TWO NOVA SCOTIA FISHERMEN LOST.

HAWKESBURY, N.S., June 7.—The Lunenburg fishing fleet, now returning home from North Bay, after a fairly successful trip, has not escaped the toll which those that go down to the sea in ships must be prepared to pay. Two lives were lost at North Bay, and this has served to mar an otherwise happy and prosperous trip. The schooner Annie L. Spindler reports that two of her crew have been lost. Another unfortunate accident reported here is that the American schooner William Mathieson, of Bucksport, Me., is a total loss at the Magdalen Islands. The crew are safe. About twenty of the fleet arrived here today and almost all of them have full fares.

CAMERAS and KODAKS are so

simple that a child can take good pictures with them. These cameras are the Standard of the whole world, and are so designed that they require no special demonstrator to explain them. Kodakery means photography with the bother left out.

We carry a full line of Kodaks and Brownie Cameras from \$1 to \$65.00. Let us show you how easy it is to take good pictures with a Kodak or Brownie Camera. If it is not convenient to call, we will be pleased to mail you free catalog.

Hall with a large attendance, there being 25 visiting members present from Quebec, including the Supreme Guardian Tesser of Quebec City, who ably presided. The morning session was devoted to business. The reports of the officers showed the order to be in a very satisfactory condition, its financial position being exceptionally strong. The total assets, on December 31st, 1914, made up of municipal bonds, etc., were \$422,449 and liabilities including death claims and premiums paid in advance \$18,055, leaving an excess of assets over liabilities of \$404,394. The sick and funeral departments are in a strong position financially. A number of important amendments were made to the constitution thus enabling the Society to further extend its usefulness. Several classes of hitherto profitable occupations were added to insurance and extra premiums were charged for hazardous risks. The Association also authorized the issuing of policies on the industrial plan and the extending of the privileges of the sick and funeral funds to juveniles. The sum of \$100 each was voted to the National Patriotic Fund and the Red Cross Society. All members serving in war will be maintained in good standing. TWO THOUSAND GERMAN DEAD

PARIS, June 7.—To the north of the Aisne the enemy has multiplied his desperate efforts to recapture the two lines of trenches which we took from him yesterday. After having brought up reinforcement in automobiles for a distance of fifty miles, the enemy made a furious counter-attack, but was completely repulsed. Two thousand German killed were left on the ground. We made 250 prisoners, among whom were an artillery officer and 25 non-commissioned officers. We captured six machine guns, and many others were found under the ruins. We have destroyed by melinite the three '77' guns which fell into our hands yesterday. They were down behind the second German trench, which we occupied, and it was not possible to bring them into our lines by reason of the violence of the fire. Between Soissons and Rheims we have cut down several local attacks and thrust them back about a hundred yards in the wood to the south of Ville-Au-Bois. "In Champagne, near Mesnil, troops brought by the Germans from their second line to their first line, probably with a view to an attack, have been dispersed by our artillery. "At Vauquois, by way of a reprisal, we sprayed flaming liquid on the trenches of the enemy, who replied with a bombardment. NO ABSINTHE IN FRANCE. PONTARLIER, France, June 7.—One hundred tons of leaves used in the manufacture of absinthe were burned publicly here to-day by order of the Government, in accordance with legislation suppressing the manufacture of absinthe.

LEST THEY FORGET. At the beginning of the murderous European war the Courier-Journal, in the kindest and most neighbourly way, warned its German-American fellow-citizens against the imprudence of arraying themselves as partisans on the side of the Prussian militarist, of espousing the cause of the Hohenzollern and the Hapsburgs. It being thus early perfectly clear that the triumph of the forces under the two kaisers would mean world war, the universe an armed camp, ultimately involving the United States. If the tendency toward organized expression had been as marked among the French-Americans and the Anglo-Americans, we should have warned them likewise. We love no country except our own. We hate no country except we are given definite reason to hate it. For Germany we cannot say that we will England is likeliest to be our liveliest trade rival. Lying alongside of us in Canada and British Columbia, England is the one country that could wage effective war against us. But, if Germany could win, the German Government, inflated by success, would become more than suspicious, and we will with your Monroe Doctrine. To hell go wherever we please to go! That would mean war with Germany and in such an event the German-Americans, who had made common cause with the Vaterland, would be something more than suspects, and it might become our duty to drive them out of the country. We wanted to avert a catastrophe so lamentable and to that end took time by the forelock. Let us repeat that we did this in the friendliest and most considerate way. All those who set themselves to represent the German-Americans were obnoxious and abusive. Since then the government and the arms of Germany have put themselves hopelessly in the wrong, and every act of wrong has been approved and supported by the German-Americans. These latter have conclusively shown that they are not Americans at all but merely and beligerently a German colony in America. If war should come they would have to be assembled in detention camps and branded as public enemies. If under recent orders of the German Admiralty an American ship carrying its load of passengers should be blown up in the Irish Sea, the explosion, like that of the Maine in Havana harbour, would reverberate from the Atlantic to the Pacific. War would be instantly declared by Congress. In many parts of the United States the life of no German-American

would be safe. Bloody Monday would have many duplicates and repetitions. The Courier-Journal forsook this and sought to steer its German-American neighbours and fellow-citizens away from it. They would not have it so. The consequences be with them. God grant they be not tragical. But the mood of the native Americans is not for trifles or trifling. It has been goaded very near to the limit of good nature and good feeling. Touch a match to the powder and woe to the fools who have followed the lead of Bernstorff and Dernberg, who ought to have been sent away three months ago, even as Washington sent away Genet. As for Bartholdt, of Missouri, he should have been expelled from Congress and again expelled as often as the treasonable Germans of St. Louis re-elected him.—Louisville Courier-Journal.

SOFT VOICE IS SURELY AN EXCELLENT THING

Just run over in your mind your friends and see how many of them possess that excellent thing in woman, a soft voice. The quality of the voice is affected somewhat by not your social position, but by the number of your friends and the state of intimacy. Living in a city like Toronto, where you have life-long acquaintances who become so intimate that they know almost as much as you do, about your inner self, has a bad effect on the voice. This is no idle fancy, but true. Go to a luncheon where the guests have known each other for years, met together frequently for work cards or any other diversions and just listen. But you won't be able to listen on account of the din. Everybody talking at once each voice rising higher and higher to command attention, till at last it seems like clamoring, and shrieking birds snatching at food. Now the voice should be as attractive as the face. It not only shows by the way it is used the cultivation of its owner, but the disposition as well. It shows too, the reserve of the speaker, a full rounded voice giving the effect of powers yet unused, while a thin piping voice indicates a nature in accord and gives no pleasure and awakens no sympathy. The pitch of the voice betrays as nothing else will the state of the feelings. Not alone do humans do this but animals as well. What a difference between a bark of recognition and greeting and one of distrust and warning. Nothing is more valuable in the sickdown."

THE SITUATION IN CONSTANTINOPLE DESPERATE.

PARIS, June 8.—"All information reaching here from Constantinople," says the Havas Agency's correspondent at Athens, "agrees in representing the situation in the city as almost desperate. The Young Turks are in dire straits. They are only being upheld by the insistence and ceaseless efforts of the German Ambassador and Enver Pasha, the War Minister. "The medical supplies in the city have been exhausted and a lack of coal has forced many flour mills and the water works which supply the city with drinking water to shut down."
