SEAL BRAND COFFEE

Irresistible!

In 1/2, 1 and 2 pound cans. Whole—ground—pulverized—also Fine Ground for Percolators.

CHASE & SANBORN, MONTREAL.

PERSONALS

Mr. Reginald Jenkins, Vice-Principal Ugg High School came to the city Saturday.

Miss Evelyn Rackham, Wheatley River, and Miss Emma Lang, Oyster Bed Bridge, were in the city Saturday.

Mr. Cecil Devereaux, Prince of Wales College, is spending the week-end in Cornwall, P. E. I.

Mr. Harold Hynes, Prince of Wales College, is spending Thanksgiving Day fishing in Scotchfort, P. E. I.

Mr. Daniel J. Shaw, teacher at Cherry Hill, is spending his holidays at his home in Ugg.

Mr. J. J. Stewart, merchant, at Woods Island, was a passenger by the Murray Harbor Express Saturday morning.

Mr. Malcolm McQueen, Barrister, Winnipeg, is spending a short vacation with his parents, John M. and Mrs. McQueen, Orwell.

Mr. Scaples McDonald, Prince of Wales College, is spending Thanksgiving Day at Oyster Bed Bridge, P. E. I.

Mr. Leo McDonald, Prince of Wales College, is spending a well-earned vacation visiting friends in Norway, P. E. I.

Mr. F. E. Greany, the well-known commercial man, of St. John, N. B., is in the city in the interests of his firm.

Miss Winnie Acorn of Village Green and the Misses Jessie and Mamie Nicholson of Vernon River left Saturday morning for Boston where they will spend the winter.

FOR THE HOUSEKEEPER.

When washing real lace, let the final rinsing be in skim milk, if you would give it a soft, creamy tone.

When a ribbon is wrinkled, dampen the wrinkled spot and wrap around a clean, lighted electric bulb.

Iron garments which have buttons by laying them face down on a tickly folded sheet or Turkish towel.

Meat hashes may be sked out if garnished freely with toast sippets, boiled macaroni, rice or butter beans.

Do not use the best cuts of meat for steaks and hashes. Shin of beef and neck of mutton are the best for these.

It helps greatly on ironing day to have two or three sizes of irons, including a tiny one to get into the corners.

To make a faded dress white, boil it in two gallons of water in which a halfcupful of tartar is dissolved.

PROGRESS.

Association in equality is the law of progress.—Henry George.

BOSTON WON SECOND GAME IN WORLD SERIES

(Special to the Guardian.) ST. JOHN, Oct. 10.—Boston won the second game of the World's Series, Saturday, beating Philadelphia 2 to 1.

HORSE RACES TO-DAY IN AID OF REGIMENTAL FUND

Weather permitting a good afternoon's horse racing will take place to-day in aid of the regimental fund. Some of the best trotters and pacers will participate, and although the weather for the past few days has been very rainy, the track is in splendid condition and fast time will surely be made. There will be three classes and the horses in each very evenly matched. The Eighty-Second band will be in attendance, and the gates will be run by members of the militia under training. It is to be hoped that all that can possibly attend will do so and help the worthy cause the races are being held for.

The officials will be: Starter, Mr. P. S. Brown; Judges, Messrs. J. C. Crabbe and F. W. Hughes; timers, Dr. J. M. Nicholson and Mr. P. A. McMahon.

Following are the entries: FREE-FOR-ALL

Dixie Girl, 2.24 1/2, J. A. Henderson, Princess Etta, 2.15 1/4, T. C. Edgett, Dr. Sharper, 2.18 1/2, Capt. McKinnon, Miss Alcione, 2.18 1/2, J. S. Wedlock, Hilda S., 2.16, A. A. Stewart.

2.30 TROT.

Jellicoe, H. Kelly, Cap. Crescous, H. Horne, Buster, J. Mahar, Brenton H., H. Hooper.

2.40 PACE. Casey Crescous, P. Conroy, Belmont Miller, C. Blanchard, Barney Mac, R. McNeill, Baby Don, Geo. Buntain, Derby, J. S. Wedlock.

The races will start promptly at 2 p.m. Admission only 25c.

FREAKISH NAMES GIVEN TO BABIES.

