WHATEVER THE WEATHER Save 1 Shovelful in 5

Coal is scarce! Wasting fuel by overheating your house is unpatriotic. Health authorities state that moderate temperatures are better for the health. Wear warmer clothing. Avoid cold drafts from open doors and windows. Do everything you can to save fuel. Every kind of fuel is a vital war necessity. Without fuel, trains and ships cannot speed troops and material to the battle fronts. Munitions factories and shops cannot operate. There are fewer men to produce coal in the mines; fewer trucks and drivers to deliver it—that is why you must save all the fuel you can.

Co-operate with your fuel dealer. Order fuel as far ahead as you can. Be ready to take delivery when he can send it. Remove all obstructions to your coal window or chute. Think of all the other people who need coal too.
