Monthly Meeting Of City Council

Salary of Chief of Police Raised to \$1800.00 Per Year—Discussion on Light Bills—Other Business Transacted.

The regular monthly meeting of the City Council was held last night in the Council Chambers, His Worship Mayor Yeo presiding.

After the minutes of the previous meeting had been read and adopted, various bills that had been certified by the finance committee, and paid, were read, and payment confirmed; others which had been certified to had their payment authorized on motion.

As His Worship had an official engagement elsewhere, he left the meeting, and Councillor Prowse took the chair.

The Health Officer's report was next heard. Four cases of diphtheria had developed in the city since last month. There had been two deaths, owing to the fact that medical aid had not been called in early enough.

Among the communications submitted, was one from Dr. Clifton H. Beer, making a claim of some nine-tenths of a dollar for damage to his car by the street sweeper.

Councillor Foster thought both might be at fault, one for turning a corner before reaching the intersection, and the other for not blowing his horn when overtaking the sweeper.

It was decided to leave the matter in the hands of the recorder. Councillor Foster then submitted the report of the street committee. Graveling had been completed on North River Road, and was in progress on Brighton Avenue.

He alluded to the complaints about the plank sidewalk between the end of Kent Street and the railway crossing on Fitzroy Street at the East End of the City. Half of this distance had now been covered with a substantial concrete sidewalk.

The culvert at Villa Street had been satisfactorily dealt with. He alluded to the difficulty and expense entailed in cleaning out the sewer catch basins and said it would be a great help, if the practice of throwing refuse and broken bottles down them were to cease.

Premier Bruce Opens Campaign

(Canadian Press) MELBOURNE, Australia, Oct. 8.—The Commonwealth Government has "thrown down the gauge of battle" to extremists who are challenging Australia and seeking to disrupt the empire, declared Premier S. M. Bruce in the opening speech of his election campaign tour today.

Discussing the strike of dock workers which has been in progress for several weeks, the Federal Prime Minister said extremists were working incipiently to overthrow national institutions. "We are determined to keep the Empire united and the Law Supreme in Australia," Premier Bruce said, "and I appeal to you to help me."

AMAZING WAR FILMS IS SHOWN

"Wings," an Epic of the War, Draws Capacity House at Strand Theatre.

The part which aviation has played in the war has been told many times in verse and prose, and the adventures of famous "aces" have sometimes been depicted on the screen. But nothing that Charlottetown theatre goers have ever witnessed can compare with the magnificent picture "Wings" which drew a capacity house last night at the Strand Theatre.

The picture is a masterpiece of screen version of the war and the adventures of famous "aces" have sometimes been depicted on the screen. But nothing that Charlottetown theatre goers have ever witnessed can compare with the magnificent picture "Wings" which drew a capacity house last night at the Strand Theatre.

There is a fine love story running through the scenes, as well as some good humorous episodes; but the strength of the picture is in its realism, which sets it apart as something absolutely unique.

There are scenes it must be admitted that are not pleasant. There are things that probably would not fall in with sentimental ladies' notions of how a nice war should be conducted. But after all, the picture is a horrible mess. Only the courage and sacrifice of the men who endured its horrors make a description of it justifiable.

WHY WE SHOULD EAT MORE POTATOES

A Leading Medical Doctor of Battle Creek Strongly Advocates the Eating of More Potatoes as a Means of Health.

The following article, which appeared in the American Potato Journal for September, 1928, was written by John Harvey Kellogg, M.D., L.L.D., F.A.C.S., Medical Director, Battle Creek Sanitarium.

"In this country we have not yet begun to appreciate the value of the potato as an article of food. The American are essentially grain eaters. There are many reasons for this. The potato requires intensive cultivation and much hand labor, whereas cereals can be readily produced in enormous quantities by the use of machinery alone.

S'Side Town Council Meeting

The regular meeting of the Summerside Town Council took place last night. Mayor Arnett presiding over a full council board. After routine accounts amounting to \$6,871 were passed two communications were read from parties willing to purchase and operate the electric light and power plant and services. One offer was made by Messrs Earl Schurman and F. A. Johnston, the other from Mr. Austin Seales. On motion of Councillor Robinson both were received and laid on the table.

Mayor Arnett explained that the Council had been approached by the Maritime Electric Company, but at present there was nothing definite in the offer. When there was the matter would be placed before the citizens to instruct the Council. Brief reports of the various committees were submitted and approved.

A motion was passed authorizing the town clerk to inform the Telephone Company that the town would be willing to cancel their lease of the rooms in the Town Hall if the company vacated same by January 1st, confining up on a month's notice given by them and the payment of a month's rent after vacating the premises.

Potato Prospects

At the present time, very few potatoes are moving—only eight or ten cars per day on the average. At present table stock—the only potatoes moving—are 25c per bushel. The 300 refrigerator cars on hand, and over 700 box cars, so that 1,000 cars are available if required. There has been a steady movement of turnips during the past month, about five to eight cars being exported per day since the middle of August.

During the last three weeks, 142 refrigerator cars have crossed at Borden. These were loaded with turnips, cheese, butter and oysters. More care is being taken with the shipment of turnips than formerly, they being now considered a perishable commodity.

A cargo of potatoes has been accumulated at Summerside for the Steamer now loading there, which will take away a cargo of 20,000 bushels to Cuba. Several other steamers are to follow. The situation caused by the destruction by fire of the warehouse on the Railway Wharf, Charlottetown, will be met in some measure by the increased yardage at Georgetown, where 130 extra cars can now be accommodated.