"Lustania Koppelwaite" is the name of a healthy baby girl that has just been christened in England. Lustania's father, according to the information, is a seaman who, at the beginning of the war, belonged to the crew of one of the fishing trawlers which were torpedoed by a U-boat. He wanted to give his child an appropriate name of his ship, and called her "The Three Sisters of Yarmouth." So the child was called "Lustania."

Hundreds of children have received names derived from popular war heroes; not only in England, but in Canada. Names such as "Kitchener," "French," "Joffre," "Louvain," "Mons Marne," etc., are quite common. But there are others more freakish than that.

For instance, "Shrapnel," Shrapnel is the name of a Calgary private who was badly wounded in the second battle of Ypres. The full name of the Calgary child is Shrapnel Ypres Jenkins—S. Y. Jenkins, for short.

Twins in Manchester have been given the names of "Reginald Ally" Monaghan and "William Ally" Monaghan respectively. The Entente Cordiale is likely to remain firm between them.

"Trench" Anderson is a son of a soldier. Trench's father lived in a trench for months.

Gin Pills FOR THE KIDNEYS Why They're Bought

"I can certainly say the Gin Pills have done a lot of good for me."

Some four years ago I could not walk up stairs, my feet and ankles were so swollen, but I took three boxes of Gin Pills and the trouble has never returned. My mother, 82 years of age, is taking them and feels fine.

MRS. J. B. SALSBUARY, Camden East.

GIN PILLS are 50c. a box, or 6 boxes for \$2.50 at all druggists. Sample sent free if requested.

National Drug & Chemical Co. of Canada, Limited, Toronto.

A CHILD'S TONGUE SHOWS IF LIVER OR BOWELS ARE ACTIVE

IF CROSS, FEVERISH, SICK, BILIOUS, GIVE FRUIT LAXATIVE AT ONCE.

Every mother realizes after giving her children "California Syrup of Figs," that this is their ideal laxative, because they love its pleasant taste and it thoroughly cleanses the tender little stomach, liver and bowels without griping.

When cross, irritable, feverish or breathless, stomach sour, look at the tongue. Mother! It coated, give a teaspoonful of this harmless "fruit laxative," and in a few hours all the foul, constipated waste, sour bile and undigested food passes out of the bowels, and you have a well, playful child again. When its little system is full of cold, throat sore, has stomach-ache, diarrhoea, indigestion, colic—remember, a good "inside cleansing" should always be the first treatment given.

Millions of mothers keep "California Syrup of Figs" handy; they know its great value. It saves a sick child tomorrow. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has directions for babies, children of all ages and grown-ups printed on the bottle. Beware of counterfeit sold here, so buy only the genuine. Get the genuine, made by "California Fig Syrup Company."

"Coat Sweaters at Patons from \$1.25 to \$10.00. 3331.

ANOTHER FLORENCE NIGHTINGALE

A letter from its London correspondent in the Journal of the American Medical Association describes the horrid condition of the Serbian population. Typhus and typhoid fever are spreading rapidly, being brought home by soldiers and civilian emigrants; so that "the country has become a seething mass of misery and pestilence." The number of patients far exceeded the hospital accommodations. In Kraguyatz, for instance, which is a town of 20,000 inhabitants, 3,400 died from typhus fever in three months. No medical services adequate to the conditions existed. "Physicians, nurses and others bravely volunteered from Britain, France and America, and many of them succumbed to typhus."

The work done by these devoted helpers is beyond all praise. And all these discouraging conditions there appeared a lone English woman, Mrs. Hardy, who, like her countrywoman, Florence Nightingale, brought order out of chaos, taking charge alone and rapidly organized a hospital of about 500 patients. Organized the help of one woman, a Serbian physician, she turned this lazar into "a marvel of order and cleanliness."

Again, says the New York Sun, is demonstrated the heroic efficiency of woman in her own sphere. Administration to the helpless, the sick, the weary in peace and war. It has been said that Florence Nightingale is the only woman in the world's history who has alone and unaided organized a great movement, or has reached a place of great eminence in the field of civilization. All other excellent achievements of women even in their distinctly feminine sphere, were initiated by men; for example, higher education of women by Richard Mulcaster in 1581, and welfare work by Edgar Murphy.

That enormous possibilities are in store for women as specialists in their own sphere is beyond confutation, and is evidenced by the heroic and efficient work of the English woman who in the throes of despair to deeds of marvellous efficiency.

