

THE MARKETS

(Continued from page 3.)

15c. per lb., and mediums, 17c., while bacon was 19c. per lb., and up to 21c. for best. Eggs.—The milder weather, and the offerings of American fresh eggs, have conspired to put down the price, and as a result purchases could be made at 34c. to 36c. per dozen, for really fresh-laid stock. Dealers could not get more than 22c. to 25c. for the select held stock, and 20c. to 21c. for No. 1, while second grades would sell at 15c. to 17c. Butter.—Market quite interesting, owing to receipts here from New Zealand. However, the imports are said not to be for local consumers, but for the West. In any case, they have affected the price of butter locally, and purchases could be made at 29c. to 30c. for the best stock. Fresh makes were not in favor, and could be had at 25c. to 26c., and dairy butter at about 23c. to 24c. per lb. Hides.—Market very dull and steady. Beef hides, 12 1/2c. and 14c. per lb. for Nos. 3, 2 and 1; calf skins, 14c. and 16c. for Nos. 1 and 2, and sheepskins, \$1 to \$1.10 each. Horse hides, \$1.75 and \$2.50.

HALLAM'S WEEKLY MARKET REPORT. HIDES, SKINS, WOOL, JUNK.

TORONTO, Feb. 15.—Beefhides are somewhat easier since our last report, more good being offered and the tanners are looking for lower prices. City Butcher Hides green, flat 13c per lb. Inspected Hides No. 1 13 1/2c, No. 2 12 1/2c, No. 3 11 1/2c, Country Hides flat cured 13 1/2c to 14c, part cured 12 1/2 to 13 1/2c, Green 12 to 12 1/2c. Calfskins are easier, the light skins are in poor demand. City skins green flat 15c; Country, green flat 15c, Part cured 16c. Cured 17c. Horse hides, hold their own stocks moving as fast as they arrive. City take off \$3.50 to \$4.00. Country take off—No. 1, \$3.50 to \$4.00, No. 2—\$2.50 to \$3.50. Sheepskins unchanged at previous quotations. City take off according to size \$1.00 to \$1.50. Country 75c to \$1.50. Wool unchanged, demand absorbing the supply. Washed combing fleece 22c to 23c, combing fleece 25 to 26c, rejects 17 to 18c, unwashed fleece clothing 13 1/2 to 14c, clothing 15 1/2 to 16 1/2.

TALLOW good grades in demand, off colored or No. 2 a drug on the market. City rendered, solid in barrels, 6 1/2 to 6 3/4; country stock, solid in barrels, No. 1, 6 1/2 to 6 3/4; No. 2, 5 to 6c; Cake No. 1, 7 to 7 1/4; No. 2, 6 to 6 1/2. Horse hair, Farmer or pedlar stock firmer with slight increase in price. Farmer or pedlar stock 38 to 40c. Old rubbers, etc., are in moderate demand, deliveries about sufficient to supply present demands at unchanged prices. Boots and shoes 6 to 8 1/2c. Auto tires, 6 to 8c. Bicycle tires, 5 1/2 to 6 1/2c. Lead heavy 3 1/2 to 4c. Tea lead 3 to 3 1/2c. Brass Heavy 9 to 10c. Light 7 to 8c. Copper heavy 10 to 11c. Light 7 to 9c. Zinc, 2 1/2 to 4c.

RAW FURS.

Muskrats are accumulating in all the large fur centres and are moving very slowly at easier prices. Skunk are easier. Dealers have made their shipments to the March London Sales and are waiting to learn the results of their shipments. Owing to the mild weather and advancing season Mink and Skunk are fading and the market is a little easier on this article. N. S. N. B., Lab. Newfld. Mink—No. 1, 11.00-4.00. No. 2, 6.00-3.00. No. 3, 1.75-1.25. No. 4, .50-.25. Red Fox—No. 1, 10.50-4.00. No. 2, 6.00-3.00. No. 3, 2.50-1.50. No. 4, 1.00-.25. Muskrats—N. S. P. E. I. N. B. Winter .85-.35, Fall .70-.25. Kitts 15-.08. Wolf—No. 1, 7.00-3.00. No. 2, 3.25-2.25. No. 3, 1.50-1.00. No. 4, .75-.50. Skunk—No. 1, 4.35. No. 2, 3.10. Raccoon Dark 6.00-2.50. Lynx 27.50-1.00. Bear 27.50-50. Silver Fox 1000. 00-100.00. Cross Rex 75.00-7.50. Otter N. S. N. B., Que.—35.00-5.00. Beaver Castora, 13.00-9.00. Blue Pelts or Unrimo skins are always figured at value.

