The Store of Better Men's Wear

### Crop Report

Below will be found a brief synopsis of telegraphic reports received at the Head Office of the Bank of Montreal from its Branches. The Branch Managers have complete and intimate knowledge of each local situation and are in close touch with crop conditions in all sections of the districts mentioned. The map indicates the approximate extent of the districts referred to in the report.

#### General

Due to lack of moisture crop conditions throughout the Prairie Provinces are below normal, with growth unsatisfactory and pasturage becoming critical. With the exception of fodder crops and some coarse grains, seeding has been completed. Considerable damage has resulted from soil drifting, particularly in Saskatchewan and Southern Alberta. East of the Great Lakes conditions generally are highly favorable, with the season ten days ahead of average in Ontario and well ahead of average further east. In Quebec weather conditions have been favourable and crops are making excellent progress. In Ontario crops generally are in highly promising condition. In the Maritime Provinces cool weather has adversely affected growth in some districts but generally conditions are satisfactory. In British Columbia crops are progressing satisfactorily, although lack of moisture is causing some concern in the dry belt section. Details follow:—

#### Prairie Provinces

Alberta Northeastern Area—Wheat is five inches above ground. Moisture conditions are fair. Alberta Southern Area—Wheat is four inches up and benefitted from rain, but further moisture will be needed shortly. Alberta Western Area—In the southern section high winds and hot weather have damaged crops, which are poor to fair. Pasturage is poor. Rains are needed. Crops in the northern section are fair and conditions more favourable than in south. Sugar beet crop is later than last year, but a good stand is reported. Saskatchewan Northern Area—Spring wheat seeding was completed earlier than usual, but growth has been slow. It is estimated that 20% of summer-fallow crops have been damaged by soil drifting. Undamaged crops average in height three to five inches. Saskatchewan Southern Area—Damage by soil drifting and lack of rain serious in many sections. Rains shortly would save a portion but damage from drought is serious. Lack of water and pasturage is becoming critical for livestock. Manitoba—Seeding has been completed, with exception of a small amount of coarse grains and fodder crops. A general rainfall is required. Wheat growth is fair particularly on summer-fallow; height three to six inches. Coarse grains are patchy and uneven due to lack of moisture. Pasturage is drying up and the hay crop is poor. Conditions are below normal but rains during the next few days would alleviate the situation.

#### Province of Québec

Seeding of grains generally is completed, and the growth has so far been very satisfactory. Early planted potatoes and other roots are making rapid progress. Indications point to a large hay crop. Pastures are in excellent condition. Fruit crops are promising.

#### Province of Ontario

Fall wheat shows exceptional promise, except in a few areas where it has suffered from winter killing. Oats and barley are above average; the hay crop promises to be heavy; grass pasture is in excellent condition. Field planting of tobacco is general under favorable conditions. Canning peas, in reduced acreage, are making favourable progress. A heavy blossom has been followed by a correspondingly heavy set of apples; an average crop of strawberries, peaches, and cherries is indicated. The early vegetable crop in Southwestern Ontario is poor due to the lack of moisture and slight frosts.

#### Maritime Provinces

Seeding operations are practically finished. There are prospects of a heavy crop of hay. Apple blossoms have been abundant and the trees appear in excellent condition. Pastures are in good shape.

#### Province of British Columbia

Recent rains in the coastal area have proved beneficial. The marketing of strawberries has been a little earlier than usual and a normal crop is anticipated. The tree fruit crop will probably average about 85% of normal, but to ensure

### Presbytery Meeting

The Presbytery of Prince Edward Island met in special session in the Presbyterian Church, Alberton; on the evening of Tuesday, May 26th, for the purpose of inducting the Rev. J. Keir Fraser, D. D., recently of Renfrew, Ontario, into the pastoral charge of the Alberton congregation.

Those present were Rev. Thos. A. Rodger, Moderator; Rev. R. Hensley Stavert, Clerk; Rev. Chas. J. St. Clair Jeans, Rev. R. Moorhead Isgate, Rev. Alex. R. Gibson and Mr. Fred Clark, Elders.

Others present who were not members of the court, were Rev. J. Keir Fraser and Messrs Alex. Martin and Robert Howe, Elders. At the induction service, Rev. Chas. J. St. Clair Jeans Interim Moderator, of the Alberton Session presided and narrated the steps leading up to the call. Rev. Alex. R. Gibson preached the sermon, Rev. Thos. A. Rodger, Moderator of Presbytery, inducted, Rev. R. Moorhead Legate gave the charge to the minister and Rev. R. Hensley Stavert addressed the people of the congregation.

The service throughout was a very dignified and impressive one.

After the Presbytery had met for a short while at the close of the induction service to deal with some routine matters, it adjourned to meet at the call of the Moderator and Clerk and was closed with benediction by the Moderator, Rev. Thos. A. Rodger.

### St. Nazaire Mourns Dead

(Special to the Guardian)

ST. NAZAIRE, France, June 15.—The toll of the dead in the sinking of the excursion steamer St. Philibert tentatively was placed at 442 today by deputy Mayor Bianco, speaking through his wife. Madame Bianco represented her husband, who was exhausted after working all night at the scene of the disaster, in a conference with the press.

"If no better news comes to contradict us, we must count the total at 442 dead," she said. "Only eight people were saved from the wreck. Only seventeen stayed at Nairmoutr instead of returning on the boat. We must admit that only 25 were saved out of 457."

"All St. Nazaire is mourning. They are still searching, but alas, we have not much hope left."