LUNG TROUBLE

Was never cured by dosing the stomach. The two organs are not connected. If they were, food swallowed would choke you. For lung and bronchial troubles you must breathe the cure; and you can't breathe cough syrups, tonics and syrup compounds. Peps provide the rational treatment for coughs, colds, bronchitis and lung troubles. Peps are tablets made up of Pine extracts and medicinal essences, which when put into the mouth turn into healing vapors. These are breathed down direct to the lungs, throat and bronchial tubes—not swallowed down to the stomach, which is not ailing.

On the face of it, now, does this not sound more reasonable than drugging the stomach? Try one box of Peps. A trial will cost you only 50c., and the good you will reap—well, health cannot be expressed in money terms. Be sure of the article when ordering from druggist or store. Just four letters

During the trial of a case in a Philadelphia court it became necessary to take the testimony of a curiously reserved witness. "What do you do?" asked the lawyer having him under examination. "I do very well," was the unexpected answer.

"I am not asking as to your health, I want to know what you do?" "I work." "Where do you work?" "In a factory." "What kind of a factory?" "It is rather a large factory." "May I venture to inquire what you make in the factory?" "Precisely. Answer without further circumlocution. Tell us what you do." "I make \$10 a week."

AN OLD WITNESS.

SIEGE BATTERY NO. 2 IN CHURCH PARADE

(Continued from page one)

facing one of the greatest issues that the world has ever faced. On us depends the welfare of our Empire numbering 400 millions of human beings. The lamentable fact that we should have been found totally unprepared for such a war as this a year ago has worked a revelation. Britain's "contemptible little army" had all ways been a little one because of Britain's faith in people who were utterly unworthy of her faith. They could point across to the Hague where peace tribunals had for years seen Germany take a foremost place in the nations pleading for peace. There was no treachery in mind, no duplicity in character, no hidden preparation for war in Britain. It was because Britain was honourable, and is honourable, that this war finds her unprepared. The history of Britain has always proved that her hour of trial has been a hour of strength. Her men have placed themselves upon the altar of their country.

The King's business requires efficiency and self-control. Is it not a fact that in the greater part of life his soul is the ultimate measure of the man. The great fact represented by the men before me this morning is that efficiency and self-control are two of the great things that are required. One failing in crucial moment may mean disaster to a whole regiment. If we were to be great, if we were to have strength, we must gather self-control, and this breathes in our heart the element of patience.

We are facing great issues to-day. We are in an epoch-making period. This great nation of Canada is a large and glorious part of the British Empire. It is a strong and manly part, and it desires that its record shall make it stand through immortality. They were going forth to aid lustre do great things. We are not sending you forth with anything that will bring heaviness to your hearts. You men are strong men, boldly facing the issues of life, with great things to do, and by the strength that Christ will give you, you will do them. Their friend the Lord Jesus Christ would stand by them in the trenches and in the battle smoke. There was no power to breed decision and resourcefulness and faithfulness in the heart of man like association with the Son of God. He might speak of Sir Henry Gordon, and of many another noble warrior who had found their strength in their companionship with Jesus Christ.

The King's business required a man. The best man this world ever knew was the Man of Nazareth. Let Him be the Captain of our salvation. He would breathe on them the best of gifts.

Speaking for the Church, Mr. Fulton said: We appreciate your going forth to do great things, and we appreciate the effort, the effort of our Canadian is glorious—there is no question concerning that. The reputation of our Canadian is glorious. We send you forth this morning with all the signs of courage and hope. Whisper this message in the loftiest of men, go forth to play the part that God supplies in His eternal Son.

SHE FOUND THEM

A gentleman holidaying in the Highlands was engaged one night in writing a letter in a humble abode where he had obtained accommodation. The guttering candles annoyed him, and he called out, Mrs. McPherson, can you get me a pair of snuffers? A pair of snuffers? repeated Mrs. McPherson, somewhat bewildered. Well, I'll do my best. In a few minutes there was a commotion outside. Two stalwart figures shuffled in, followed by Mrs. McPherson. This is Donald McDougall, she said, and this is Donald McDougall. I dinna ken what ye want wi' them, but I'm thinkin' the two o' them tak' mair snuff than anyither two in the parish, Scottish American.

THIS CHILD (BADLY BURNED) WAS SAVED BY ZAM-BUK

(Continued from page one)

Mrs. A. Bruhm lives at Northfield, N.S., and her little daughter, while playing at a bon-fire, was set ablaze. She was burned so seriously that her life was despaired of. Zam-Buk was applied to the burns, and not only did it give relief, but it healed the burns and saved the child's life. "You may rest assured," writes the grateful mother, "that our home will never be without Zam-Buk!"