Your Hair Needs Parisian Sage

Use It As a Dressing—Banish Dandruff—Stop Falling Hair and Scalp Itch. PARISIAN Sage, the delightful and invigorating hair tonic, is a true hair nourisher. It penetrates into the scalp, gets to the roots of the hair, kills the dandruff germs, and supplies the hair with just the kind of nourishment it needs to make it grow abundantly. Since its introduction into Canada PARISIAN Sage has had an immense sale, and here are the reasons: It does not contain poisonous sugar of lead, nitrate of silver or sulphur or any injurious ingredient. It cures dandruff in two weeks, by killing the dandruff germ. It stops falling hair. It promptly stops itching of the scalp. It makes the hair soft, glossy and luxuriant. It gives life and beauty to the hair. It is the daintiest perfumed hair tonic made. It is not sticky or greasy. It is the best, the most pleasant and invigorating hair dressing made. Made only in Canada by The R. T. Booth Co., Ltd., Fort Erie, Ont. The price is only 50 cents at drug stores and counters where toilet goods are sold. Geo. H. Hughes guarantees it.

BUFFALO.

Cattle.—Prime steers, \$8.25 to \$8.50; butchers', \$5.75 to \$6; bulls, \$5 to \$6.75; stock heifers, \$4 to \$4.50; shipping, \$7.25 to \$8; heifers, \$4.75 to \$7.50; cows, \$3.25 to \$6.75; stockers and feeders, \$4.50 to \$6.50. Hogs.—Heavy, \$8 to \$8.20; mixed, \$8.20 to \$8.30; Yorkers and pigs, \$8.25 to \$8.35; roughs, \$7.20 to \$7.30. Sheep and Lambs.—Lambs, \$6 to \$9.40; yearlings, \$5 to \$8.50; wethers, \$5.75 to \$6.35; ewes, \$3.50 to \$5.50. Sheep—Mixed, \$5.50 to \$5.75.

CHICAGO.

Cattle.—Beeves, \$6.50 to \$8.90; Texas steers, \$4.90 to \$5.70; stockers and feeders, \$4.75 to \$7.60; cows and heifers, \$3 to \$7.40; calves, \$6.50 to \$10.25. Hogs.—Light, \$7.85 to \$8.15; mixed, \$7.30 to \$8.15; heavy, \$7.65 to \$8.21; rough, \$7.65 to \$7.80; pigs, \$6.65 to \$7.90. Sheep and Lambs.—Sheep, native, \$4.85 to \$6.15; yearlings, \$6.50 to \$7.90. Lambs, native, \$6.30 to \$9.

THE TURF

HORSE NOTES.

The next excitement on the ice will be the "Hotel Victoria Ice Races." These are made possible through the generosity of R. H. Sterns, proprietor of that splendid hostelry the Hotel Victoria. The classes are 2.19 pace and trot and 2.35 trot and pace. There must be five entries in each class and 5 per cent must accompany each entry and 5 per cent additional will be deducted from money winners. The purses are \$100 each. As soon as the Hotel Victoria races are disposed of the "Hotel Purse" of \$100 will be raced for in a 2.24 class trot. P. S. Brown, the general proprietor of the Revere, deserves great credit for so liberally encouraging sport.

Present indications are that quite a few out of town horses will compete in the ice races of next week. We assure them that they will meet with a hearty welcome and a fair deal from the City boys.

Dr. J. A. Johnston, the owner of Baby Logan 2.18 1/2, was in Charlottetown Monday. The doctor takes a great interest in horses and is one of the Island's greatest authorities on the horse.

Will Irving of Cape Traverse spent a couple of days in the City recently. "Will" has raised some good ones, including Dominio D. 2.20 1/2.

"Jack" Irving is expected down to handle the ribbons over "Cherry Ripe" in the 2.19 Hotel Victoria Purse. "Jack and Cherry" are a winning combination.

A distance flag has been suggested for future ice races. It certainly would have proved a good thing last week as there was considerable of what appeared to be laying up.

The horse market has been active locally. Several horses have been changed hands at good and advancing prices. There appears to be a good demand for well bred brood mares as the supply is limited.

