

IMPORTANT READING MATTER SELECTED FROM THIS WEEK'S NEWS FOR THE GUARDIAN'S SATURDAY SUBSCRIBERS

THURSDAY.

The marriage took place at the home of Wm. Wood, Mt. Herbert, on March 9th of his only daughter Miss Lillian May Wood to Charles Rankin, of Mt. Herbert. Rev. E. E. Styles of Pownal officiating. The bride who is a general favorite, looked exceedingly fair in a pretty gown of brown silk and was unattended. The ceremony was witnessed by a number of the immediate friends after which a dainty wedding supper was partaken of. The bride received many useful and beautiful presents which she gratefully accepted for the good wishes of her large circle of friends. During the evening about forty neighbors charivariated the happy couple and an enjoyable time was spent, the visitors being treated to refreshments by the bride and groom, they being personally congratulated by each. Late in the evening Mr. and Mrs. Rankin, amid showers of rice and good wishes, drove to their future home in Mt. Albion.

At his home in Tryon, in the early hours of the first day of March, 1911, William C. Lea passed peacefully and quietly to his eternal rest. He was born in Lower Tryon, March 22nd, 1833, a son of the late John Lea and grandson of Richard Lea, who came to P. E. Island in 1825, from Burgh, Lincolnshire, England. As a young man and throughout his life (which included some of the most stirring periods in the political history of the Island) he took a deep and active interest in all matters relative to the welfare of his country. Always a Liberal, and strong supporter of his party, he took a prominent part in the discussion of the questions of those days immediately preceding the consummation of Confederation—days of intense import, when political feeling was at its height—and which marked a new era in the history of the inhabitants of P. E. Island. In 1872, Mr. Lea was elected to represent the First District of Queen's County in the Legislative Assembly. In 1876, as a supporter of free schools, he was again elected to represent the Fourth District of Prince County.

As a magistrate, representative and public-spirited citizen generally, his influence was at all times exerted in behalf of every measure, tending to promote the best interests of the people and community in which he lived.

A farmer himself, he did his utmost to forward all progressive systems and methods of an agricultural nature, was one of the organizers of

the Farmers' Insurance Co., and for many years carried on a considerable business, buying and shipping farm produce.

Through these political and business connections, Mr. Lea had a wide circle of acquaintances, particularly in the central portion of the Island and in Cape Breton, and by his unflinching integrity, broad sympathies, kindly and courteous disposition, made large numbers of friends wherever he was known. He was individually and universally loved and respected. In his private life, he was a devoted member of the Methodist Church, a most considerate, tenderly loving husband and father, a warm and faithful friend, and his death at the close of a long and full life, is most sorely felt by all.

Mr. Lea is survived by a widow and seven children. The daughters are: Mrs. E. Boswell of Victoria and Mrs. J. T. Windsor of Crapaud, P. E. I. The sons: C. H. Le of California, John B. R. of Victoria, P. E. I.; R. S. and W. S. Lea of Montreal and Walter on the homestead.

Many tributes to the memory of one who holds such a deep and abiding place in their hearts will be extended to the bereaved and mourning family.

To Albert and Mrs. Paul, Brookfield: We the officers and members of Brookfield Division, No. 263, S.O.T., will extend to you our sincerest sympathy in your recent bereavement in the death of your loving father. Mere human sympathy is of little avail; therefore we would direct you to Him, who alone can sympathize with all, and comfort the broken-hearted; and while you will greatly miss the guidance of a loving father, our prayer for you in your great sorrow is, that our Father in Heaven may vouchsafe you His sustaining grace, and that the affliction through which you have been called

WONDERFUL CURE IN BONAVENTURE

Dodd's Kidney Pills Again Cause a Sensation

They Cured Dame Aubin Bonne, Who for Fifteen Years Had Endured the Tortures of Diabetes—Interview With Dame Bonne.

Musselville, Bonaventure Co., Que., March 17 (Special)—"I suffered all that any person could endure." These are the words of Dame Aubin Bonne of this place, in telling of her wonderful cure from Diabetes, which held her in its grasp for fifteen years. She declares that Dodd's Kidney Pills and nothing else must get the credit for her cure. "I had pains in my head and back and stiffness of the joints," Dame Bonne continues. "I lost my appetite and suffered from Heart Disease and had difficulty in breathing. Doctors attended me but they could do me no good. "After fifteen years of constant suffering I was persuaded to try Dodd's Kidney Pills. I used fifteen boxes and now I can do my own work. Do you wonder that I recommend Dodd's Kidney Pills?" Dodd's Kidney Pills cured Dame Bonne because all her ailments were of an origin from the kidneys. If you have Kidney Disease, your family don't wait fifteen years for someone to persuade you. Use Dodd's Kidney Pills and be cured.

