## Shot Of Group With Pennies and Mail Stacked On Tables

Roy Ward Dickson, genial master of shenanigans of Shirriff's "Fun Parade" presents Penny Smith and her intended with the diamond ring he promised them, if listeners sent them at least 100-000 pennies. They topped the mark easily, and the stunt provided lots of smiles for the boys in service hospitals across Canada. A sidesplitting night in store for Charlottetown on April 30th, when Roy stages the craziest "Fun Parade" show of his hectic career, at the Forum for Y-Grade Welfare Service Work.

### CAVENDISH AUXILIARY EASTER THANK-OFFERING

The Cavendish Auxiliary of the W. M. S. held its Easter thank-offering service in the United Church on Easter Sunday at 7:30 in the evening, with the president presiding.

Following the hymn, responsive reading, prayer and offering, "Nailed to the Cross" was very effectively sung by a trio, Messrs. Lowell Wyand, Olaf and Roy Stevenson.

Lights were then dimmed and a spot light flashed on "Hoffman's Picture of Christ in Gethsemane" while the account of that agonizing scene was read from the Gospel of St. Mark, also a story was read telling of the influence this picture had on a young man's life. The solo, "Aimee", by Mr. George Clark and choir made a very impressive ending for this part of the program.

Then followed the pageant, "As It Began To Dawn", the Scripture readings, and the Backward Look. The Forward Look and the Present Challenge were given by Misses Helen Green, Bernice Axworthy and Mrs. Alfred Moore. The responses were given by Mrs. Lorne MacNeil.

The solo, "Christ Arose" was sung by Mr. Gough and choir. Other hymns sung were, "Jesus Keep Me Near the Cross", "The Strife is O'er, the Battle Done",

and "Take Up Thy Cross". Mrs. Ira MacCoubrey was organist. The greenery, flowers and costumes added to the beauty of the service.

Owing to the storm of the previous night travelling conditions were improved so a good congregation gathered.

### TO SEEK URANIUM

WASHINGTON, April 1 — (CP) — A 40-square-mile area in Colorado will be drilled this summer in search for uranium deposits. Uranium is used in the making of atomic energy, including bombs. The Atomic Energy Commission announced today that the land has been reserved for its use by the Interior Department.

### QUEEN'S TO EXPAND

KINGSTON, Ont. — (CP) — Queen's University will start work this spring on a \$200,000 addition to Gordon Hall, one of the campus buildings. When work is completed, Gordon Hall, will house both chemistry and chemical engineering classes.

LOSE \$1.49 PER PATIENT MONTREAL — (CP) — Montreal General Hospital loses an average of \$1.49 on every consultation it gives its outdoor patients, says Dr. Lorne Gilday, hospital superintendent.

## An Excellent Cough Medicine

Dr. Wood's Norway Pine Syrup is a quick and pleasant remedy for coughs, colds, sore throat, spasmodic croup, asthma and bronchial troubles. Pleasant tasting, safe and effective, Dr. Wood's Norway Pine Syrup takes hold almost instantly. It helps to loosen the phlegm and mucus, soothe the irritated membranes, stimulate the bronchial organs and clear the air passages. Dr. Wood's Norway Pine Syrup has been a popular family remedy for nearly 50 years. On sale at all drug counters.

The T. Millers Co., Limited, Toronto, Ont.

## II. Memoriam

### MR. WILLIAM GARVIE HALL

—Old friends in Summerside will learn with a sense of regret of the death of a notable son of their town in the person of William Garvie Hall who passed away recently at Tehachapi, California.

Mr. Hall was the son of Thomas and Mrs. Catherine (McRae) Hall of Summerside, his father Thomas Hall being the founder of the widely known Hall Manufacturing Co. of Summerside, builders of farm implements, William Garvie Hall became one of the most successful business men that even went forth from the province.

He was born in Summerside on March 6, 1874. After attending the public school in Summerside he went to the United States residing for a time in Bath Maine, where in 1891 he became an employee of the Bath Iron Works.

In 1898 he went to the Hawaiian Islands and settled in Honolulu where he became a machinist with the firm of Catton Neil and Co. In July 1910 he resigned as President and Manager of this Company to accept a position as Assistant Manager of the Honolulu Iron Works.

Six months later, as recorded by a Honolulu newspaper, which carried a lengthy sketch of his career with a picture of Mr. Hall, he was appointed manager in 1920 when Honolulu Corporation acquired control of the Earnshaw Docks and Iron Works in Manila, he was made a Vice President and Managing Director of the Earnshaw Docks and Honolulu Iron Works Co. Manila.

In 1901 he married Alice Templeton of Honolulu. The couple had three children, Mr. Halls son, Donald Templeton Hall is with the Hilo Iron Works.

In 1924 he served as President of the Honolulu Rotary Club and was a member of the American Society of Mechanical Engineers.

He is survived by his son in Hilo and two daughters Mrs. Shirley Warden of Los Angeles and Mrs. Ralph Kennedy of Tehachapi. Mr. Hall's death occurred at his ranch at Tehachapi, Cal., where he had been living since his retirement in August 1936 after more than 37 years as an engineer and executive in Hawaii.

The deceased paid a visit to Summerside a few years ago, his second visit to his native town within 20 years and he was planning another visit home when death intervened. A sister Miss Ellen Hall resides in Summerside.