Ice races are proving the popular winter sport all over the Province. Not for years has the interest been so keen. It looks as if the Island circuit would be well supplied with horses this year. Some time ago it was pointed out in these columns of the spread of the trotting horse fever to European countries and the fact that they were buying up many of the best youngsters in the United States. Another good one "gone abroad" is Baldy McGregor (3) 2.06 1/2, bought for the Austrian Government at the recent mid winter sale in New York for \$16,000.

E. W. Hanks, promoter of the pine tree circuit is offering \$100,000 for three weeks racing in Maine. Single purses in many instances are \$5,000.00. Oh, for a winner to pull down that pile!

Frank Boutlier has in his stable a 2 year old by Baring 2.18 1/2 which is predicted to be a sensational trotter. It was a great pity that Baring ever left the provinces as he was a most remarkable sire of speed.

Please make a note of the meeting of horsemen in this city, March 19th. All secretaries of tracks and horse owners are requested to be present so that a strong association can be formed that will work together for mutual interest.

The standard of registration is going to be raised in the United States one year from date. After that all rules except Rule 1 will be suspended. Thereafter only horses whose sires and dams are standard will be admitted for registration. The record test will no longer count—blood lines being the only admission.

Nearly forty new tracks will be opened up in the Eastern States for racing the coming season. This means many more thousands to be expended in purses, etc. Never before has horse racing looked so attractive.

The breeding boom predicted by us for 1913 has commenced to mature. Owners of stallions are receiving inquiries for breeding, etc., from breeders all over the Province. This is a good sign as the breeding of light horses has been somewhat neglected the past few years. Those who breed now are assured of a brisk demand

GOOD ROADS

DIFFERENT KINDS OF ROADS.

Most of the roads in this country are of necessity constructed of earth, while in a few of the richer and more enterprising communities the most important thoroughfares are surfaced with gravel, shell, stones or other materials. Unless some new system for the improvement of public roads is adopted, the inability of rural communities to raise funds for this purpose will necessarily cause the construction of some time to come. Until this new system is adopted the most important problem will be that of making the most of the roads which exist, rather than building new ones of specially prepared materials. The natural materials and the funds already available must be used with skill and judgment in order to secure the best results. The location, grades and drainage having been treated in preceding articles, the next and most important consideration is that of constructing and improving the various kinds of roads.

EARTH ROADS.

Of earth roads, as commonly built, it suffices to say that their present conditions should be tolerated in committees where there are any other materials with which to improve them. Earth is the poorest of all road materials, aside from sand, and earth roads require more attention than any other kind of roads, and as a rule get less. At best they possess so many defects that they should have all the attention and care of which their condition is susceptible. With earth alone, however, a very passable road can be made, provided the principles of location, drainage, and shape of surface, together with that of keeping the surface as smooth and firm as possible by rolling, be strictly adhered to. In fact a good earth road is second to none for summer travel macadam or stone roads.

DRAINAGE.—"Water is the great road destroyer," and too much attention cannot be given to the surface and subdrainage of earth roads. The material of which their surfaces are composed is more susceptible to the action of the water and more easily destroyed by it than any other heavy material. Drainage alone will often change a bad road into a good one, while on the other hand the absence of good drains.

ROLLING.—The same can be said of rolling, which is a very important matter in attempting to build or maintain a satisfactory earth road. If loose earth is dumped into the tired wheels cuts it or rolls it into uneven ruts and ridges which hold water and ultimately results, in the winter season, in a sticky, muddy surface, or if it be in dry weather, in covering the surface with several inches of dust. If, however, the surface be prepared with a road machine and properly rolled with a heavy roller it can usually be made sufficiently firm and smooth to substatiate the traffic without rutting, and resist the penetrating action of the water. Every road is made smoother, harder and better by rolling. Such rolling should be done in damp weather, or if that is not possible, the surface should be sprinkled if the character of the soil requires such aid for its proper consolidation.

To be continued.

GOOD ROADS

DIFFERENT KINDS OF ROADS.

Three Oakley Barons have changed hands during the past week, namely: Baronwood, owned by W. S. McKee, sold to Cape Breton; Minnie, owned by W. S. Newsom, sold to a party in Summerside, and W. Brown's horse, sold to Walter Grant of this city. There's something doing in Oakley's, eh!

BOTTOM FACTS.

Bottom 2.23 1/2 is the ideal horse—he has beauty, size, strength, youth and breeding. He is at the very acme of his powers and should beget, robust healthy, speedy and beautiful stock.

