SAVE THE TREES.—Those that know, claim that indications point strongly to a Tussock Moth plague next year. This species of caterpillar pest, produces two broods annually. The full grown Caterpillars spin their cocoons on trees, along fences and other convenient projections and almost all kinds of trees, are partly or totally stripped of their leaves. Right now, there are a number of branches of trees within the city of Charlottetown, and other places, in this province on which wechs have been spun, and inside of which, are alive with Caterpillars. Let every householder look around his or her property and destroy at once all appearances of these enemies of the beautiful shade trees. The city council might have a man to look over the park and squares and save a lot of trouble and expense later on. Do it now!

Dear Captain:—We do not wish to permit the fiftieth anniversary of your wedding to pass without some expression if the good will and esteem in which you are held by your associates in the Public Works Department. During the past five years our relations have been most pleasant and in that period you have gained the respect and liking of all by your kindness, devotion to duty and ability in your profession. May your life be long and happy and we hope Mrs. Squarebriggs and yourself may be spared in health and strength to enjoy many more anniversaries of your wedding day. We trust to see you piloting the good ship "D.P.W." for many seasons yet to come and that her course may continue to resemble your course in life through the avoidance of shoals and rocks and other dangers of the sea.

Please accept the accompanying as a token of the regard and esteem of the engineering staff of the Department.
