging event. A large number of parents and friends were present, evincing the keen interest taken in education in this district.

The schoolroom was tastefully decorated for the occasion by the teacher and pupils. The examination was conducted by the teacher, Mr. J. W. Murphy, assisted by Inspector Murphy. The pupils of all grades, by their ready answers to the different questions, gave evidence of careful training.

The following interesting programme was effectively carried out:—
 Welcome Song, by Josie Ready.
 Chorus—"Jingle Bells"—The School.
 Recitation by Gladys Profit.
 Recitation by Anna Warren.
 Dialogue—"Zachary's Hired Man"—Johnnie McLeod, Glenn Campbell, Alma Campbell, Norris Campbell, Harold McLeod, Borden Campbell.
 Recitation by Marion Ready.
 Instrumental Music by Theodore Bernard.
 Recitation by Henry Ready.
 Solo by Lillian Ready.
 Recitation by Harold McLeod.
 Motion Song by Glenn Campbell, Norma Davison, Alma Campbell and Ruby Cousins.
 Recitation by Janie Mann.
 Dialogue—"Getting Down to Business"—Evelyn McLeod, Jean Campbell and Borden Campbell.
 Monologue by Glenn Campbell.
 Drill—"Christmas Dolls".
 Recitation by Marjorie Warren.

Eastern Guardian

POTATO BAGS, New P. E. Island Brand and Plain. R. T. Holman Ltd.
 1487-1-4-31.

Dialogue—"Country or City"—Mildred McLeod, Ruby Cousins and Norma Davison.
 Recitation by Johnnie McLeod.
 Chorus—"Look at Our Beautiful Christmas Tree"—The School.
 A very complimentary address, accompanied by a beautiful present was presented to the teacher. The address was nicely read by Miss Glenn Campbell, and the presentation was made by Miss Alma Campbell. Mr. Murphy replied in very fitting terms, thanking them all for their kind remembrance. Speeches were delivered by the chairman, Mr. Heath McLeod, and Inspector Murphy, congratulating both teacher and pupils on their successful work. At the close of the examination, the pupils were generously treated to candy and fruit by their teacher. The meeting was brought to a close by singing the National Anthem.

 this reason the market for new butter had arisen.

"The facts of the case as far as the Maritime Provinces are concerned," said Mr. McLennan, "are just the opposite. The shortage of Maritime made butter is due largely to the fact that New Zealand butter has been coming in for the past two winters lowering the price of butter during winter months and thus discouraging the farmer in making plans for increased winter production."

"I am convinced," he added, "that winter production, not only in the Maritime Provinces but elsewhere, will continue to decrease until our dairymen are given adequate protection as against the New Zealand butter maker."

CANADA WILL

 tines until the end of October. A. T. Seaman assistant Canadian Exhibition Commissioner in London has opened an office in Toronto to unify the Governments activities and those of the Canadian Manufacturers Association. In preparing for the event already construction has begun on a steel and concrete building at Antwerp under the personal direction of J. O. Turcotte, Canadian exhibition commissioner. The building will accommodate thirty exhibits. Mr. Turcotte who is an artist as well as an architect has designed a continuous transparent frieze 500 feet long for interior decoration. His frieze will portray Canadian industries from the Atlantic to the Pacific Coasts. The International Exhibition is part of the celebration of the centenary of Belgium's independence.

WHEAT, STRAW AND MOLASSES FED TO HORSES STARVING ON PRAIRIE

REGINA, Feb. 4.—A mixture of wheat, straw and molasses is being fed to Saskatchewan farm horses in an effort to prevent hundreds of the animals from starving to death. Official reports in Regina place the number of dead horses from starvation at "a few hundred," and said that the only district which had seen serious hardship was that south-west of Regina. At the same time reports from such widely scattered areas as those surrounding Victoria, Cupar, Estevan, Lethbridge, McCord, Glenora and Ravenscrag report unusual numbers of horses have starved to death, and for the first time in many years farm animals have been shot because of the lack of feed. Deep snows and a protracted period of severe cold followed drought and crop failures of 1929. Because of the snow horses are unable to reach winter feed, and thousands of the animals are in an emaciated condition.