### ORGANIZATION URGED UPON BUSINESS MEN

TORONTO, June 15.—Strong advice that business men organize in the way barristers and doctors have and that they expel from their midst any businessman found to be dishonest, was given Canadian Credit men by their convention here today by W. J. Reilly, regis-

trar of the supreme court of Ontario. "No government would refuse you necessary legislation, and it is time such action was taken," the speaker said. "Commercial dishonesty is too often allowed to go unchecked. Declaring that the Bankruptcy Act is unsatisfactory and that better means are needed for investigating possible dishonesty of bankrupts, Mr. Reilly advocated changes to allow government appointment of a permanent supervisor to supervise work of trustees in

bankruptcy and to investigate possible frauds.

### STATES SOVIET SPIES ABOUND IN AMERICA

NEW YORK, June 15.—The economic structure of the Soviet Union is seen by George Theunis, head of the Bank of Belgium, former premier and retiring president of the International Chamber of Commerce as a menace to the entire world. Russian spies abound in this

country in greater numbers than is generally believed, Theunis declared. He said these agents were aware of the inner workings of all meetings, even those held in secret.

### TARPON JUMPS IN BOAT AND HITS TEXAS ANGLER

SAN BENITO, June 16. (U. P.)—Tarpon fishing held unexpected recently for four San Benito men when a giant silver king leaped into their boat and gave one of the fishermen a resounding whack on

the back of the neck. While making a strike the fish leaped over the shoulder of one man, seated on the deck in a camp chair, and struck another in the middle of the boat. The impact threw the tarpon onto the boatside, where it flopped back into the water, the surprised witnesses state. N. J. Davis, F. E. Burger, R. B. Temple and F. Rhodes were fishing near Brazos Santiago pass when the tarpon, estimated to be about five feet in length, leaped overboard.

## IN A NATION-WIDE VOTE

# 49.29% SAID:

# "I WILL BUY GOODYEAR TIRES"

### 22 MAKES WERE VOTED ON

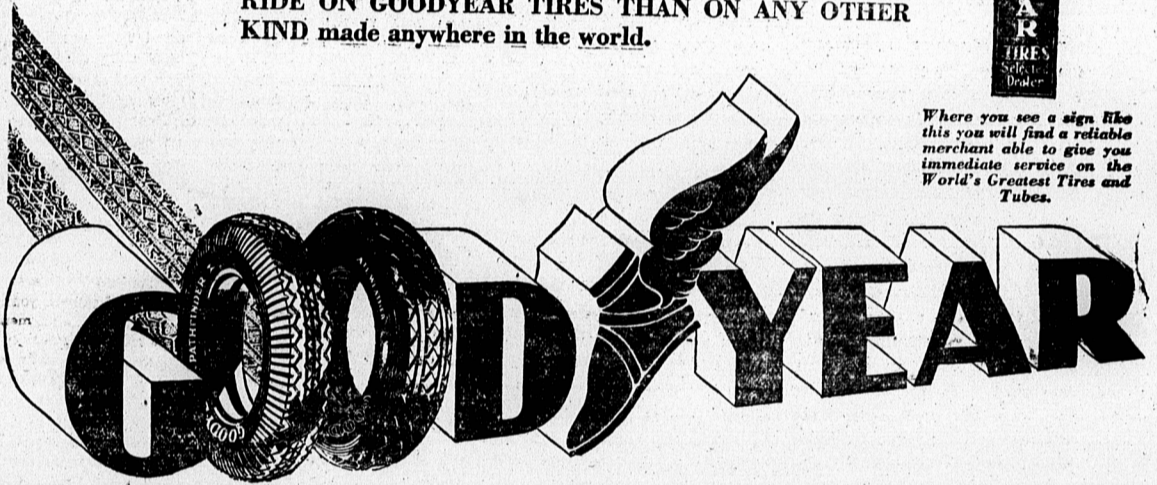

TWO independent organizations have just completed a vote, asking Canadian motorists, "What make of tire would you buy?" The vote was taken in every province—in cities, towns and on farms. The answers were not influenced in any way. The vote is the unbiased opinion of people who have no interest in any make of tire, except to get the most for their money. The preference for Goodyear Tires is 2½ times that for the second tire, TWENTY TIMES the average preference for all other makes.

### DODDER INVADES ONTARIO

ST. THOMAS, June 15.—When E. Smith, Provincial Weed Inspector, entered the Elgin County chambers today to enlist the cooperation of the Councillors in fighting noxious weeds, he brought with him a clump of perennial sow thistle, the most pernicious weed in the Dominion. "I found this sample on the Court House grounds," Mr. Smith announced. "I left another, that you may see what it is like when you leave." Mr. Smith warned about the European parasitic plant called dodder that has been discovered in fifteen fields in adjoining counties. He expressed the opinion that this weed, which kills clover and robs the soil of its fertility, found its way into Ontario in seed from Europe. He said that it had been legislated against more than any other weed in Europe.

WHY NOT BE ONE CANADIAN WHO HASN'T

### "ATHLETE'S FOOT"

that wherever it penetrates it kills this ringworm germ. At the first sign of infection, moisten your feet, morning and night, with Absorbine Jr. Use it, too, before and after every exposure of your bare feet in public or semi-public places. The infection is simply everywhere. If it does not yield readily to Absorbine Jr., see your doctor. You have probably already used Absorbine Jr. to soothe rheumatic aches and pains, sprains and sore muscles and to ease bruises, cuts and sunburn. Now use it to protect your family and yourself against "Athlete's Foot"! At all druggists—\$1.25. W. F. Young, Inc., Lyman Bldg., Montreal.
