ROAR OF FRENCH GUNS SHAKES THE EARTH.

BERLIN, Sept. 28 (via London).—The Cologne Gazette publishes the following account by the German author, Dr. George Wagner, of the terrific bombardment which preceded the French attack in Champagne:—German General Headquarters, Western Front, Sept. 24: It is Friday morning. During the night we have been hearing the sound of distant gunfire, which in volume and duration exceeded anything experienced since we have been here. Yesterday evening the bombardment was exceptionally lively. Then it died down towards midnight, but about 4 o'clock this morning it started afresh with the unprecedented intensity typical of a big-scale bombardment, with shot following shot in one unbroken growth of thunder like the roll of drums. One hour—two hours—four hours—still there was no end to it. There was excitement in the town. The like of it had not been heard since the days when the first German advance passed like a storm over this section. Where is it? What does it mean? The thunder of distant guns can be better heard upon the hills than in the valley, so we went up to the top of the hill which rises inside the town. I have just returned. It is now 11 a. m., and the guns are still thundering the extraordinary roll of bombardment in the Argonne, which was the prelude to a French attack on the Marie Therese, still works. It has lasted from eight to eleven three hours, and the other bombardment has already been going on more than twice as long.

SHAKEN BY AIR WAVES.
The whole atmosphere is in a state of dull vibration. It seems as if one perceived the sound not only with the ear, but as if one had the physical sensation of being shaken by air waves. It is as if the sound came up from unknown depths of the earth. Indeed, more than anything it is like the uncanny underground growling of a distant volcano in eruption, shaking the earth's crust for miles around and making it tremble like a man in a fit of argue.

FRENCH SOLDIERS WILL GET 5 CENTS A DAY.
PARIS, Oct. 3.—The chambers of deputies, in a five minute session today, voted unanimously for increasing the pay of private soldiers from one cent to five cents per day. The chamber also voted \$14,000,000 to provide for the increase.

COAL STMR. EASINGTON BELIEVED LOST

ST. JOHN, Sept. 30.—Fears are entertained that the steamship Easington, Captain Stevenson, bound from Sydney to St. John was lost in the heavy southwest gale of Sunday last. While the agents of the Dominion Coal Company here, and the Captains of the tug boats in the harbor express their doubts as to the Easington's safety, they hold out a hope that the ship may yet arrive or be heard from, but about all that they pin their faith on is that Captain Stevenson of the Easington is a thorough navigator and in some manner may have been able to save his ship.
