

Clears The Head, Opens The Nostrils Stops Sneezing, Cures Catarrh

You Get Instant Relief by Inhaling The Soothing Vapor "Catarrh-ozone."

Catarrh is bound to come with this weather. Slight colds become more offensive and sickening every day. The inflammation extends further into the head. Soon the ears begin to buzz and ring. The head aches, the eyes pain dreadfully, the nose gets plugged up and this forces the patient to breathe through the mouth. Vile filthy secretions are forced back into the throat, requiring a great deal of coughing to keep the air passages free. Finally, this foul matter finds its way into the stomach, causing Dyspepsia and general ill-health. By this time the patient has SYSTEMATIC CATARRH, which saps strength, depletes the vital energies till consumption is the unhappy result.

There isn't the slightest use in trying to cure this condition with tablets, snuff or spray. Such treatments are wholly inadequate. You must employ Catarrh-ozone the only remedy that possesses power to kill the germs of Catarrh. The healing vapor of Catarrh-ozone is carried by the air you breathe to the most minute cells of the nose, throat, bronchial tubes and lungs. Its antiseptic medication goes everywhere that air can go. No case is too chronic, no person too old—everybody that has catarrh of any kind can be cured by this grand treatment which is endorsed by thousands of physicians throughout America, who say: "The only way to permanently get rid of Catarrh is to use Catarrh-ozone."

TWO MONTHS' TREATMENT GUARANTEED TO CURE. PRICE \$1.00, small size 50c; trial size 25c. Sold by all dealers everywhere.

INSURANCE

---and--- CREDIT

The National Association of Credit Men issue the following circular, which should be pondered and acted upon by business men:—

To you as a fair-minded business man, I desire to put two simple questions which in self-interest you cannot put off answering:

Is your property so insured that in case of its destruction by fire you could pay dollar for dollar to your creditors?

Again, in case of fire upon your premises, would your savings, perhaps of a life-time, be safeguarded by enough and sound insurance to keep them intact?

If you cannot give me an emphatic "yes" as your answer, then you are taking longer chances that anyone has a right to take.

With the hazard of fire always present, not to mention the hazard of conflagration, with property losses steadily mounting, does it speak well for the common sense and honour of the average retail merchant that a credit man for one of the largest hardware houses in the land can say that, "of the great number of property statements coming under his observation, not one in fifty shows that the trader is carrying sufficient insurance?"

It may be that you, like hundreds of other business men, consider yourself comparatively free from danger of fire loss, because, perchance, your town or city has thus far escaped a scorching; a fact that is more likely due to good fortune than to inherent advantages, for conditions similar to those all about you have contributed again and again to widespread and disastrous fires.

You owe it to yourself, your family and your creditors to surround your business with safeguards that will reduce to a minimum your chances of being embarrassed by a fire which may begin in your premises or perhaps in the premises of a fellow-townsmen several blocks away. This means not only insurance, but adequate insurance.

In most lines stocks are larger in certain periods of the year than others, so with changes in the value of your stock, do not overlook changing the amount of your insurance. It is just as important to take a chance with your insurance is not business, it is just as important to charge into the selling price of your goods the cost of insurance as rent or interest or taxes.

No one can afford to sell you on time or lend you money if you are not fully insured, for your ability to pay when the debt is due would be destroyed by fire and your creditors in that case would find that they had been your insurers without the compensation which a prudent insurance company would have charged for the service.

I am not writing as an insurance man, but as a business man. My only interest as far as insurance companies are concerned is that they be strong enough to meet their losses and that they sell insurance at a fair price. Insure, and do it now, otherwise your assets to-day may be cinders to-morrow.

The Western Guardian

—IT PAYS to buy in this Province

—THE MORNING DAILY Guardian can be obtained at Lafferty's Tonsorial Parlors, Summerside.

—TO CORRESPONDENTS.—Owing to the increasing heavy demands on space The Guardian cautions its correspondents to be as brief as possible in their contributions. Only Real News will be inserted.

—EXCELLENT SERMONS.—Rev. Frank Littlejohn, of Grace Methodist Church, Charlottetown, preached excellent sermons at both morning and evening services in the Summerside Methodist Church on Sunday last.—X.

