Shoes For Britain Campaign Opening

Colonel Frost, Overseas Commissioner for the Red Cross, states that shoes are among the most urgent needs for the children of Britain this coming winter.

The following is an excerpt from his letter to the Canadian Red Cross Society, National Office, Toronto:—

"There is a very great shortage of all children's shoes here, and to make matters worse there is a great difficulty in getting repairs carried out under a month or six weeks. The suggestion was put forward that you might be able to collect shoes children had grown out of, or which were not in very bad repair, suitable for children from 2 to 14 years of age, and get these shoes repaired in Canada before sending them over here."

Miss Browne, National Director of Junior Red Cross, has suggested that members of the Junior Red Cross be asked to bring in on the opening day of school in September a pair or pairs of children's shoes, repaired where necessary.

Shoes should not be new as clothing coupons would have to be surrendered for them. Also shoes must be in perfect condition or be repaired before they can be sent.

Mrs. MacCallum, Provincial Director of Junor Red Cross, is issuing instructions to all Junior Red Cross branches in Prince Edward Island so that all shoes which are sent to Red Cross Office, 62 Prince Street, should be properly repaired, otherwise they cannot be shipped overseas.

In Memoriam

In loving memory of my dear wife Mrs. John H. Colwill, who passed away August 27th, 1945.

August comes with deep regret
A month, I never will forget
With tears in my eyes and a broken heart
I stood that morning and saw her depart.
A beautiful life has come to an end
A devoted wife, and my best friend.
She was dearer to me than words can tell
The wife I lost and loved so well.

Inserted by Husband.

FRUIT STAINS CAN BE ERASED

Most fruit stains may be removed when they are fresh by pouring on boiling water. But there are exceptions to this general rule, says Margaret Furry, textile chemist of the United States Department of Agriculture.

The exceptions are fresh peach, pear, cherry or plum stains which contain enough tannin to be darkened and set by heat. In stains made by these four fruits use cool water and glycerine or a soapless shampoo. (Never use soap because it sets the stain). First sponge the stain with cool water. Then work a little glycerine or soapless shampoo into the stain, rubbing lightly between the hands. Let stand several hours then apply a few drops of vinegar and allow to remain a minute or two before rinsing thoroughly with water.

This same method is recommended for fruit stains on wool or silk. On these fabrics boiling water should never be used because, it may injure the fabric. Cool water and glycerine are also recommended for stains made by tomato juice and catsup.
