"Rebecca" Is Marian Nixon's Finest Role

Young Star Gives Splendid Performance Opposite Ralph Bellamy

Marian Nixon came to the Prince Edward Theatre yesterday. As Rebecca in Kate Douglas Wiggin's saga of American girlhood, "Rebecca Of Sunnybrook Farm," she enacts the outstanding role of her career.

This refreshing production not only gives Miss Nixon unbounded opportunity for dramatic expression, but also introduces Ralph Bellamy in an entirely sympathetic and romantic role, that of the kindly, understanding Dr. Adam Ladd who befriends Rebecca.

Faithful to the stage success, "Rebecca," in its talking picture version, relates the magical adventures and fascinating romance of Rebecca, forcefully told by Alfred Santell's skilled direction. The pictorial beauty of the outdoor settings heightens the charm of this wistful story of Rebecca, who saw beauty in everything despite disappointment, heartaches and disillusionment.

An important supporting cast, headed by Mae Marsh and Louise Closser Hale, seen at Rebecca's stern, puritanical New England aunts; includes Sarah Padden, Alan Hale, Alphonz Ethier, Ronald Harris, Eula Guy and many others.

A Picture for the entire family. Don't miss it.

WESTERN GUARDIAN

—MISS ROSAMOND DUFF, temperance speaker, will address a mass meeting in the United Church, Bedeque, Sunday, August 28th, at 3 o'clock. All are cordially invited. 5407-1i

—NARROW ESCAPE — Capt. Smith and Mr. Fraser Cook, of West Cape, had a narrow escape late Tuesday night when they were run down by the Revenue Cutter, while returning from Richibucto to West Point by motor boat. The crew of the cutter took the men aboard and were able to tow the disabled boat to West Point.—S.

PERSONALS

—Mr. Jack Trites and Miss Dorothy Allen, of Moncton, N.B., have returned to their home after a pleasant visit to Mr. Trites' sister, Mrs. C. F. Archer, Summerside.—S.

—Mr. and Mrs. B. D. Rogers, of Montreal, spent Wednesday and Thursday in Summerside. They were accompanied by Mrs. Ralph Rogers and Mr. Louis Lawson, of Charlottetown. While in Summerside they were the guests of Mr. and Mrs. H. F. Lee.—S.

Tom Mix At Capitol

Tom Mix, the greatest western hero of all time, returns to the screen after three triumphal circus years, in "Destry Rides Again" now at the Capitol Theatre, and it marks a red letter day in this town. There isn't a boy under sixty who doesn't plan to turn out and hear as well as see Tom Mix on the screen. The only drawback to this first talking appearance of Tom Mix is the fact that Tony cannot talk, too. There isn't anything that Tony cannot do, but so far Mix has not been able to teach Tony to say anything, except in the sign language.

Tom Mix's reputation goes back to the earliest traditions of moving picture business. He was the original western star, and with every year his popularity and prestige increased. Strange to say, the three years of his absence from the screen have merely served to demonstrate that popularity. The avidity with which the theatres throughout the United States have demanded the Tom Mix pictures, delayed unfortunately by his operation, insures a wider appearance of "Destry Dides Again" than that of any other picture which will be shown this year.

For a time it looked as though Mix would never ride again. In that respect, the title of the picture upon which he was ready to go to work was prophetic. The studio had already chosen Max Brand's story, "Destry Rides Again" as the re-entry vehicle for the great western hero. In addition to the inevitable Tony, the cast includes Claudia Dell, beautiful Ziegfeld Follies girl, ZaSu Pitts, Earle Fox, Stanley Fields, Francis Ford, Frederick Howard, Edward Peale and George Ernest.

BEETS SHORT

MOSCOW, August 25—Prospects of the poorest sugar beet crop in years led the government today to order a general reduction in sugar and candy rations. Newspapers predicted an acute sugar shortage as prices soared. The poor crop was attributed to the ravages of insects and neglect by planters. One-third of the total acreage was estimated overrun with weeds.

—The many friends of Miss Sue Meadows are glad to see her back in Summerside. She has been spending the summer months at her home in Stewiacke, N.S.—S.

Mr. and Mrs. Monte MacIntyre have returned to Halifax after visiting Mr. MacIntyre's mother, 107 Weymouth Street.

Northern Wheat Crop

ROME, Aug. 26—(A.P.)—The International Institute of Agriculture estimated today that 1932 wheat production in the Northern Hemisphere, excluding Russia and China, will be 1,000,000 metric tons, under the 1931 production. Rye and barley crops are expected to exceed their 1931 totals greatly, and oats to a lesser degree.

The total old stocks of wheat in the world at the beginning of the current season and the wheat now harvested in the northern hemisphere, excluding Russia and China were estimated at about the same as they were at the beginning of last season.

