ALMOST TOTAL

(Continued from Page 1) factor of the C.C.F. strength. The Liberal party here is engaged in its most desperate struggle in any of the provinces to prevent what looked a few short months ago like a complete sweep from becoming a total loss.

Not Recovered

In Alberta the Liberals have not yet recovered from the stunning blow dealt them by the Social Credit movement, as previously explained in this despatch.

is facing certain defeat. E. S. Garland of Bow River and W. J. Irvine of Wetaskiwin, two of the most vocal members of the C.C.F. group in the last Parliament, have run foul of the Social Credit organization and will pay for it with their political lives.

Provide Music

British Columbia presents the final spectacle of Liberal disorganization, just as it does the notable example of C.C.F. strength. For some time past Liberal speakers have been unable to secure hearings at their own meetings.

Final Refuge

The final refuge the party has taken is in the force of repression. "Cery" McGeer is mayor of Vancouver. He is also Liberal candidate in one of the city ridings.

Card of Thanks

Mrs. Bernard Callaghan and family of Fort Augustus, wish to thank all their friends and kind neighbors for their kindness in their recent sad loss.

PREMIER SCORES

LIBERAL INCONSISTENCY

(Continued from Page 1)

break the policy of your government and force upon Canada a fire sale of its surplus wheat, assisted by some Canadian big interests represented by the Sifton press."

Dealing with Liberal opinions of government policies, Mr. Bennett declared that while Liberal leader Mackenzie King was declaring the minimum wheat price was proposed by his party, Premier Gardiner of Saskatchewan was declaring in Nova Scotia that the fixed price was an election move.

UNSATISFACTORY

The British announced they were "very unwilling to accept anything so definitely unsatisfactory" as an official reply from Italy.

SCORES KING

Mr. King's answer to his own question was that he did not believe "any group of persons who have given thought to these matters would attempt a task of this kind in Canada at this time."

ACTION UNDER ARTICLE 15

If the Council acts under Article 15 it can make the rejected plan the plan of the League and Italy can only resort to war in defiance of the Covenant.

Mr. Bennett asked the questions: "Where does Mr. King stand with his western lieutenants who favor the issuing immediately of more than \$400,000,000 of paper money with no resources behind them?"

Declaring that although Mr. King, in his campaign speeches had abandoned opposition to the government's tariff policies, he had already given notice to the Empire that he would reduce tariffs 50 percent and, "freely offer your industries on the altar of Manchester Liberalism."

While Mr. King had "made and written speeches about social questions," the reform program of the Conservative party was on the statute books.

Mr. King's tariff promises to the British government, if fulfilled, would put 60 percent of Canada's factory workers out of employment.

Mr. King's tariff promises to the British government, if fulfilled, would put 60 percent of Canada's factory workers out of employment.

COUNTER

(Continued from Page 1)

mat created anew conflicting hopes and fears as reports of the statement circulated.

One deduction of the delegates was that Aloisi's denial of any official sanction to his virtual rejection of the essentials of the peace plan meant Mussolini wishes to keep "his liberty of action" and to have no official relations with the League.

Another opinion was that Mussolini wishes to keep open the door of conciliation.

The announcement did much to dispel immediately rumors of an imminent Italian break with the League of Nations.

These counter proposals were reported to include demands for a belt of Ethiopian territory connecting Italy's African territories of Eritrea and Somaliland west of Addis Ababa, total disarmament of Ethiopia and the placing of that nation's armed forces under Italian control.

UNSATISFACTORY

The British announced they were "very unwilling to accept anything so definitely unsatisfactory" as an official reply from Italy.

But nevertheless Italian sources said Baron Pompeo Aloisi, chief Italian delegate, had confirmed to Salvador de Madaralaga, chairman of the five-power committee, the observations he made last night concerning the committee proposals which "I Duce's cabinet has labeled unacceptable, adding that the observations were those of the Italian government."

Tonight Anthony Eden of Great Britain and Premier Laval of France conferred earnestly on the grave situation. The committee of five, after officially publishing its plan for peace, prepared to meet again tomorrow before finally reporting to the League council that it has been rejected by Italy and accepted by Ethiopia.

