Dollar harvest...

A MAN with ideas often needs more than his own brains and hands to prosper from his enterprise. Often he needs money...

Such a man is the "primary producer"—the farmer, fisherman, pulpwood contractor, miner.

When he needs a bank loan to help him put his ideas to work, he is free to shop around among Canada's ten chartered banks for the best deal he can get.

That's why primary producers—like most people—intend to keep banking competitive.

It means a better deal, freedom from red tape, loans made on merit, not on politics... and it means respect for privacy in money matters.

Canada's primary producers have good reason to demand the privacy of their banking.

One letter simply stands for another. In this example A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.