The Institute announced that while precise information on the Russian crop is lacking, it seems likely that because of the smaller area of cultivation, unfavorable weather and other factors, the quantity of Russian wheat available for export will be less than last season.

Imported Salmon Must Undergo Inspection

(Canadian Press)

OTTAWA, Aug. 26.—All canned salmon imported into Canada in future must undergo an inspection similar to that now required in the case of salmon packed in British Columbia, and no import shipment may be released until it has been so inspected. This is the purport of an Order-in-Council passed this week. As all importations of canned salmon come from the Pacific side, the Order-in-Council also provides that all shipments "imported for sale in Canada shall enter through a British Columbia port only."

The inspection of imported salmon will be carried out by the permanent board of inspection in British Columbia, which was created by Order-in-Council on April 4 last.

The inspection requirements became effective on Tuesday last, but shipments in transit prior to that day are exempted.

CHANGES HIS SCHOLARSHIP TO ONE IN MUSIC

MONTREAL, Aug. 26.—(C.P.)—Gustave Longtin, young French-Canadian tenor who abandoned a scholarship in chemistry to study music, has returned to his native province for the summer. He will resume his musical studies in Paris in the Autumn. From the laboratory to the music hall, chance has led young Longtin in the last three years. Early in 1929 he went to Paris to study chemistry with a provincial scholarship from the University of Montreal. There he attracted the attention of Hon. Athanase David, provincial secretary, who while on a visit to France heard him sing and was moved by his beautiful tenor voice, to change his scholarship to one in music.

Longtin abandoned his test tubes for the studio. Continental impresaries have offered him contracts but the youthful French-Canadian remains at his studios. Out of a competition in Paris between 100 tenors he emerged second best. He has a voice of remarkable range and strength and the French-Canadian colony in Paris has been deeply impressed.

An Irish priest had been transferred from one parish to another. One of his old flock met one of the new.

"Well" he said, "and how do yez like Father Murphy, Dennis?"

"Ah, to be sure," answered Dennis, "he's a fine man; a fine man, but a troifle bellicose."

"Bellicose, is it? Well, if that isn't quare. When we had him he was as thin as a rake."

University Will Reopen

WINNIPEG, Aug 26—(By The Canadian Press)—Students at University of Manitoba are to pay from 40 to 75 per cent higher fees than a year ago, the staff is to accept 13 per cent salary reductions, but all departments of the institution will open as usual it developed today as auditors and university heads delved further into the tangled well of finances to determine to what extent endowment funds are depleted.

The board of governors added, in announcing increased tuition fees and pay cuts, that these were not made as a result of shortage of more than $1,500,000 in the university's endowment trust. Exact losses to the trust have not been ascertained, but it is known only about $100,000 of an original $1,600,000 fund remains.

No further charges were laid during the day against John A. Machray, K. C., chairman of the university board of governors and Bursar who yesterday was arrested and charged with theft of more than $47,000. But it was made known further charges will be laid in the next few days.

Arrest of the prominent lawyer-churchman has sent officials of the Church of England diocese of Rupert's land and of its college, St. John's, into a hurried search of financial records of these institutions. Machray, as chancellor for Rupert's land, was custodian of the funds.

Auditor's examination of the university trust has disclosed the Rockefeller fund of $550,000 donated in 1920 to the cause of medical education in Manitoba, has been virtually wiped out. Officers of the medical school denied reports, however, that because of the loss the department would not open this fall.

At least $30,000 of the money Machray is charged with stealing was a conversion from the Isbister trust fund. The balance is made up of small amounts from a number of other endowments and prize funds.

CANADIAN WOOL IS IDEAL MATERIAL FOR ALL SEASONS

Your average person during weather like this regards wool as something hot and scratchy but in this case as in many others your average person is apt to be inconsistent. He forgets about his golf outfit,—socks, knickers and sweater, all of the finest wool. He does know that somehow these clothes are coooler on a real summer's day than ordinary ones. He also forgets about his bathing suit, cool in the sun yet snug and comfortable even on those too rare occasions when he musters up courage for a pre-breakfast dip. And finally, he probably does not realize that when his wife wishes to keep early-delivered—ice cream firm until the first course of dinner is out of the way, she merely wraps the package in a woollen sweater, from which it comes out as hard as the moment it was frozen.

Woollen clothes to the human beings are the same as brick or stone to a house; good insulation against both heat and cold, rain and wind. Insulation is the essential purpose of clothes in this country, no matter what the original intention in the Garden of Eden. When one comes to think of it Wool is the most natural material in Canada, particularly when we insist on getting it from Canadian sheep, thus making doubly sure that it is as suitable as Nature can make it for the Canadian Climate. Incidentally you never see sheep mopping their brows when the thermometer approaches ninety even though the chap in straw hat, palm beach suit and silk socks may wonder whether he will ever be cool again.