COMMITTEE SUGGESTS

Continued from page 1
 In answer to a number of queries Mr. E. E. Mutch stated that the new proposition is due not from the one proposed two weeks ago. Three cars valued at \$2500 have not been taken into consideration. A large amount of equipment will be purchased. Mr. Georges expressed in answer to a question of Mr. W. F. Tidmarsh that the machinery in the Halifax plant cost \$30,000 a year and a half ago. The latter pointed out a considerable depreciation in value since that time.

Mr. T. M. White did not think that the equipment had depreciated in value to any great extent. Jacket kettles have not been changed in the last twenty five years. New inventions sometimes scrap the machinery which it supplants. The machinery should have a fairly long life. Mr. Georges is anxious to have everything investigated and it might be well for some person to inspect the plant.

Mr. Georges stated that scrapping seldom takes place as the improvements are usually in a machine itself. Several comparatively new whipping machines can do a great many kinds of work.

Mr. White thought that a great deal of machinery would be needed if the organization were to make dipped chocolates.

Mr. George stated that \$1200 worth of candy manufactured by the company was sold in Charlottetown during the last two weeks. The turnover would be about \$15,000 a month or about \$200,000 per year. He stated as his reasons for removing from Halifax that his competition would have to be faced and it was hoped that more working capital would be available. Nova Scotia is at present the largest territory, and Simpson's and Eaton's are good customers.

Mr. A. W. Hyndman stated that information shows that the company has been handicapped through lack of working capital. If Mr. Georges were given a chance he doubtless would make good.

Mr. S. A. McDonald corroborated this statement adding that the committee thought it better for the business to start with a clean sheet in Charlottetown than to continue as heretofore. Assurance of success would be necessary. The company should be able to function successfully with sufficient capital and an aggressive sales organization. There is a daily demand for the company's product and men who are qualified pronounce it excellent.

Mr. A. W. Hyndman explained that the capital would be divided with \$10,000 for the plant and \$15,000 for running expenses.

Mr. Geo. Tweedy pointed out that the organization is not a new one, but one which is already active.

Councillor Foster testified that he had bought 250 lbs. of the company's chocolates, a purchase which had proved an exceptionally good one. The machinery is practically new, and the proposition has been drawn up by competent men and therefore deserves support.

Councillor Prowse considered the five men of whom the committee was formed extremely competent. The business would give employment to a large number of people, and be an indirect benefit to all, facts which would warrant its support. A home market for the product would help the project materially.

Mr. A. W. Hyndman explained that the project is purely a business man's proposition. The financial end will be controlled by a board of Charlottetown directors while Mr. Georges will manage the manufacturing end.

Mayor Yeo stated that at a recent caucus meeting the city council expressed itself willing to grant five years exemption, and as the council will probably be little changed during the coming year the next council will be able to carry the thing through.

Mr. R. E. Mutch did not believe the proposition sound unless \$25,000 capital were procured. Rather than start the business under a handicap it would be better not to start at all. The capital would be divided thus: cost of building \$9,000, renovations \$3,000, running expenses \$14,000. The bond holders have the best of security as Mr. Georges stands to lose all if the project should fail.

Mr. A. E. Dewar questioned the wisdom of entering the project without careful consideration. Considerable discussion followed and with the result that Mr. Georges left the room.

Mr. S. A. McLeod thought that provisional directors should be appointed.

Mr. S. A. McDonald pointed out that if Mr. Georges' colleagues agree, the resources of the company will be in the hands of the local directors. Mr. Georges has agreed to the proposition with the proviso that his colleagues concur.

Mayor Yeo intimated that he would be willing to act on the executive.

SIR ROBERT FALCONER SPEAKS ON CANADA

SAULT STE. MARIE, Ont., Feb. 4.—Breathily a fervent Canadianism and expressing a glorious optimism in the future of this country, Sir Robert Falconer, K.C.M.G., LL.D., D.D., D.C.L., President of the University of Toronto, brought a message of inspiration to the 225 guests at the banquet held in his honor at the Y. M. C. A.

In the afternoon Sir Robert had formally opened the new and commodious extensions to the collegiate institute and technical school. His message was brief and to the point; his message one of faith and hope. It was in response to a toast to the University of Toronto and its President that Sir Robert spoke.

"Institutions make the country what it is. These towns and cities throbbing with life are all tokens of individuality, for if you trace the history of this prosperity to its source you will find it in the vision and power of some one man who glimpsed the opportunity," he said.

"Canada is blessed with an energetic people. That is one reason I am glad I have cast my lot in the land I love."