SICK HEADACHES AND NERVOUSNESS

"Fruit-a-tives" Completely Cured Me. LAKELET, ONT., May 12th, 1910. "It is my firm belief that every woman should take 'Fruit-a-tives' if she wants to keep herself in good health. Before taking 'Fruit-a-tives' I was constantly troubled with what is commonly known as 'Nerves' or severe Nervousness. This extreme Nervousness brought on the most violent attacks of Sick Headache, for which I was constantly taking Doctor's medicine. Constipation was also a source of great trouble for which the Doctors said 'I would have to take medicine all my life' but 'Fruit-a-tives' has banished these troubles and I am a well woman. When I started taking 'Fruit-a-tives' I took four at a time, but have reduced the dose so that it is only necessary for me to take one in a week, and that one 'Fruit-a-tives' tablet every week keeps me well." Mrs. FRED GADKE.

It is wonderful how quickly women get better when taking 'Fruit-a-tives'. These famous fruit tablets relieve headaches and tone up the whole nervous system. They regulate the bowels, strengthen the stomach, stimulate the appetite, and take away that pain in the back. Pale, weak, nervous women should always use 'Fruit-a-tives', soc. a box, 6 for \$2.50, trial size, 25c. At dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

To pass, may be sanctified to your eternal welfare. It may be in the coming years, we'll read the meaning of our tears, And there, sometime, we'll understand God knows the way. He holds the key, He guides us with unerring hand, Sometime with tearless eyes we'll see, Yes there, up there, we'll understand. Signed by: Mrs. Brenton Dollar, Bessie Kiely, Jennie Dollar, Flora McLeod.

It is our sad duty to publish the sudden death of John Constable, a respected resident of Hunter River, after an illness of only three days.

John Constable, 63 years of age, was removed to New London 16 years ago, where by his kind and obliging manner he was respected by all to whom he came in contact. He leaves to mourn a widow, one son, William in Dakota, U. S. A., and two daughters, Mrs. Duncan Ross, Hunter River, and Mrs. Chinnay, Malta. The remains were followed to the Presbyterian Church, Hunter River, by a large concourse of people where the Rev. Mr. Sterling, New London, conducted the services, after which they were interred in the family plot in Hunter River Cemetery. The pall-bearers were: David Silliphant, McDevour, Angus Stewart, William McLeod, Siman Brown and George S. McLeod. We sincerely sympathize with the widow and family in their sad bereavement.

Dear Sir—With reference to your despatch in The Guardian from Winnipeg of March 1st stating that ploughing had already started in the West, I respectfully request to point out the word snow was omitted in front of ploughing; being the process of cleaning the railway track. There are from three to five feet of snow on the prairie and the trains are blocked in every direction. The C. N. R. keeps the main line open fairly successfully, but the branch lines are not so fortunate. The C. N. R. have had no service for a period of a week. The country roads are in a very bad condition and greatly resemble the roof of a house. The people here all drive double and sometimes a horse will break off the track and go down to his ears in the rainfalls. There are far different from those of P. E. Island, having had none since October last. Now sir, I don't like to see such stuff to lure people away from comfortable homes to the West, nor to say too much against the West. For I think it is a fairly good place for a man to start with small capital, especially if he has health and strength. If a man gets sick and has to go to the hospital it is hard on his purse. I know of one man who lives in the country. He came into town suffering from appendicitis and had an operation which was a success, but at the same time it cost him \$500. That means about two years' hard work on a farm to pay off his bill. Respecting wages, a man can get \$2.50 to \$7 a day, according to his trade and ability. Work is plentiful enough during summer months (for those who need it), but when winter comes on there is very little doing. It usually takes the man some time in summer to keep him in winter; and if a man can secure a place to work for his board he is very thankful. On the other hand a man may be hired on the farm where the wages rate from \$30 to \$35 a month or \$300 per year, but very few farmers keep a man in the winter season—only those that keep a large stock, and that I can assure you is no easy task, as the feed is stacked outside and is then carried in by the armful in all sorts of weather. One man I know of went out to feed up and got caught in a blizzard and was lost for an hour and a quarter, having got both hands and feet badly frozen. So you can readily see, Mr. Editor, that it is not all smooth travelling in the West any more than it is on P. E. Island. There is one thing, a person

DOCTORS FAILED TO HELP HER

can get out decently, not like P. E. Island, where they have to tackle up to a boat like a horse and pay \$2 for the privilege of drawing His Majesty's mails across the Straits. With regard to prices of food stuff: Beef, pork and mutton are from 15 to 18 cents a pound; eggs, 30 cents a dozen; butter, 30 cents a pound; potatoes, \$1 a bushel, and everything else accordingly. The weather here now is beautiful. The snow in town is gradually going, but is still firm in the country. We have had a very severe winter, January being the worst month. The thermometer registered from 20 to 40 degrees below zero every day. Blizzards have been frequent. The farmers don't expect to get to work until the latter part of April.

Now, Mr. Editor, this may be of some use to some of the boys who have got the Western fever and would therefore like you to publish it. I could write more, but it would be taking up too much space in your valuable paper. Yours respectfully, THOS. WRIGHT, FRIDAY, Virden, Man., March 9.

