

The Wellington is more than a good pipe—

it's a WDC Pipe, a genuine French briar; it's a good smoke; it's peace; it's comfort; it's quiet meditation—all done up in one sweet brown package. The well catches all moisture and the top-opening bit sends the clean, dry smoke up away from your tongue. Good dealers have the Wellington in the shape and size you want, at \$1.25 and upward.

Tells How to Stop a Bad Cough

Surprising results from this famous old home-made syrup. Easily prepared and costs little.

If you have a severe cough or chest cold accompanied with soreness, throat tickle, hoarseness, or difficult breathing, or if you wake up during the night with croup and you want quick help, try this reliable old home-made cough remedy. Any drugstore can supply you with 2 1/2 ounces of Pinex (50 cents worth). Pour this into a 16-oz. bottle and fill the bottle with plain granulated sugar syrup. Or you can use clarified molasses, honey, or corn syrup, instead of sugar syrup, if desired. This makes 16 ounces of really remarkable cough remedy. It tastes good, and in spite of its low cost, it can be depended upon to give quick and lasting relief.

You can feel this take hold of a cough in a way that means business. It loosens and raises the phlegm, stops throat tickle and soothes and heals the irritated membranes that line the throat and bronchial tubes with such promptness, ease and certainty that it is really astonishing.

Pinex is a special and highly concentrated compound of genuine Norway pine extract, and is probably the best known means of overcoming severe coughs, throat and chest colds.

There are many worthless imitations of this mixture. To avoid disappointment, ask for 2 1/2 ounces of Pinex with full directions and don't accept anything else. Guaranteed to give absolute satisfaction or money promptly refunded. The Pinex Co., Toronto, Ont.

Corns Stop Hurting, Then They Lift Out With Fingers

No pain or soreness! Corns and calluses just shrivel up and lift off—Try it!

A noted Cincinnati chemist discovered a new ether compound and called it freezone and it now can be had in tiny bottles for a few cents from any drug store.

You simply apply a few drops of freezone upon a tender corn or painful callus and instantly the soreness disappears, then shortly you will find the corn or callus so loose that you can just lift it off with the fingers. Really! No humbug! No pain, not a bit of soreness, either when applying freezone or afterwards and it doesn't even irritate the skin.

Hard corns, soft corns or corns between the toes, also toughened calluses just shrivel up and lift off so easy. It is wonderful! Works like a charm. Keep it on the dresser.
