**The Markets  
 At A Glance**

**WINNIPEG, June 16 (OP)—**Rye  
 futures prices closed at the max-  
 imum five-cent advance on the  
 Winnipeg Grain Exchange Satur-  
 day after a session which was fair-  
 ly active for the first half but  
 eased off once the limit was reach-  
 ed.  
 Buyers found offerings light but  
 trade was fairly active until the  
 five-cent advance had been posted.

**CHICAGO, June 16 (AP)—**Lim-  
 ited transaction of oats were made  
 at ceilings Saturday in a grain  
 market which was close to a "com-  
 plete standstill." Traders were  
 awaiting outcome of the O. P. A.  
 extension bill fight and it appear-  
 ed that turnover would set another  
 new all-time low. Offerings of ca.h  
 oats by the country were light,  
 purchases amounting to only 12,  
 000 bushels.

**NEW YORK, June 16 (AP)—**The  
 strength of rail stocks, which  
 touched their highest average level  
 in 15 years, highlighted the general  
 recovery of last week's market.  
 The carriers were in front of  
 other groups throughout most of  
 the five-day stretch and even  
 when they had to contend with  
 considerable profit cashing in the  
 final Friday, some were resistant.  
 In past months, while the indus-  
 trials, utilities and the market as  
 a whole had been posting new  
 highs, the transportation section  
 remained more or less indifferent.  
 It began to take heart, however,  
 when the railway strike ended  
 in May and prospects bright-  
 ened for rising traffic impetus to  
 offset mounting wages and other  
 costs.

**JELLY FROSTING**

2/3 cup tart jelly  
 Pinch of salt  
 1 egg white, unbeaten  
 Put drops lemon juice  
 Put the jelly, egg white and salt  
 in the top of a double boiler over  
 gently boiling water. Beat with a  
 rotary beater until free lumps.  
 Remove from the heat and beat  
 until the mixture will stand in  
 peaks. Add the lemon juice. This  
 frosting is best eaten the day it is  
 made. Currant or grape jelly is a  
 good choice. If apple is used in-  
 crease the amount of lemon juice  
 to make it more tart.

**Teachers Wanted**

Principal for Borden School,  
 Supplement ..... \$325.00  
 Vice Principal, Sup. .... \$200.00  
 Intermediate Department  
 Supp. .... \$175.00

 & SON**  
 Southampton,  
 Nova Scotia

**Growing Shortage  
 Flat-Rolled Steel**

**CLEVELAND, June 16 (AP)—**A  
 growing shortage of flat-rolled  
 steel products has resulted in a  
 rush to complete new steel mills  
 in Pittsburgh, Chicago, Cleveland,  
 Detroit and the East, says the  
 magazine Steel.  
 By the end of the year 1,118,000  
 tons of new capacity will have been  
 installed to take care of this class  
 of products, "which includes materi-  
 als used in automobile bodies, tin  
 cans, refrigerator and range cab-  
 inets," and other everyday neces-  
 sities, it said.  
 Price revisions based on the \$5  
 per ton overall steel price increase  
 of last March are believed com-  
 pleted, said the publication.  
 "Upward progress in steelmaking,  
 a rebound from the low point  
 reached during the coal strike,  
 continues rapid." Steel reported,  
 and at 75 per cent of rated capac-  
 ity by 20 points last week, the  
 ingot production rate is "well on  
 the road to reaching the 89-1-2 per  
 cent that followed recovery from  
 the steel strike."

**PREPARING FRESH  
 COCONUT**

Drain milk from coconut. Break  
 coconut into several pieces. Place  
 pieces in a warming oven and al-  
 low to remain until meat begins to  
 separate from shell—3 to 4 hours.  
 Slip meat from shell with sharp  
 knife. Peel off outer brown skin.  
 Shred coconut, place on cookie  
 sheet to dry. This may be done  
 either in the warming oven or in  
 sunshine.  
 If coconut is desired sweeter,  
 sprinkle granulated sugar on  
 freshly-shredded coconut before  
 drying.

**LICHENS GIVE LIFE  
 EVEN IN SUB-ZERO  
 WEATHER**

How do the reindeer, lemmings,  
 and other cold climate animals of  
 the semi-polar wilderness in Can-  
 ada and other northern lands,  
 manage to survive the incredibly  
 cold temperatures—what do they  
 feed to eat?  
 They survive and flourish be-  
 cause lichens, the pioneers plants  
 of all land-grown vegetation, can  
 withstand the bitterest sub-zero  
 drop in temperature. One species,  
 reindeer moss, is the chief item in  
 the winter food of such animals.  
 Without it, animal life in the sub-  
 Arctic zone could not remain alive  
 a single winter.

**Respiratory Diseases**  
 Warning to workers in industry  
 to guard against lung irritants at  
 work is issued by the Industrial  
 Hygiene Division of the Dominion  
 government. Those whose work ex-  
 poses them to such potential haz-  
 ards as dust, fumes, and particles,  
 etc. are advised to adhere closely  
 to plant rules regarding "good  
 housekeeping," and to use all the  
 protective devices provided for em-  
 ployee protection. Thus they will  
 avoid chronic irritation of the air  
 passages, which may develop into  
 something more serious.

**Heat Cramps**  
 Onset of warmer weather has  
 led the Industrial Hygiene Divi-  
 sion of the Department of National  
 Health and Welfare, Ottawa, to re-  
 mind workers in plants where high  
 temperatures prevail, that they  
 should take positive steps to off-  
 set heat cramps. Men and women  
 employed in such places as boiler  
 and engine rooms, foundries, steel  
 mills and laundries are advised by  
 the industrial hygiene experts to  
 take salt in tablet form, or in  
 drinking water, to avoid disabling  
 heat cramps this summer.

**Setting Up**  
 That suggestion "Get out of bed  
 on the right side," isn't just funny,  
 say Ottawa health authorities. The  
 Physical Fitness Division of the  
 Department of National Health  
 and Welfare points out that the  
 start of a day is all-important.  
 They suggest that those who would  
 conserve an build up health sac-  
 rifice a few minutes in bed to get  
 up and "set up." "Open the win-  
 dow wide" they say, "inhale deep-  
 ly, and then start out to meet life  
 with a smile by walking to work."