In conclusion Sir Robert spoke of the need of expert guidance for the people of Canada and said it could come only through trained men. He also spoke of the growing tide of immigration, and said that the immigrants would also need the service of educated men, as doctors, lawyers, ministers, and in other fields of service.

WHEAT, STRAW AND MOLASSES FED TO HORSES STARVING ON PRAIRIE

REGINA, Feb. 4.—A mixture of wheat, straw and molasses is being fed to Saskatchewan farm horses in an effort to prevent hundreds of the animals from starving to death. Official reports in Regina place the number of dead horses from starvation at "a few hundred," and said that the only district which had seen serious hardship was that south-west of Regina. Mr. S. A. McDonald pointed out that if Mr. Georges' colleagues agree, the resources of the company will be in the hands of the local directors. Mr. Georges has agreed to the proposition with the proviso that his colleagues concur.

"I Was Skinny and Tired. Now Peppy. Gained 11 Lbs."

"Had tired feeling, no pep. But Ironized Yeast gave me pep; much stronger. Gained 11 lbs. Got new rosy, healthy complexion."—Mack Lattoria. "Amazing new Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Changes 'skinny' weak body to strong, well-developed form all admire. Muddy skin gets healthy color like magic. Nervousness, indigestion, constipation disappear overnight. Sound sleep. New pep from very first day. Two great tonics in one—special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in 1/2 time. No yeasty taste. No gas."—Don't be "skinny" weak, unattractive. Get Ironized Yeast from drug-gist today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

LATEST DOINGS

Continued from page 1
 compromise with a "quite hopeful attitude" and was said to have considered the compromise an excellent basis for negotiations on transferring of tonnage. There still remained however, some obstacles to the French plan which were not removed by the supplemental British suggestions and it was expected the "Big Five" would be called upon to make a final decision. The first committee did not decide when it would reconvene. An official communique said there was a general agreement that the conversations between delegations which have been fruitful in preparing the way for agreements must continue. The British spokesmen said the two meetings today had developed "quite a hopeful attitude." He said reservations were being made by some of the delegations but they were only formal reservations. The discussions were very frank in elucidating certain points and showed that the difficulties were not as great as they might appear. Great satisfaction was expressed by a spokesman for the French delegation that the British should have been the first to suggest concrete counter proposals to the French project for shifting tonnage from one class of warships to another. An early showdown on the cruiser problem which is one of the most difficult, before the conference, was looked for as the result of today's interchange of views. It is increasingly evident that the powers are more concerned with distribution of fighting strength in terms of gunpower than in the actual number of cruisers permitted each navy.

He moved that the entire investigation committee be appointed as the five provisional directors. The motion was seconded by Councillor Holman, and later amended to enable the board to fill vacancies in the event of the retirement of Mr. A. W. Hyndman, who explained that he could not act.

Mr. R. E. Mutch stated that the committee has been approached by a bond house to handle the selling of stock. Such an industry would seem to be one of the few which should prosper in this city. If merchants throughout the province would each buy one bond it would have a good effect.

Councillor Holman spoke in favour of the project. It would bring several new families to the city and employ 50 or 60 people. The business is a growing concern with a good reputation. Transportation facilities are good, and after proper investigation the project should be pushed.

Mr. A. E. Dewar, as an old investor, wished to have the matter carefully investigated.

Mr. W. F. Tidmarsh expressed a similar opinion.

Mr. P. W. Turner personally thought the proposal a sound one though a little more light on the matter might be advisable. He approved of the motion for appointment of provisional directors.

Mr. R. E. Mutch reminded the meeting that the success of the proposition could not be foretold. The result depends on the ability of the company to turn out a good product. If capital is procured Mr. Georges will probably do good work.

Mr. S. A. McDonald pointed out that if Mr. Georges' colleagues agree, the resources of the company will be in the hands of the local directors. Mr. Georges has agreed to the proposition with the proviso that his colleagues concur.

Mayor Yeo intimated that he would be willing to act on the executive.

HEAVY HEN FRUIT

TORONTO, Feb. 4.—An egg weighing one-quarter of a pound and measuring six inches around is the unusual product of a ten-months old leghorn owned by Charles House, 1653 Keele St. Mr. House found in the bird's box the giant egg, which is twice the size of an ordinary hen's egg. That is the third egg of that same size laid by this same bird.
