A COLLISION.—There was a nasty collision on Kent Street, Saturday afternoon in which Dr. Dorsey's horse and wagon were the principal sufferers. The doctor's horse was thrown to the ground and his wagon badly twisted, but happily the horse was not hurt and was quickly helped to its feet by passersby. The other horse escaped unhurt but the low sleigh to which it was attached was somewhat damaged.

COLLEGE DEBATE.— The intercollegiate debate between Dalhousie and Mount Allison, which took place in Halifax last week at the school for the blind, was won by Mount Allison. The subject was: "Resolved that the United States should have entered the present war on the side of the allies," Dalhousie taking the affirmative and Mount Allison the negative. The judges were two justices of the supreme court of Nova Scotia, and a county court judge from New Brunswick, the Nova Scotia referees being Mr. Justice Harris and Mr. Justice Russell, and the New Brunswicker Judge Jonah. The rules of the debate provide that no statement be made officially as to how the debate was won or as to how the judges stood in their decision but it is understood that two of them favored Mount Allison while one thought Dalhousie to be superior. The ability of the two teams in argument and presentation was pretty equal but in anything Mount Allison surpassed in argument and Dalhousie in presentation. The palm of victory goes to Mt. Allison team consisted of R. V. Sharpe, Mr. Curtis and Mr. Withrow. The Dalhousians were F. H. Patterson, F. H. Anderson and J. T. Bonnell, the latter two being from Morell and Charlottetown respectively.— Halifax Exchange.

Popularity of New Dictionary Grows

New Universities Dictionary Presents Subject Instructively.

One of the first things that must be learned by the young man or woman who sets out to become a thoroughly competent stenographer is the proper use of punctuation. Morris W. Croll, Ph.D., of the Department of English Princeton Universities, has contributed an interesting and highly instructive chapter on this subject in The New Universities Dictionary being offered to the readers of this paper.

Professor Croll explains how the number of punctuation marks in common use has gradually increased with the development of the art of printing. Through the use of these signs the meaning of printed or written discourse is rendered clearer to the eye of the reader. How and when to use each of the twelve marks now employed is fully explained by Professor Croll, and the rules he lays down can be easily learned.

The remarkable success which has attended this dictionary offer shows that the people of this city appreciate the opportunity given them to secure at a nominal cost such a valuable educational work.
