# FAIR PLAY

An item is being printed in the papers headed "Do Not Misquote Figures," referring to the comparative strength of baking powders and claiming to quote from the Dominion government report, is misleading and incorrect. The figures given as the test of Dearborn's "Perfect" are far from correct and not according to the report. The total carbonic acid has in the samples tested, according to the report of the chief analyst, is as follows:

Dearborn's Perfect..... 10.7  
Royal..... 10.4  
Imperial..... 10.6

The above figures are correct and are given on page 28, table 11, of the 1st and Revenue Department report No. 68 and is the only government report which gives a test of Dearborn's "Perfect" baking powder.
