

An opportune time to buy Hewson Pure Wool Textiles 7 p.c. Pref'd Stock

It is a well established fact that the most opportune time to buy the securities of a re-organized company is at the beginning, before the purposes for which the additional capital was raised have been accom- plished.

A number of new buildings are shortly to be erected and plant installed by Hewson Pure Wool Textiles. The part which will be in operation by July 1st will increase the out- put of cloth by 50 per cent. Needs to state, this will add very materially to the earnings of the Company. A number of important changes have been made which will add to the efficiency and earning power

of the plant. In view of the fact that the Preferred Stock has been placed upon a dividend paying basis, (the first dividend having been declared and being pay- able April 1st) purchasers will be securing a good yield on their investment from the start and will also have the advan- tage of buying before the addi- tional plant and improvements have made themselves felt, and this stock has made any decid- ed advance in price as a result. We offer a block of these shares with a substantial bonus of common stock, in lots to suit purchasers. Price and other particulars upon application.