The question now is, what procedure will the League follow. It seems hardly possible that conciliation can be continued in face of the present deadlock.

Mr. Bennett asked the questions: "Where does Mr. King stand with his western lieutenants who favor the issuing immediately of more than \$400,000,000 of paper money with no resources behind them?"

PEACE PLAN MADE PUBLIC

(A. P. By Guardian's Special Wire)

GENEVA, Sept. 23—The League of Nations five-power committee which investigated the Italo-Ethiopian dispute with a view to evolving an amicable solution tonight made public its peace proposals.

The committee said it was guided by the obligations regarding the independence of League members and by the need for "good and neighborly relations" between members of the League.

International assistance, as proposed by the committee, was outlined under five sections. These included reorganization of police and gendarmerie; economic development; finance; other public services, including justice, education and public health and internal structure and organization for assistance.

Ethiopian advisers would be appointed by the League council with the approval of the Emperor. Yearly reports would be made to the council and the plan would be renewed at the end of five years.

A. HORNE & CO. Charlottetown

Dalhousie Professor To Aberdeen

(C. P. By Guardian's Special Wire)

HALIFAX, Sept. 23—Dr. E. W. R. Cruickshank, professor of physiology in Dalhousie University since 1928, has been appointed regius professor of physiology in Aberdeen University. It was announced here today by President Carleton W. Stanley of Dalhousie.

Appointments to regius chairs in British universities are made by the government and the honor is a mark of recognition of Dr. Cruickshank's world-wide reputation as a teacher and scientific investigator.

Author of these books and scores of articles on his subject, he is considered an authority in learned circles.

Dr. Cruickshank is a graduate with honors in medicine of Aberdeen. In post-graduate work, he won a D. Sc. in London, a Ph. D. in Cambridge, and also the M. R. C. P. (London) in 1926 and the F. R. S. (Edinburgh) in 1929.

He served four years with the Royal Army Medical Corps during the war.

Trooper Killed Thwarting Bank Robbery

(A. P. By Guardian's Special Wire)

FORK UNION, Va., Sept. 23—State Trooper W. R. Thompson thwarted the robbery of the Bank of Fork Union today but paid with his life.

The trooper entered the bank when he noticed the two acting suspiciously. As he struggled with one of the robbers, the other poured five bullets into the trooper's back.

Soviet Science Experiment On Human Hearts

(A. P. By Guardian's Special Wire)

MOSCOW, Sept. 23—Soviet science told the story today of how the hearts of 35 children, removed from their bodies after death, were made to beat again—some for as long as four hours.

A solution containing adrenalin was used in the experiment, described by Prof. B. Ossinofsky of the government institute for the protection of children's health, and conducted in his laboratory.

The hearts, he said, were removed from the bodies in periods ranging up to 25 hours after death.

Those revived made up 65 per cent of all the hearts on which experiments were conducted. Ossinofsky asserted. The children from which the hearts were taken died of various diseases.

The experiment was described as the first to deal with human hearts on a large scale and Ossinofsky expressed the belief it might open up a new field of study on the cause of children's diseases.

Canadian Oyster Tried in Britain

When Julius Caesar invaded Britain back in 55 B. C. he probably had his first taste of the British oyster which is considered the best in Britain today and held in the highest esteem by the gourmet. It is known as the White Stabbe. The price, however, is so high they are only within reach of the wealthy. Oysters are much consumed in Great Britain and the demand continues during the spring and summer months. Supplies are imported from Holland, France and the United States, according to the Natural Resources Department of the Canadian National Railways. In the case of oysters from the United States these are imported from October to March with "seapoints" for immediate consumption and "East River" for relaying. Canadian oysters have been tried out on the British market but they have been too large to meet requirements of the importer who requires a smaller oyster which will pack from 1,400 to 1,500 to a barrel with a minimum of 1,000 oysters. Tight packing is essential so as to reduce movement in transit. It is considered there is a market for oysters from Eastern Canada when supplies are more abundant. The great oyster bearing beds in Eastern Canada are located along the shores of the Strait of Northumberland and off Prince Edward Island.