—HOCKEY.—A friendly game of hockey was played in the rink here on the 4th inst. between the "Allies" and the "Victorias," resulting in a score of 4-0 in favor of the former team. Both teams appeared to be in good form, pretty evenly matched, the spectators consequently being afforded an opportunity of witnessing a fast and keenly contested game, in which "combination play" was much in evidence. Pooley got in some excellent work, his skill, speed and persistence in getting the puck past the Victoria's formidable goal "Billy," won for him the laurels of the game. A fine substantial luncheon was then served to both teams by the young ladies of Tryon in their usual inimitable style, to whom was tendered the hearty and unanimous vote of thanks of all present. The game was efficiently refereed by Mr. E. R. Reid.

—TRYON.—A very successful entertainment was given in Tryon hall on the 3rd inst., in aid of improvements to the "North Tryon Presbyterian Church" under the auspices of the "Ladies Aid Society" of the said church. From amongst the items which composed quite a long program, it would perhaps be difficult to specialize, but particular mention might be made of the dialogues, which were new and patriotic songs "When Jack Comes Back," sung by Mr. Bell, and the violin selections, with accompaniment, by Mr. Patterson. Special mention might be made of an abundance of home-made candy of excellent quality, provided by the ladies together with an elaborate display of fancy-goods, which were quickly disposed of at reasonable prices, the proceeds from all sources amounting to the substantial sum of over \$51.00.

—SCHOOL WORK.—Order of merit of pupils of St. Mary's Academy, Summerside, Junior Grades, Div. I.—Florence Gillis, Rita Buote, Leona Wedge, Nora DesRoches; Div. II.—Jean McKeary, Regina Arsenault, Div. III.—Marion McLellan, Elizabeth McNeill, Patricia McLellan, Div. IV.—Douglas McNeill, Chester Gerrier, Ernest LeClaire, Leonard Gerrier, Roy Durant, Intermediate, Grade III.—J. Faustine McCullough; 2. Elaine Blizard; 3. Pauline Noonan; Grade IV.—Div. I.—Maud McLeod; 2. Helen Wedge; 3. Lillian Peters; Div. II.—Celina Perry; 2. Helen Doucette; Flossie Gallant, Grade V.—L. Ada Sullivan; 2. Mildred McCullough and Jacqueline Arsenault, equal; 3. Esther Wedge and 1. Christina McNeill and Alberta McLellan, equal; 2. Della Arsenault; 3. Lillian Clark and Lucy Gillis; 2. Ber-nice Gallant.—H.

SCIENCE MADE EASY.

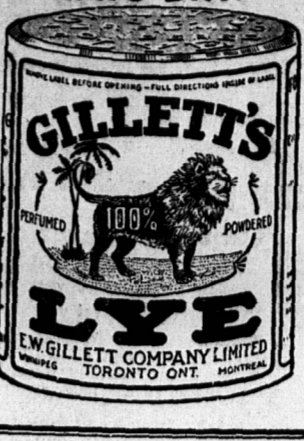

Why does a piano sneeze? Why does a whip crack? Why does bits of fur come off the end of the whip when you crack it? Why does a cricket-bat sting? Why does a cricket-bat sting? Why does a cricket-bat sting? But one might ask dozens of such questions, dealing with little problems of everyday life, which would puzzle not a few people.

Boys and girls, however, who have been listening to Prof. C. V. Boys' juvenile lectures at the Royal Insti-

CASTORIA

For Infants and Children.

GILLETT'S LYE EATS DIRT

tution will have no difficulty in explaining these scientific mysteries. They will tell you, instance on the authority of Prof. Boys himself, that if, after passing the right pedal on a piano, you sing to it, it will sing back to you, and if you sneeze, simply because of the sympathetic vibration which exists between yourself and the wires.

Again, a whip cracks for the same reason that a bullet sings or a shell whistles or whines. It is a matter of speed or velocity. When a thing moves rapidly through the air, it reaches the velocity of sound, in other words, makes a noise by pushing the air aside. The speed at which a whip travels through the air when lashed is greater and greater throughout its entire length, and so great at the end that it comes to the velocity of sound. And this also explains why the fluff at the end of the whip is torn off by the friction of the air, and why the end of a wet towel or handkerchief hurts you so much when someone flicks you with it.

TRY THIS.

