Is This Your Case?

A good many people suffer with back ache every morning. They think they have lain in a cramped position, or else have caught a little cold.

More than likely it's due to their kidneys- may not be serious at all, except as it tends to become chronic—then serious.

Nyal's Stone Root Compound benefits the kidneys, helps them cleanse the blood from poisonous uric acid and does away with that backache quickly---Nyals Kidney Pills are good too. 25c box.

DEATHS.

(From Yesterday's Evening Guardian)

PARKER.—At Cardigan on May 5th 1913, Mrs John Parker died very suddenly of paralysis after a few hours illness.

Cleared Away

Proper Food Put the Troubles Away.

Our own troubles always seem more severe than any others. But when a man is unable to eat even a light breakfast, for years, without severe distress, he has trouble enough.

It is small wonder he likes to tell of food which cleared away the troubles.

"I am glad of the opportunity to tell of the good Grape-Nuts has done for me," writes an Eastern man. "For many years I was unable to eat even a light breakfast without great suffering.

"After eating I would suddenly be seized with an attack of colic and vomiting. This would be followed by headache and misery that would sometimes last a week or more, leaving me so weak I could hardly sit up or walk.

"Since I began to eat Grape-Nuts I have been free from the old troubles. I usually eat Grape-Nuts one or more times a day, taking it at the beginning of the meal. Now I can eat almost anything I want without trouble.

"When I began to use Grape-Nuts I was way under my usual weight, now I weigh 30 pounds more than I ever weighed in my life, and I am glad to speak of the food that has worked the change." Name given by Canadian Postum Co., Windsor, Ont. Read the little booklet, "The Road to Wellville," in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Philadelphia at Chicago, no game; rain.

At Cleveland—New York and Cleveland tie, 2-2.

At St. Louis—Washington 10; St. Louis 5.

EPWORTH LEAGUE.

The first convention of the Epworth League was held in Cleveland twenty-four years ago today, when the league was formed by the union of five societies affiliated with the Methodist Church. The several societies held under their jurisdiction 1,500 local societies, with a membership of 80,000. The league now has over 30,000 chapters and a membership of nearly a million and a half. Besides societies all over the United States and Canada, the league has branches in Mexico, India, South America, Norway, Italy, Sweden, Denmark, Finland, China and Japan.. At the first meeting the league adopted as its motto "Look up, Lift up," and declared its purpose to be "to promote intelligent and loyal piety in the young members and friends of the church; to aid them in works of mercy and help." The pledge required is: "I will earnestly seek for myself, and do what I can to help others to attain, the highest New Testament standard of experience and life. I will abstain from all forms of worldly amusement forbidden by the Discipline of the Methodist Episcopal Church, and I will attend, as far as possible, the religious meetings of the chapter and the church, and take some active part in them."

EUROPEAN BASEBALL LEAGUE STARTS TO-DAY

It had to come, and according to a Paris newspaper, it is practically here. Meaning an European baseball league. And not only one but two of them. The said organ of publicity from the City of Light announces the formation of the International Baseball League, a professional organization, with a circuit consisting of Paris, London, Berlin, Vienna, Nice, Monte Carlo, Brussels and Budapest. The same paper states that an amateur baseball league has been formed in France, with teams in Paris and several other of the first contests today, with London in Paris. The French capital, it is said, is to be represented by a team composed principally of American players, although no information is available as to the identity of these expatriates. No stars of the diamond game seem to be missing, so it is safe to assume that the men who will wear "Paris" on their manly buzzums are not representative of the highest type of American ball player. Richard Klegin, who introduced Paris to the boxing game, and made the Parisians believe that his stable of pugs were of championship calibre, although only second and third raters, is said to be responsible for the International League. Klegin made a mint of money as a boxing promoter in the City of Light, in spite of the mediocre talent he employed, and he probably figures he can play the same game with baseball. Here's hoping that he succeeds. The effete Europeans will soon get hep to what's what and who's who in baseball, just as they did in the boxing game, and will demand and get a better grade of players. The London baseball team is said to be composed exclusively of Englishmen, picked from the ten London baseball clubs.

HORSE NOTES

The stable of Mr. James McKay has been an interesting centre during the last few days owing to the fact that his Domino mare has become the mother of one of the finest foals even seen in this locality. This foal is sired by the famous Percheron stallion Glocus. This stallion has proved himself one of the best stock-getters that ever crossed the Atlantic.

