THE GUARDIAN COVERS THE FIELD

The Guardian covers the City and Province within which it is published more fully and completely than any other newspaper printed in Canada. With a daily circulation of its morning and rural edition now about 8,000 and growing from day to day, it has broken all records for a daily publication in a small community. Charlottetown has a population of 12,000 and Prince Edward Island has 108,000. The Guardian's daily circulation is therefore as 1 to 14 of population in the city in which it is published, or 1 to 13 of the population of the Province. This is the management believes unequalled by any daily newspaper published in Canada. Take one or two comparisons with other leading newspapers in other cities and Provinces. St. John has a population of 40,000 and the Province of New Brunswick 320,000. St. John has five newspapers and among these The Telegraph and The Sun are perhaps the foremost. Each claims a circulation of about 8,000, or say as 1 to 5 of the population of that city and 1 to 40 of the population of the Province. Or again: Toronto has a population of some 250,000 and the Province of Ontario about 2,225,000. The Toronto Globe is a great Canadian newspaper, known all over the world as one of the foremost journals. The Globe's published daily circulation is slightly under 30,000. That is as 1 to 5 of the population of Toronto and 1 to 41 of the population of Ontario. The point is thus that The Guardian covers the field of its circulation three and a half times as well, if compared with population of the city, and over three times as well, taking the population of its Province, as the best New Brunswick and Ontario daily newspapers, and these are admittedly among the best in Canada. These facts are printed in no spirit of boasting, but for the satisfaction of Guardian readers and for the information of those who know how completely their favorite Journal's endorsement by the reading public strong when it circulates and how completely it covers the field as an advertising medium in this City and Province.

HINTS FOR PANCAKE MAKING.

A good way to prepare the pan for pancakes, fritters and such things, is to put the butter in a clean cloth, and rub the little bundle all over the pan. The heat, melting the butter, will let just enough through the cloth to butter evenly and prevent waste. For the pancakes themselves, there is an increasing use of Blended Flour, which good cooks agree, is without an equal for making light, tasty pancakes. It can be had from any good mill—and is a scientific blend of Ontario soft wheat and Manitoba spring wheat. Freed, as it is from waste matter, this Blended Flour is richer in flavor and food value than either of the wheats could give alone. It contains just the proportion of those elements in flour which prevent the food becoming soggy and indigestible. The blending of flour is an old trick, taught good housekeepers by their mothers and grandmothers. It is convenient to have this blending easy task shifted from our burdened shoulders onto the broader, sturdier ones of the dustless millers of today. And they should certainly do the blending more accurately, with all the modern machinery, than could be accomplished by the most painstaking work at home. Careful housekeepers are using Blended Flour for bread and pastry, too. 20.

ADVERTISING IS BROAD.

Advertising in itself means publicity and publicity is a very broad and comprehensive term. It does not mean simply a word whispered to a favored few. It is, rather, synonymous with a general, broadcast declaration, and the broader the scope of the announcement, the better the advertising. No occupier of space that directs attention along given and desired lines can be reasonably regarded as wasted; nor can any facts be expounded to this end be adjudged excessive. A word in a Medical Journal per box a deal.