A good many of us might profit from this hot weather tip offered by the Canadian sheep and with woollen materials coming in the sheerest fabrics and the widest possible range of colours we can change back to natural clothing without any sacrifice in softness or lightness.

Artificial lacquer articles require even more careful treatment than the genuine article if they are to remain in good condition. Trays and cakestands which are made of artificial lacquer should be cleaned each time they are used by sponging them with slightly warm water. Hot water should never be used on lacquer goods, genuine or imitation, or they will become dull and lose their original brilliance, and, additionally, will stain more easily. After drying the articles thoroughly, they should be sprinkled lightly with flour and polished briskly with a chamois leather, which will help to preserve the glossy finish.

PROV. EXHIBITION

(Continued from Page 1)

DAIRY EXHIBIT

Mr. F. T. Morrow, Dominion Dairy Grader who acted as Judge, stated that the quality of the highest scoring cheese was equal to what the Chief Grader termed "Finest western Ontario" and this quality of cheese sells for the highes t price in Canada and on the British market has a premium of 2 cents per lb above all other competitors.

The creamery butter having the highest scores would be suitable for the export trade, Mr. Morrow said. It is very mild and sweet in flavor with salt under 2 per cent with a close even texture and the proper finish.

The exhibits of home dairy butter was larger and of better quality than previous years. Some few exhibitors still make butter from sour cream, salted too heavy and very much underworked. A great improvement in quality could be made if exhibitors were familiar with the Dominion Grading standards.

Mr. Warren L. Brenton, Dairy Superintendent in charge of dairy exhibits at Provincial Exhibitions was pleased with the quality of entries shown in butter and cheese. The percentage of cheese factories showing was very creditable but only six creameries of the seventy now operating in the Province competed and it would surprise some of these who feel it is not worth the trouble to show just how unfavorable they may compare with the following prize winners of the exhibits.

Death Penalty For Speculation In Soviet Russia

MOSCOW, Aug. 26—Speculation in food or merchandise in the U. S. S. R. shall be punishable the "same as murder" during the next decade, according to a decree today.

The decree was handed down by the central executive committee of the Soviet Union and the Council of the People's Commissars. The purpose of the ruling is to drive out merchants buying food or merchandise for resale.

The recent authorization permitting peasants and artisans to sell their products in the open market, encouraging direct sales between producer and consumer, is viewed as a step in the campaign.

In spite of the authorization, however tradesmen throughout the union have been buying up goods for resale, and frequently acquiring stolen property for the same purpose.

A large number of executions of both men and women thieves have been carried out recently as part of the campaign to enforce respect for state-owned property.

Hutchinsons Held Up By Bad Weather

PORT MENIER, Anticosti Island, Que., Aug. 25—(By The Canadian Press)—The "Flying Hutchinsons," making an aerial trip from New York to Europe in easy stages, were held here today by adverse weather reports.

When conditions are improved they will hop in their giant amphibian to the Labrador coast, their next terminal, after which they are to fly to Greenland, Iceland, and the Faroe Islands and Norway. The Hutchinsons, who consist of father and mother and two children, with a pilot, navigator, a cameraman and a mechanic, a party of eight, after flying from New York, hopped off from Saint John for Anticosti yesterday. The object of their flight to prove that a trip between the United States and Europe can be carried out easily and successfully is carefully planned.

Little Wilfred had been absent from Sunday school and the teacher called to inquire why. "The real reason," said the boy's mother, "is because I fear he is learning things that only tend to make him mischievous."

"Mischievous!" exclaimed the astonished teacher. "Really I don't understand how Sunday school could have that effect on him."

"You see," explained the parent, "it's like this. The last time Wilfred went to Sunday school he came home convinced that people are made of dust, and found him trying to draw his little sister into the vacuum cleaner."

ORANGE PEKOE BLEND
"SALADA" TEA
"Fresh from the Gardens"

Lumber Industry Shows Activity

NORTH BAY, Ont., Aug. 26—Although operators are sounding a note of uncertainty at this time and two or three state that the outlook is far from bright, the consensus of opinion here is that 'the coming winter will bring helpful activity in the lumbering industry. Inquiries received by the local branch of the Ontario Government Employment service tend to the belief that operations in the woods during the winter months will show a big gain compared with the 1931-32 season.

Operations may be stepped up to 65 per cent of normal against 25 per cent last year, it is believed.

Anti - Japanese Boycott Cause Of Deep Concern

SHANGHAI, Aug. 26—(A.P.)—Progress of the anti-Japanese boycott movement is causing deep concern in both Chinese and foreign business circles who fear the present activities may bring conditions similar to those which preceeded the fighting here last January.

Merchants whose business already is at low ebb believe that a renewal of hostilities hereabouts would subject the commercial structure to strains it would be unable to withstand. But despite their attitude the anti-Japanese "blood and iron societies" continue threats and violence against merchants who handle Japanese goods.

