Dividends

It is nice to get an undefined part of your premium back after an indefinite number of years. It is nicer still to keep this part of the premium in your possession from the beginning—to pay only the price of insurance, not the price of something—altogether different.

That's the Maritime plan.

HEAD OFFICE HALIFAX, CAN. T. W. BENTLEY, Manager for Prince Edward Island

A Tribute To Dr. E. J. Keir

The news of the death of Dr. E. J. Keir is still travelling.

A pale-faced studious looking man, boarding the train at Paris for London, is handed a telegram conveying the news which we have so sadly known for many days. The man was Dr. White, internationally known authority on hyper-tension. The Superintendent of the Massachusetts General also knows to-day that his old friend has gone. Dr. Kelly of Baltimore, one of the world's great surgeons, has also been made acquainted with the passing of him who was his friend and assistant for seven years.

It is not mete nor fitting that any eulogy of him should be in too much of a laudatory vein. He, himself, would not care to have it so. But it is only fair to say that in discrimination and accuracy of diagnoses, in delicacy of touch, in the unaccountable faith with which he inspired the sick, he is to-day considered to have had no peer among all the great surgeons who have labored at the Massachusetts General in Boston.

It is impossible for a great sorrow to strike the heart without that heart uttering a cry. No man has ever lived in Alberton, who has so fully commanded the deep love and respect which was given to Keir. To say he is gone and that we miss him borders on the commonplace, as it does to say we can never fully realize the greatness nor the skill of him who walked so unassumingly among us.

His ability as a physician was known the Province over, but the deep humanity of him could only be felt by those with whom he came in contact. By very nature, he was a leader of men. When Death was hovering over the wasted frame of a victim, no thought of any pecuniary reward interfered with the services of this medical genius. As he has so often told the writer, the first duty of a physician is to relieve suffering. That was the only object which ever animated Keir in the discharge of his labor—labor which at all times, was sufficient for two men instead of one.

He was a loving husband, a kind father, a brother to all suffering mankind. Were everyone, to whom he had done a favor, to lay a wreath upon his bier, he would sleep to-night beneath a wilderness of flowers.

In a little graveyard in the little town of his adoption, he sleeps his last long sleep. He lies in that pre-

mature grave because he could not remain deaf to the cry of need. For days and nights without sleep or rest he went from sufferer to sufferer—alleviating their pain, calming their fears. At last, the overworked body unable to respond to the dictates of a tireless will, refused to function and is forever now at rest. To him, whoever he may be, who undertakes to fill the place of Keir, we shall give a measure of faith and of respect. But there, was and can forever be, but one Keir—healer of men. To him we gave wholeheartedly a love full and unrestrained.—J. C. Lewis.

Live Stock Changes Owners

J. B. R. Lea & Son of Victoria, P. E. I. recently sold Ernest Harper, Borden a young purebred Holstein bull of exceptional breeding, in the dam of this young animal has made one of the most outstanding records of milk and fat that has ever been made in Canada under the circumstances.

As all experienced breeders know there are many divisions and subdivisions in the classes of official records for dairy cows. A cow may be milked four times a day, which gives her a considerable advantage over her sister milked three times daily, and a very considerable advantage over the cow milked only twice daily, a division that is known as the farmers' class as few ordinary farmers can take the time necessary for three times a day milking, even though a seventy pound cow on twice a day milking will frequently increase to eighty or eighty-five pounds a day without additional feed when given one additional milking.