The esteem in which the deceased was held may be judged from the following editorial reference which appeared in the Honolulu newspaper at the time of his death: "William G. Hall, Canadian by birth, master of the ironworking trades through apprenticeship after little schooling rose to the management of farflung enterprises by his innate ability and knowledge of iron and men. A resident of Honolulu since 1898 to his retirement in 1937 as president of the Honolulu Iron Works and its subsidiaries, Mr. Hall has perhaps more to do than any other of our men of vocational training for the youth of the land. He achieved broad culture becoming perhaps better versed in art, literature and music than many whose early educational advantages were more complete. He shared with others, giving freely of his talents and his dreams that this might be a better world in which to live.—S

### KELLY'S CROSS DRAMATIC CLUB

On Easter Monday night the Kelly's Cross Dramatic Club presented their play Shaun Aroon, an Irish drama to a large and appreciative audience in the parish hall. The players, many of them newcomers to the stage, proved themselves good performers and gave promise that there will be no shortage of dramatic ability in Kelly's Cross in the years to come. Frank Flood, veteran of many plays in the past made a veritable comeback, in his excellent portrayal of Dan O'Grady, an Irish farmer facing financial difficulties at the hands of a rascally and unscrupulous land agent, Fergus Riordan, whose part was well taken by Ronald Greenan.

Mrs. John Molyneux as Dan's wife, Mrs. O'Grady, played her usual good part and Miss Elaine McQuaid in her role as their daughter, Molly, typified a sweet Irish girl.

Charlie Flood as Shaun Aroon, a roving, jovial character couldn't have been surpassed while Joseph Flood masquerading as Bad Andy acted his part well and at the end revealed himself as Lord Fermoy, a generous, kind hearted landlord, contrary to the opinion his tenants had been led to believe.

Tom O'Grady, Dan's son, was well taken by Leonard Kelly, while Raymond Sturdy as the ever-obliging servant, Patrick, furnished a lot of mirth.

Maggie, the maid servant, was unusually well acted by Miss Edith Kelly and Russel Smith as Henning, a money lender was also in excellent character, while John W. Trainor in his capacity as an officer of the law was always on hand to take care of the difficult situations.

The play was of three acts and the specialties were of a high order consisting of solos by Mrs. John Dixon, accompanied on piano by Mrs. Emmett Gorman which brought loud applause from the audience.

Step-dancing by little Mary Mc-

MAKERS OF NEW CARRY & BISCUITS  
Branches — Montreal, P.Q. — Halifax, N.S. — St. John, N.B.

Donald was an added feature while the songs rendered by Frank Flood found their usual way into the hearts of all present. His son, Pat accompanied on the piano. Needless to say the usual good order prevailed and the play concluded with singing the National Anthem. Lunch was served to the members of the cast and those providing the specialties after which a period of dancing took place to music furnished by Mrs. Maurice McDonald and Pat Flood, violin and Frank Flood, piano.

Home made candy had been sold and a large sum was realized. The play was sponsored by the C.W.L. and the members of St. Joseph's sub-division extend their heartfelt thanks to all who helped to make it a success.

## MAKE YOUR Fertilizer Dollars FURTHER

SPRING 1948

Ammonium Nitrate, 33%	\$74.50 per ton
Cyanamid, 21%	63.00 per ton
Sulphate of Ammonia, 20%	51.00 per ton
Superphosphate (Granular), 20%	32.00 per ton
Muriate of Potash, 60%	58.00 per ton
3-15-6	41.30 per ton
3-15-6 (3% Borax)	44.30 per ton
4-8-10	38.70 per ton
4-8-10 (1% M.G.O.)	39.70 per ton
5-10-10	43.00 per ton
5-10-10 (1% M.G.O.)	44.00 per ton

F.O.B. cars or trucks, our plant, in 100 lb. bags. Your cost in carload lots is F.O.B. price plus freight to your station.

We can now make prompt deliveries excepting on Sulphate of Ammonia. Later in the season, rush work may not permit prompt deliveries.

WE RECOMMEND THAT YOU TAKE YOUR REQUIREMENTS NOW!

Our Mixed Fertilizers are well cured, our Superphosphate granular. All are dry and free flowing.

## FERTILIZER FACTS

To meet frequent requests, we endeavor to show in the following table the plant food contents in various fertilizers:

Formula	Pounds Materials That Will Make One Ton							Total Pounds
	Nitrogen	Phosphorus	Potash	Other Materials	Sulphate of Ammonia 20%	Super-Phosphate 20%	Muriate of Potash 60%	
2-15-6	30	\$25.00	200	1200	200	400	2000	
3-15-6	34	41.30	200	1500	200	None	2000	
4-8-10	32	32.70	400	200	334	400	2000	
5-10-10	35	43.00	200	1000	334	166	2000	

In the above table Sulphate of Ammonia is shown as the only source of Nitrogen. In factory practice Cyanamid and Ammonium Nitrate are used in addition. These aggravate further the filler situation. When Borax or Magnesium is used the quantity of filler is slightly reduced.

2-15-6 and 3-15-6 are largely used for similar crops—Grain, Hay Turnips and Pastures. The latter contains more plant food and less "other materials", resulting in a lower cost per unit for the plant food.

4-8-10 and 5-10-10 are largely used for Potatoes. The latter contains more plant food and less "other materials", resulting in a lower cost per unit for the plant food.

"Other Materials" is usually Limestone, Sand, or a mixture of both. There is a limit to the quantity of Limestone that can be safely added to Mixed Fertilizers.
