War Garden Bulletin
Practical Daily Guide for Vacant Lot and Backyard Gardeners Enlisted in Greater Production Campaign

Issued by the Canada Food Board in collaboration with experts on the staff of the Dominion Experimental Farm

RECORD AND LABELS

Keep a war garden this year. Canada wants to know exactly how much she manages to produce through the medium of vacant lots and backyards. The Canada Food Board is asking the residents of all Rotary Clubs and gardening organizations to keep a complete record of their returns. It is estimated that \$30,000,000 worth of produce was added to the country's food supply last year through the war gardens. This year it is anticipated that the yield will be doubled. Help the Food Board to make sure of this by keeping a record of what you grow.

Where labels are used in the war garden a good plan for saving the little wooden stakes is to soak them for a whole day in a solution of copperas (sulphate of iron). Then let the wood dry out and finally place it in lime water for twenty-four hours. The outcome of this treatment is the formation in the wood of sulphate of lime (gypsum), a salt that is highly insoluble. This impregnates the wood to such an extent that the rapid destruction of the labels is impossible. Thin wood treated in this manner has been fully exposed to the weather for two years without showing the least change.

DISCRIMINATING DRUG BUYERS HAVE THE HAPPY HABIT OF COMING BACK TO OUR STORE

We have always catered to careful drug buyers—customers who bring all of their judgments to bear in every purchase. Such buyers come regularly to our store because they have learned that they can count on us for pure drugs, prompt service, and right prices. The extent and quality of our trade and the obvious confidence reposed in us by the public is pretty convincing evidence that we conduct our drug business in a satisfactory manner.

We're In Business For Your Health.

The Family Cream Separator

Have you seen the New Sharples? The entire family will be delighted with this wonderful invention which we have received from the "world's largest separator factory." Your girl may turn slowly and make the work very easy. Your boy can readily fill the large low supply can.

THE NEW SHARPLES SUCTION-FEED separator skims clean at any speed. Capacity increases as you turn faster so you can finish the job sooner when in a hurry. Deliver cream of the exact thickness desired no matter what the speed. No other separator has these important advantages.

The simple tubular bowl is a favorite with the women folk—it's so easy to clean. There are only three pieces—no discs to wash. The Suction-feed Separator has many other new and exclusive features.

Bring in the whole family and let us show you just how it works. You'll all be interested and we'll be glad to see you.

of
ENO'S FRUIT SALT

YES, and that spoonful of Eno's taken in a glass of water before breakfast is responsible for many a man's clear-thinking and business efficiency.

For you can't have clear-thinking with a bad stomach and sluggish liver.

If men of active minds were as active with their bodies, the chances are that they would not suffer from biliousness, sour stomach, constipation and kindred disorders. It is to such men that Eno's Fruit Salt proves its value as a gentle, safe and unfailing regulator of the digestive and eliminative system.

Being a natural aperient—that is, composed of all cleansing and tonic elements of ripe fruit juices—it performs its work in a normal way without irritation or harmful reaction. It clears the intestines, rouses the torpid liver to activity and produces a delightful feeling of liveliness and vigor that can only arise from a sound, active physical condition.