As a result of these threats merchants have published statements in the newspapers asserting they are not handling anything Japanese, hoping thereby to escape the wrath of the agitators.

Mayor Wu Teh-Chen has received a protest from the Japanese Consul, and it was understood the Japanese also intend to inform the National Government at Nanking that Japan will hold it responsible for any breach of the peace in the event the Japanese should adopt counter measures.

The Mayor is known to feel that most of the agitators are irresponsible elements which the government is unable to control.

HEADS PROGRESSIVE CLUB

At a recent celebration held in Duluth, Minnesota, the Lakeview Community Club were complimented on all sides for their initiative in sponsoring the celebration. Mayor Snively, of the city, in expressing his satisfaction of the manner in which the club 'took hold,' said: "It shows that in the exercise of the right spirit we can move on and advance in our city's development, notwithstanding the existing conditions. Mr. Scott, Mr. Bostwick, Mr. Bush and others, members of the club, are entitled to the thanks of the people of Duluth for this splendid and successful celebration. The Mr. Scott referred to is Mr. Wm. A. Scott, a former Charlottetown boy, son of Mr. Wm. Scott, steward of the Car Ferry, and Mrs. Scott of this city.

UNTAXED GRAIN MUST SHIP FROM CANADA

MONTREAL, Aug. 26—To secure the benefit of six per cent new preference on wheat mentioned in the new empire agreement reached at Ottawa, it will be necessary to ship it from Canadian ports.

This important point is touched upon by J. H. Rainville, president of the Montreal board of harbor commissioners, in a statement issued today regarding the probable effects on harbor business of the agreement between Canada and the United Kingdom. He notes that in the past large quantities of Canadian wheat have been sent via United States ports, and he sees in the new clause a wonderful chance for shipment of grain from Montreal to leap ahead.

Strike Movement Spreads In Iowa

(Continued from Page 1)

spread to Shenandoah, Iowa, and Blair, Neb.; A threat of tightening the blockade at Spencer, Iowa, was made unless produce houses closed and plains were perfected to begin picketing on highways leading into Des Moines early tomorrow.

The 1,000 Northwest Iowa farmers who came here yesterday with the intention of storming the county jail if the prisoners were not released, boarded their trucks and headed homeward or to assist in strike activities at other points.

LIFE SENTENCE

(Continued from Page 1)

in Madrid. "Well," he said, when it had been accomplished. "that's over."

Apparently he was right, for those elements which had staged indignant demonstrations when Sanjurjo's sentence to death was commuted to life imprisonment caused no further trouble today.

The Government did not say what will be done with Sanjurjo's chief associates, General Herrana, who was sentenced to 30 years in prison, and Lieutenant Colonel Infantes, who will spend 12 years in jail.

Captain Justo Sanjurjo, the General's son, was acquitted but his property was confiscated, his stockbrokers license was cancelled, he was cashiered out of the army and he probably will be exiled.

HITLER

(Continued from Page 1)

ing the conversation. Meanwhile, the Government worked on a plan for nationalization of several key industries and further taxation of German capital to improve the country's economic position. Some leading bankers and industrialists were said to oppose the plan, details of which have not been disclosed.

The Chancellor is going up to Neudeck on Monday to see President Von Hindenburg. Presumably he will come back with a decree to dissolve the Reichstag if it should be necessary.

The Reichstag meets on Aug. 30 and up to now efforts of the opposition parties to form a united anti-government bloc have not succeeded.

All today the Cabinet worked on its economic programme, preparing for its announcement by the Chancellor on Sunday. They guarded their plans carefully. It seemed certain, however, that two powerful groups, the Industrialists and the Agrarian interests, were battling behind the scenes, mobilizing their lobbies to protect their interests.

160 NEW PLANTS START IN BRITAIN

LONDON, Eng., August 26—Since the beginning of this year 160 foreign firms have taken sites or factories and arranged to manufacture in England as a result of the tariff.

Many of these factories have been set up by German firms. Among the articles formerly imported from Germany now to be manufactured in England are leather goods in Hackney, E., cutlery in Hanwell, coal tar products in Hull. Czechoslovakian firms are going to manufacture shoes, glass and woodwork; American firms are going to manufacture toys in Dudley, Worcestershire, and electrical goods in the St. Pancras area of London.

ROYAL VASES STOLEN

LONDON, Eng., August 26—Two vases which ex-King Manuel of Portugal bequeathed to King George V. in appreciation of Manuel's friendship for the King were among the valuable objects of art stolen from Manuel's residence, Fulwell Park, in April, it was learned today.

Antiques, miniatures, and oil paintings valued at £3,000 were stolen from Fulwell Park. Despite a reward of £300 and widespread investigation by Scotland Yard, no trace of the missing objects has been found. Manuel died at his residence July 2, 1932.