It is a popular belief that safety matches will not strike except on the box; but they will strike on anything that is very smooth, and Prof. Boys, at one of his lectures, proved this by striking a safety match on a piece of glass. He had also got them to ignite by striking on an oak gate covered with hoar-frost. The simple explanation is that if the match is rubbed on a smooth surface the friction is sufficient to make it hot, and it gets hotter and hotter till it ignites. In the case of safety matches, however, the surface on which they are struck must be perfectly smooth, otherwise the roughness will rub off the substance on the tip.

When a cricket-bat is hit too near the end of the bat, the hand is stung because the impact coming at that particular point drives the bat up. Here is a simple little trick which one can perform with an egg and yet perhaps not know how it is accomplished. Spin an uncooked egg on a plate, and then place the hand upon it, stopping the motion momentarily. Immediately the hand is removed the egg will resume its spinning motion, on account of the fluid contents of the

shell, which first act as a brake, and afterwards continue their gyrations when the shell is stopped.

KITCHEN WRINKLES.

The kitchen provides many simple lessons in science. A loaf baked with only flour, water and salt will be so heavy that it can hardly be cut, but the addition of yeast produces the loaf as we know it. This is explained by the fact that when yeast is employed carbolic acid gas is produced, which give rise to the sponginess essential in the structure of good bread. And the fact that the action of the yeast also produces alcohol has led Prof. Boys to tell the story of how a baker, learning this fact, condensed the vapors from his oven until he had obtained a small bottle of spirit, which he triumphantly exhibited in his shop window. A neighboring rival deemed it necessary to devise a counterblast, and put up a notice stating that his bread was sold "with all the gin in it."

British methods of cooking vegetables are pronounced by Prof. Boys as "wicked." He points out that the cook, in this country shops her beans into small pieces, so that all the flavor and salts run out, leaving only the miserable, tasteless fibre. On the other hand, with beet, she takes care not to break the skin, so that the color should not be lost. Similarly other vegetables should be kept whole as they are in France, and not treated by methods which, as Prof. Boys puts it, result in all that is volatile going up the chimney and all that is soluble going down the drains.

Finding Relief She Tells Others

MRS. W. J. MALONEY TOOK DODD'S PILLS FOR BACKACHE. She Had Tried Numerous Other Medicines, But Found No Relief. Used the Great Canadian Kidney Remedy, Dodd's Kidney Pills.

BARACHOIS, WEST, Gaspé Co., Que., March 8.—(Special)—Mrs. W. J. Maloney, a well known resident of this place, is recommending Dodd's Kidney Pills to those who suffer from Maloney troubles. In an interview Mrs. Maloney says: "After suffering for many years with backache, and trying many remedies without obtaining relief, I read about Dodd's Kidney Pills and decided to try them."

"After using two boxes I was greatly benefited, and recommend them to other sufferers. I also used them for my little girl for kidney troubles."

Mrs. Maloney got relief from her backache because Dodd's Kidney Pills cured her kidney trouble, and that was the cause of her backache. Dodd's Kidney Pills cure diseased kidneys. Cured kidneys do their work and blood that the impurities out of the blood. That's why Dodd's Kidney Pills cure so many diseases that are caused by impure blood.

Don't Merely "Stop" a Cough
Stop the Thing that Causes It and the Cough will Stop Itself

A cough is really one of our best friends. It warns us that there is inflammation or obstruction in a dangerous place. Therefore, when you get a bad cough don't proceed to dose yourself with a lot of drugs that merely "stop" the cough temporarily by deadening the inflamed membranes. There is a home-made remedy that gets right at the cause and will make an obstinate cough vanish more quickly than you ever thought possible.

Put 2½ ounces of Pinex (50 cents worth) in a 16-ounce bottle and fill the bottle with plain granulated sugar syrup. This gives you 16 ounces of the most pleasant and effective remedy you ever used, at a cost of only 54 cents. No bother to prepare. Full directions with Pinex.

It heals the inflamed membranes so gently and promptly that you wonder how it does it. Also loosens a dry, hoarse or tight cough, and stops the formation of phlegm in the throat and bronchial tubes, thus ending the persistent lough cough. Pinex is a highly concentrated compound of Norway pine extract, rich in quinine, and is famous the world over for its healing effect on the membranes.

To avoid disappointment, ask your druggist for "2½ ounces of Pinex," and don't accept anything else. A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Toronto, Ont.