FUR NOTES

Mink farming promises shortly to rival even the silver fox business. For some reason doubt has been entertained as to the possibility of breeding these animals in captivity but the results in several ranches this season have set all these doubts at rest. In a recent issue The Guardian chronicled the arrival of a litter of mink in a ranch at Darnley. A more interesting bit of news comes from Tyne Valley. Mr. Nelson Waldron, who has specialized in raising mink, had phenomenal success this season. He wintered 15 mink in all, eight males and seven females. On April 9th, he purchased an Island female mink that had been captured in a box trap by Mr. Holland of Tryon, and placed her in the ranch. On May 2nd she gave birth to a litter of seven. There are now six litters in the ranch and a promise of two more. When it is remembered that native Island mink are much darker in color than those found in any other part of Canada, and that their fur commands a much higher price in the London market, the value of Mr. Waldron's experiment will be appreciated. He now has the foundation laid of a breed of pure P. E. Island mink.

AN ETOMOLOGIST

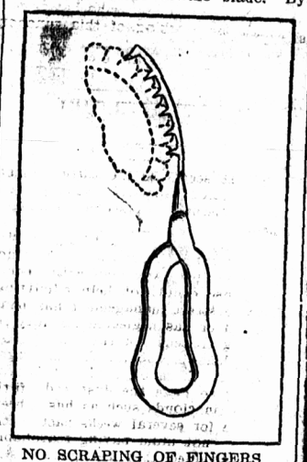
A Yorkshireman's Success in Rearing Butterflies

One of the best-known entomologists in Yorkshire is Mr. H. W. Head, who now lives on his butterfly farm at Burnston, near Scarborough, but who did all his pioneer work while residing in Scarborough. Mr. Head was the first to breed the butterfly in captivity, and to-day he owns the largest butterfly farm in the British Isles, covering between three and four acres, mainly devoted to the breeding of butterflies and moths. In the rearing of hybrids Mr. Head has been remarkably successful. He has raised altogether well on to a dozen, and he recently showed specimens of a yellow form of the green-veined white butterfly, the sale price of which is about $7.30 each. But what he is always on the look-out for are "sports," that is, butterflies or moths of well-known types, but differently marked than the ordinary. There is a good demand for these, and a single specimen will fetch pounds. It is all a matter of luck. Since he has been in the business Mr. Head has tried to breed a black variety of the tiger moth but he has not succeeded. At the haven live butterflies are not supplied. The live stock does not go beyond the caterpillar, or the fertile eggs of any particular kind of butterfly or moth in stock; but his clientele is cosmopolitan and world-wide in extent. A jet black butterfly, valued at $5,000, as big almost as a robin, with wings measuring 11½ inches from tip to tip, was brought to London from New Guinea by A. L. Mock, an explorer in the service of Hon. Walter Rothschild, millionaire owner of the famous private museum at Tring Park. Several new varieties of butterflies; by far the largest in the world, were discovered in New Guinea by Mock. "I had to take up from the coast," he says, "cases of pearl shell, tomahawks and beads of all kinds before I could get the assistance of the natives in capturing the butterflies. The natives shoot them with four-pronged arrows which they use for killing birds. The female giant butterflies are black or brown or white, but the males are splendidly marked in green or gold. I brought back also with me a butterfly which has a hairy body, on account of the intense coldness of the Snow Mountains. A couple of my native boy hunters were killed and eaten by New Guinea cannibals, who kindly sent me back the bones."

SCRAPES CORN OFF COB

Curved Blade With Teeth Scrapes Corn Out Sideways

An ingenious little device for removing corn from the cob has been patented by an Illinois man. A piece of wire is bent at one end to form a handle and the projecting stem flattened to form a thin, curved blade. Portions of this blade are cut through and bent downward, to form a series of teeth which extend the length of the concave side of the blade. By



NO SCRAPING OF FINGERS

drawing this scraper around the cob through each row of kernels the substance is neatly removed. While it is scarcely likely that this implement will cut corn from a cob as rapidly as some other devices, it nevertheless has this advantage over most of the others—it will not put the fingers in jeopardy. With most corn scrapers one is apt to scrape the skin off her fingers as well as get the corn off the cob.

Gun Shoots Gases

Instead of bullets a new German gun shoots a combination of gases, which temporarily blind and choke a victim, enabling him to recover later.

New Heel Plate

A new heel plate to aid in walking on slippery places has pivoted pawls, pointed to engage the sole of the shoe to which the plate is attached.

Stop the Switching

To prevent a cow switching her tail in the face of a person milking her a Maine man has patented a chain and hook to hold her tail against one leg.

Snow on Wire

German electricians have found that snow never collects on transmision lines that carry 100,000 volts or more, even when they are not charged and cold.

Self-Operating Wireless

Self operating wireless equipment has been invented for marine stations along the coast of France to warn vessels in foggy weather by code signals, sent out automatically.

Disinfecting Telephones

A corporation has been formed in Copenhagen to make a business of cleaning and disinfecting telephones.

