This dangerous curve has been greatly straightened out, reducing the possibility of accidents. The contractors, Poole & Beer, have done an excellent job of grading the curve, and also of providing a longer view to oncoming vehicles. Although at present this new road is not paved, it is understood that it will be done in the near future.—Lan.

USES STALL-FEEDING
SYDNEY, Australia — (CP) — Stall-feeding of beef cattle is rare in Australia's temperate-to-tropical climate, but one farmer uses a system likely to be taken up by others. He gives four weeks concentrated grazing and finally stall-feeding with home-grown chaff, oats and meadow hay. He markets more than 100 prime Herfords each year.

RECLAIM 1,400 ACRES
LONDON — (CP) — Farmers and engineers here have combined efforts on a scheme to reclaim 1,400 acres of arable land from the sea on the coast of Britain.