"Fashion changes" in the horse world. Today its the Bingaras that are making history. That wonderful 11 year old sire has a matchless record of victories won by his sons and daughters in 1912. Bottom is one of his handsomest and best bred sons.

Opportunity knocks at your door. If you have a good brood mare your chance to add to the future turf records of this province is good if you breed to Bingara's speedy son Bottom 2.23 1/2. That record is no measure of his speed, he had been lots of miles in 2.18 on a half mile track. His full sister Berka has a mark of 2.14 and Biala (3) 2.18 1/2, both on one half mile tracks.

C. H. Hamlin whose demise was one of the severest losses the harness world has known, believed in breeding beauty as well as speed. He bought the most beautiful stallions he could find including the magnificent Mambriño Chief. As a result of this mating "Village Farm" turned out the most beautiful horses in the world. If you would follow Bottom Bingara's handsome son and secure beauty, breeding and speed.

Bingars the sire of Bottom 2.23 1/2 has been booked to 50 mares at \$150 each. This fills his book for 1913.

Kadika, dam of Bottom is a wonderful brood mare every one of her foals is fast. Her two last having stepped 4 the, as yearlings in 18 seconds. And a two year old a mile in 2.30. Berka has a mark of 2.14 1/2, Biala a three year old record of 2.18 1/2 and Bottom 2.23 1/2. All the above foals are by Bingara. Mr. Allen considers Kadika one of his best brood mares. Her produce has sold for thousands of dollars.

THE HORSE'S LEGS

A striking change is noticeable in the attitude taken in regard to the hairy leg of the cart horse. It was considered at one time a sign of "faddism" to object to the appendage, and those who pointed out that the hair was a nuisance in the field, and caused a great inconvenience and loss of time, were met with the bald statement that "plenty of hair" denoted "plenty of bone," and that the merit more than compensated for the defect. The fact that the hairy leg frequently led to those faults in management which brought about grease and other troubles in the extremities was either ignored or considered to be covered in the foregoing statement. Breeders for exhibition went in, as they do still, for an abundance of "feather," and the greater the amount the better was the exhibitor pleased. We are far from denying absolutely that there is a connection between the feather and the bone, but the method of judging, which has come to regard the hair as the sign of bone, is a bad one when we know that the hair itself is felt to be a drawback. It has led to artificial encouragement of the feather, to the making much of a feature that may be accepted as a necessary evil, if it be associated with and inseparable from other good points, but which in itself is far from desirable, and it is satisfactory that this view is becoming recognized. Shire horse breeders are finding that there are other

breeds of horses in the world, good draught horses, that are preferred because they have clean legs, and that the fact that practical farmers dislike unnecessary trouble with their teams is having its effect on the relative demand for the Shire and the Percheron and Belgian draught horses. Our live stock shows have done much for all British breeds of stock in the past, and may do much in the future; but the trend of public opinion must be taken into account, and any rules or "fads" which result in the depreciation for practical purposes of our animals must be kept in check.—Mark Lane Express.

BINGARA (34707)

Sire of Baden 2.05 1-4 (world's record money winner) Belsvina 2.06 1/2, Bergen 2.06 3-4, Binvol 2.07 3-4, etc., Champion money winning sire of 1912. World's champion sire of 2.18 trotters at 11 years. Sire of 38 two year olds that have trialed in 2.30 or better.

BINGEN 2.06 1-4

Sire of Uhan 1.58 and sire of ten in 2.10 and 106 others in list. The greatest modern family founder and transmitter of speed.

LIGERIA 2.27 3-4

Sire of seven in 2.10 and 65 in list. Holder of world's record as two year old to high wheels 2.10 3-4. Brought \$150,000 when sold.

OLLIE K. 2.12 3-4

Dam of Ligeria 2.27 3-4. Queensland 2.19 1-4.

LORD RUSSEL (4677)

Sire of 34 in list, sire of dams which produced 38. Sons have sired 133.

EVENTIDE

Dam of Kremlin 2.07 3-4 and Rex long 2.24 3-4.

MERCHANT 597

Son of Belmont 64 and Lady Mambriño by Mambriño Chief and sire of Nettleswood 2.16 1-4 and Monitor.

PANSY by

Waltham 687 son of Hambletonian 10.