You need no harrowing details, no high-flown language to gather this lesson:—For burns—sustained while ironing, opening the oven door, striking a match, handling a stove lid—just as soon as you are sustained put on Zam-Buk. In from ten to thirty minutes, according to the severity of the burn, you will have ease!

Just as good for scalds, cuts, etc., and a positive specific for eczema, skin diseases and for piles, 50 cents, all druggists and stores, or post free for price from Zam-Buk Co., Toronto. Why not try it?

SEPTEMBER CROP REPORT

Published by THE DEPARTMENT OF AGRICULTURE OF PRINCE EDWARD ISLAND

October 5th, 1915

The Weather—Excepting three days when the temperature reached 80 and 82 degrees, the weather of August was only moderately warm, with a few comparatively cool days and nights. The mean temperature was 64.3, the precipitation 2.24, fairly evenly distributed throughout the month and hours of sunshine 130. The first three weeks of September were pleasant and moderately warm. Since the 24th it has been cold, wet and stormy. On the 27th there was a very heavy storm of rain and wind accompanied by a very high tide. The mean temperature for the month was 57.9, precipitation 3.08 inches, and hours of sunshine 169. On the whole the weather has only been fairly favorable for the saving of the harvest, which was nearly completed at the end of the month.

Hay—The hay crop is above average, and most of it was saved in good condition. Haymaking was completed about August 20th.

Wheat—The wheat crop is not uniform throughout the Province. In some districts of Prince County it was injured by the cold, wet spring weather, and later by the September storms; but in Queens and King's Counties it is much above average. A little damage was done by joint worm, weevil, rust and smut. In most districts, however, the growth of straw was abundant and the heads well filled. On the whole the crop will be above the average.

Oats—The oat crop is not up to average. It is thin in stand and short in straw. The late sown gave the best promise, but was damaged by the wind and rain storms of the latter part of September.

Barley—The crop of barley will be about average. In Prince County much was sown than usual on account of the wet spring, but as the season proved wet throughout it did not do so well. In Queen's and King's Counties the growth of straw was short, but the heads filled exceptionally well.

Corn—Very little corn was sown, and most of it was pretty nearly a failure, on account of unfavorable weather conditions.

Peas—Peas are grown only in mixed feed. The early sown made abundant growth and seeded heavily.

Potatoes—The potato crop is not nearly as good as usual. A large number of correspondents report bad mis- and early frosts did damage in quite a number of localities. The Potato Beetle, too, was troublesome, and blight is reported in several sections. Some of the turnip crop is not un- fortunate for development. While a large number report the turnip crop as excellent, a nearly equal large number say it is very poor. Fifteen correspondents from Queen's County alone report injury from Club Root. The soft turnips are in general of very poor quality. In Prince County much seeding was done in July.

Fruit—The apple crop is a failure, and the plum crop not much better. There was plenty of bloom, but the set was short and the season unfavorable for development. Pastures—The pastures are good. The rain at the close of haymaking brought on the aftergrass, and frequent showers have kept it growing since.

Dairy—The milk supply is holding up well this autumn, due to the good pastures and to the high prices of cheese and butter, which are leading to better care being taken of the cattle. On the whole there will likely be a larger output from the factories and creameries.

Live Stock—Horses are very plentiful, but prices are low and there is not much prospect of improvement in the market. Cattle are scarce and prices are higher than ever before. There are a lot of inquiries for fresh calved milk cows. Cattle in general are in good condition. The demand for lambs is good, and the usual number are being marketed. Correspondents report an increase in the number of sheep being kept. Hogs are being marketed in larger numbers this year than last. They are being well fitted. The prospect for an abundance of fall and winter feed is good. Straw will not be quite as plentiful as last year, but there will be no scarcity.

Eggs—The egg supply has fallen off heavily the last three weeks, and is likely to go still lower. The high price of eggs and the low price of grain is, however, inducing the better feeding of poultry, and an increase may be looked for before long. The supply at the present time is about equal to the supply at the same time last year.

Crop—Crop conditions; 100 represents average:—

	Hay	Wheat	Oats	Barley	Peas	Corn	Potatoes	Roots