The cow owned by Messrs Lea was entered in Class B, twice a day milking and although she dropped two large twin bulls, and was in only very ordinary condition at the beginning of her test, and suffered a severe attack of garget after freshening and a further bad injury to her leg which reduced her production from seventy pounds a day to forty pounds, still, notwithstanding these handicaps she produced the remarkable amount of over 18,000 pounds milk, averaging 3.95 fat or almost an average of 4 percent, equal to 892 pounds butter in the year. Few Holstein cows are capable of producing 4 percent milk even when starting their test in heavy flesh but this great cow was capable of accomplishing this after giving birth to twin bull calves and starting her test in comparatively thin condition. Not only is this a splendid record under the circumstances, but, this cow has the honor of leading all cows of any breed in the Federal cow testing for Nova Scotia and P. E. Island for the past two years. She is also an Island product being bred by her owner who has one of the best producing herds in the province, all bred from a single heifer calf by the great old sire "Ida Rooker 2nds 'Vale' used for years in the noted show herd of Lea & Clark. The sire of this young bull is out of the noted show and test running cow "Island Aggie DeGor" also of the Lea herd and as such is a line bred Vale sire. No strain of Holsteins have ever produced a more uniform, true type of Holstein nor one that was more noted for producing milk high in fat than this family, and Mr. Harper, who is farming jointly with his father-in-law, Mr. W. S. Muttart, at Borden, is to be congratulated on securing such a well bred sire to head his valuable purebred herd of Holsteins that have averaged nearly 400 pounds of butter fat in a year.

As all experienced breeders know there are many divisions and subdivisions in the classes of official records for dairy cows. A cow may be milked four times a day, which gives her a considerable advantage over her sister milked three times daily, and a very considerable advantage over the cow milked only twice daily, a division that is known as the farmers' class as few ordinary farmers can take the time necessary for three times a day milking, even though a seventy pound cow on twice a day milking will frequently increase to eighty or eighty-five pounds a day without additional feed when given one additional milking.

We Offer

450,000 SHARES

NORDON CORPORATION, Limited

Incorporated Under the Laws of the Dominion of Canada

HEAD OFFICE:—Vancouver, B.C.

ADMINISTRATIVE OFFICES:—Calgary, Alberta, and Los Angeles, California.

CAPITALIZATION

Authorized—5,000,000 Shares of no par value. To be presently issued, including this offering, 2,000,000 Shares. The Company Has no Funded or Other Indebtedness.

REGISTRAR AND TRANSFER AGENT: Montreal Trust Co., Toronto, Winnipeg and Vancouver.

DIRECTORS

- List of directors including Glen M. Ruby, B. F. Hake, Major-General D. M. Hognath, C. G. Willis, Samuel R. Smith, Robert S. Moran.

PRESENT REVENUES:—Royalty revenue from five wells in Santa Fe Springs field will presently be at rate of \$300,000 per annum, and rate is expected to reach \$500,000 per annum before the end of this year, as thirteen more wells are being drilled on royalty leases. Further revenues are expected from Texas and New Mexico fields from wells now drilling.

FINANCES:—Upon completion of this present financing the company will have in excess of \$1,100,000 in its treasury.

INTENSIVE CANADIAN OPERATIONS:—The immediate objective of the Corporation is large expansion of its operations in the prospective fields of Western Canada, where its staff, in possession of valuable geological data, believes some of the most important structures on the continent may be developed.

PRINCIPLES OF OPERATIONS:—The principles which have been and will be followed by the Corporation in building up revenues necessary for execution of its policies, used with marked success by the great royalty companies of the United States, will be rigidly adhered to, thus eliminating, in largest measure, drilling operations—the most costly and most hazardous branch of the industry. Leases and royalties will be negotiated over a wide spread, thus minimizing hazard of loss and increasing the chances of big success.

The Corporation is not a drilling company and will confine its operations in that direction solely to offset drilling where such operations are imperatively demanded in protection of its holdings.

PERSONNEL:—The standing of the directors of Nordon Corporation is of the highest order. President and General Manager Glen M. Ruby is acknowledged to be the outstanding authority upon the prospective fields of Western Canada, with the widest experience in continental oil affairs. Managing Director C. G. Willis stands equally high in the Southwest and is generally accorded a portion of the credit for discovery of several of the important fields in the Los Angeles Basin. From time to time, announcements will be made regarding the personnel of a Board of Consultants, which will include oil experts of continental and international reputation.

Application will be made for listing on Eastern and Western Stock Exchanges. Literature, with halftones and maps, containing further details, gladly furnished upon request.