LOUISE

Dam of Kadika and Karcs

KREMLIN 2.07 3-4

Champion trotting stallion 1892. Sire of Kavo's 2.07 3-4, Kaplan 2.08 1-2, Kanars 2.10 3-4, and 63 others in list 15 sons have produced 42 in list, 22 daughters have produced 51 in list including Baden 2.05 1-4, Binvol 2.07 3-4, Aquin 2.08, Aquill 2.11, Axtellay 2.10 3-4, etc. Daughters produced trotters that won \$50,000 in 1912.

MAY RING 2.20

Sire of 24 in list. YOUNG MISS by young Jim (2009)

ARION 2.07 3-4

Sire of seven in 2.10 and 65 in list. Holder of world's record as two year old to high wheels 2.10 3-4. Brought \$150,000 when sold.

YOUNG MISS

by young Jim (2009)

GOOD ROADS

DIFFERENT KINDS OF ROADS.

Most of the roads in this country are of necessity constructed of earth, while in a few of the richer and more enterprising communities the most important thoroughfares are surfaced with gravel, shell, stones or other materials. Unless some new system for the improvement of public roads is adopted, the inability of rural communities to raise funds for this purpose will necessarily cause the construction of some time to come. Until this new system is adopted the most important problem will be that of making the most of the roads which exist, rather than building new ones of specially prepared materials. The natural materials and the funds already available must be used with skill and judgment in order to secure the best results. The location, grades and drainage having been treated in preceding articles, the next and most important consideration is that of constructing and improving the various kinds of roads.

EARTH ROADS.

Of earth roads, as commonly built, it suffices to say that their present conditions should be tolerated in committees where there are any other materials with which to improve them. Earth is the poorest of all road materials, aside from sand, and earth roads require more attention than any other kind of roads, and as a rule get less. At best they possess so many defects that they should have all the attention and care of which their condition is susceptible. With earth alone, however, a very passable road can be made, provided the principles of location, drainage, and shape of surface, together with that of keeping the surface as smooth and firm as possible by rolling, be strictly adhered to. In fact a good earth road is second to none for summer travel macadam or stone roads.

DRAINAGE.—"Water is the great road destroyer," and too much attention cannot be given to the surface and subdrainage of earth roads. The material of which their surfaces are composed is more susceptible to the action of the water and more easily destroyed by it than any other heavy material. Drainage alone will often change a bad road into a good one, while on the other hand the absence of good drains.

ROLLING.—The same can be said of rolling, which is a very important matter in attempting to build or maintain a satisfactory earth road. If loose earth is dumped into the

tired wheels cuts it or rolls it into uneven ruts and ridges which hold water and ultimately results, in the winter season, in a sticky, muddy surface, or if it be in dry weather, in covering the surface with several inches of dust. If, however, the surface be prepared with a road machine and properly rolled with a heavy roller it can usually be made sufficiently firm and smooth to substatiate the traffic without rutting, and resist the penetrating action of the water. Every road is made smoother, harder and better by rolling. Such rolling should be done in damp weather, or if that is not possible, the surface should be sprinkled if the character of the soil requires such aid for its proper consolidation.

Cold, Damp Winds Full of Catarrh

Half the victims of Catarrh, Bronchitis, and Throat Irritation, Contract the Disease This Month.

Only One Preventive Known.

The germs of these diseases that have accumulated during recent months are fanned into life by the sun, taken up in the strong winds and spread broadcast throughout the land.

It is impossible to avoid the inhalation of these germs, and we hesitate the person whose bronchial tubes or air passages in the head and lungs are in a weak, inflamed condition at this season.

There is but one known method of destroying these disease germs after they have entered the air passages—the inhalation of Catarrhose.

Catarrhose alone of all the thousands and one remedies can be carried in the air we breathe to the minutest cells of the respiratory organs, where it destroys the germs, heals all the irritated surfaces, and effects a permanent, lasting cure.

"My nostrils were so stuffed up with Catarrh that my head ached all day. At night I could scarcely sleep because of the awful droppings from my nose and throat—which kept my stomach in a constant state of distention. But Catarrhose cured me—strengthened my throat and gave me protection against repeated coughs and colds. I urge all sufferers to use Catarrhose."—J. P. Andre (Salesman), Hamilton, Ont.

Catarrhose is a guaranteed cure for every form of that trouble, Bronchitis, Asthma, Catarrh. It has cured others, why not you? Two months' treatment price \$1.00. All dealers, or the Catarrhose Co., Buffalo, N. Y., and Kingston, Ont.