WOMAN'S HAIR REACHES TO KNEES

A Year Ago Was Threatened With Baldness. Tells How She Made Her Hair Grow

Mrs. Ester Emery, now visiting friends in the city, is the fortunate possessor of marvelously beautiful hair, which when loosened from its coils, falls to her knees. Moreover it is of soft, silky and fluffy texture and in color a glorious glossy gold. Yet just one year ago she was threatened with baldness. Urged to tell how she had obtained this wonderful growth in so short a time, she said: 'Had anyone told me such marvelous results could be accomplished so quickly, I positively would not have believed it. Twelve months ago my hair, which then reached barely to my shoulders, was falling out at an alarming rate and growing very thin, actually exposing the bald scalp in several spots. It was dull and lifeless in color, turning grey in patches, and very dry and brittle. My head was covered with dandruff and itched like mad all the time. I tried fully a dozen different hair tonics, but they were all the same and never did me a bit of good. One day I chanced to read in my home paper of a simple home prescription to make the hair grow that was recommended by a well known physician. It said that by taking ordinary Lavona de Composee and mixing with Bay Rum and Menthol Crystals and applying to the scalp each night with the finger tips that new hair would grow very rapidly. I decided to try it and I had my druggist mix 2oz. of the Lavona de Composee with 6 oz. of Bay Rum and ½ dr. of Menthol Crystals, and started to use it. My, how quickly my hair did grow. First the hair stopped falling, the itching ceased and the dandruff disappeared. Then tiny little hairs appeared all over my scalp. These grew and grew as though nothing would ever stop them. They are growing yet, and while, of course I have used the treatment steadily and expect to continue it, at least until my hair reaches the floor, I might have stopped and been perfectly satisfied at the end of three months. I think that any woman can get long, thick, beautiful hair by using this prescription as I have recommended it to several friends and all are delighted with the result. The prescription is very inexpensive and any druggist can fill it. Those who use it should be careful not to get it on the face or where the hair is not desired.

LINER AT QUEBEC WITH A CASE OF SMALLPOX ABOARD

QUEBEC, May 13.—The Austro-American steamer Canada, from Trieste, which is due at the quarantine station to-morrow morning at 2 o'clock has a case of smallpox on board. She has 2,400 passengers and may have to land all of them there.

BECKER'S COUNSEL PLEADS FOR ADDITIONAL TIME

ALBANY, N. Y., May 13.—The court of appeals has reserved decision on the application of counsel for former police lieutenant Chas. Becker of New York for an extension of time in which to argue the appeal from his sentence of death for the murder of Hermann Rosenthal, the gambler. The appeal is set for argument on May 20. Becker's counsel asked for additional time to investigate possible new evidence which his affidavit declares, might tend to the granting of a new trial.

HOTEL ARRIVALS

The following registered at the Victoria Hotel, Charlottetown, yesterday:—Messrs. C. L. Baxter, Finland; P. A. Wallace, Halifax; Wilfrid Forbes, Port Vernon; F. F. Mackay, Peterborough; E. Charlottetown Summer Resorts, Ltd.

Are you going to have a Share in the Developing of another Prince Edward Island Industry that will eventually be of as much Importance as Fox Farming is to-day.

With the Boom in Eastern Canada, the great growth now assured for its manufacturing centres and shipping ports, and the approaching improvement of transportation facilities, both by rail and steamer Prince Edward Island may well become the chief summer resting place of North America.

With the changed conditions the development of the tourist and holiday business offers absolutely unlimited possibilities and the natural advantages of this Province to cater to the trade are unsurpassed. The increase of summer tourist traffic will be of benefit to every business interest, and to the farming community making a market at home for the best products of sea and land.

The newly incorporated company, The Charlottetown Summer Resorts, Ltd., have made a start towards a real development of the natural summer attractions of Prince Edward Island.

They have secured a magnificent site in close proximity to Charlottetown, they will have accommodation this summer for at least fifty permanent guests besides a considerable number of transients and they already have assurance that all available accommodation is likely to be occupied.

The holders of common stock are paying for all of the land and taking all of the risk.

Seven per cent preferred stock is offered to the public to help along the enterprise. Every cent received from the sale of seven per cent preferred stock will be spent on the erection of buildings and the improvement of the property. The seven per cent preferred shares are one hundred dollars each. They may be paid for in instalments of $10.00 per month and each instalment as it is paid will bear interest at the rate of seven per cent per annum payable in October of each year.

Applications for this stock should be mailed at once to R. L. Cotton, Managing Director, or they may be handed to any of the Directors. Use the following form and use it today.

Application for Shares in The Charlottetown Summer Resorts Limited.

Charlottetown, P. E. I., 191

To the Directors of The Charlottetown Summer Resorts Limited.

I hereby apply for ..... shares of seven per cent. preferred capital stock of the Charlottetown Summer Resorts Ltd, at par value $100 per share, on account of which I herewith enclose $ ..... being ten per cent (10 p.c.) and the balance I agree to pay on or before September 15th or in nine equal monthly installments, as may be desired. I understand that said stock is preferred both as to dividends and assets and will bear interest upon the amount paid in beginning with the payment of the first installment.