Samuel Cameron, Hampton, and Jabez Lea, Tryon, have sold two of the Island's best draft horses at high figures. They were sired by Mr. Lea's horse, Brown Mac.

There passed to her eternal rest at Garfield on the 24th of February, Ann MacDonald, in the 76th year of her age. Deceased was the third daughter of Isabella and John MacDonald of Glasgow. She leaves to mourn two sisters, Margaret, Mrs. William MacLeod of Garfield and May, Mrs. Willie Ross of the same place. She was of a kind disposition and beloved by all her friends.

John Tweedy, Bannockburn, has imported from Scotland this week one of the finest thoroughbred Clydesdale fillies that ever came to this Province. This colt—Aggressor (16137) sire, Anaprior (10437), dam, Keir Jewess (27503)—was bred by John and James Macfarlane, Cottonhaugh, Bridge of Allan, Scotland, and was purchased for Mr. Tweedy by A. H. Thomson, who buys horses in the Old Country for the New Brunswick and Nova Scotia Governments. He is 9 months old and weighs nearly eight hundred pounds. Mr. Thomson brought over at the same time with Mr. Tweedy's colt twenty other young Clydesdales for the New Brunswick Government and twenty Percherons from France for the Nova Scotia Government.

WEDNESDAY. The first day of the Seed Fair was auspiciously ushered in yesterday with very pleasant weather and other most favourable general conditions. The Market presented an especially attractive appearance in the Fair dress, the decorative fact of the officials having left itself fully to this occasion, resulting in a bright interior in the Market building. The exhibits were very large in numbers in most cases. Wheat is shown in great variety and the quality was about better. Oats and Barley are also exhibited in great quantity and quality, while the showing of hand selected grain surpassed all expectations of the Committee. Potatoes are less in quantity but in quality were never excelled, to use the words of Mr. Moore, who judged these exhibits yesterday. The showing of poultry is good considering the season of the year. The Domestic Science exhibit is a display which alone merits a visit to the show. There is a splendid exhibit and great interest is taken in this branch of the Fair. Yesterday a large share of the judging was completed and the prize list follows this article. The public were admitted last evening and many took advantage of the opportunity to admire the display.

TODAY'S PROGRAM

10.00 a.m.—Formal opening of Fair by His Honor Lieutenant Governor Rogers and the Hon. Mr. Richards. 10.30 a.m.—Address by Justice R. R. Fitzgerald. 11.00 a.m.—Address and Discussion, J. A. Clark, Supt. of Experimental Farm—Field Crops. 2.00 p.m.—Address and Discussion, Prof. C. F. Alward, Havelock, N. B.—Seed Selection. 3.30 p.m.—Address, Seth Jones, Agricultural Dept., N. B.—Poultry. 4.00 p.m.—Address and Discussion, Harvey Mitchell, Dairy Branch Ottawa—Dairying. 7.00 p.m.—General Agricultural Meeting—Addresses by Rev. P. D. McGuigan, President of Seed Fair; His Honor Governor Rogers; His Worship Mayor Rogers; American Consul, Mr. Deedmeier; Prof. S. J. Moore, Maritime Representative of Seed Branch; Prof. Alward; Premier Hazard; J. A. Mathieson; The Honourable Mr. Richards; Mr. Carruthers; Mr. D. Innis, Tobique, N. B., and others. LADIES' PROGRAM. 10.00 a.m.—Mrs. Benjamin Rogers (Government House) Presiding—Opening Address. 10.30 a.m.—Paper and Discussion, Miss Dutcher.

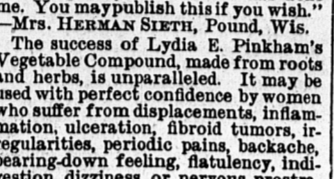

ECZEMA CURE A BEAUTY WASH

Although D. D. Prescription has been recognized for years as the only remedy for Eczema, Psoriasis, and other forms of skin diseases, it is now known that there is no other wash, even those used by the beauty specialists, that can compare with this mild liquid for cleaning the skin of pimples, blackheads, rash, and all the similar skin affections. For this reason alone, a bottle of D. D. should be kept on hand in every household. A free trial bottle will show you the merits of this great remedy as a complexion wash. D. D. seems to remove the cause, what ever the trouble may be, cleansing the skin, and leaving it as soft, as smooth and clear as that of a healthy child. Write the D. D. Laboratories, Dept. C. G., 49 Colborne St., Toronto, and prove its wonderful effectiveness. E. A. Foster Central Druggist.

DOCTORS FAILED TO HELP HER

Cured by Lydia E. Pinkham's Vegetable Compound

Pound, Wis.—"I am glad to announce that I have been cured of dyspepsia and female troubles by your medicine. I had been troubled with both for fourteen years and consulted different doctors, but failed to get any relief. After using Lydia E. Pinkham's Vegetable Compound and Blood Purifier for ten days I am a well woman. I can't find words to express my thanks for the good your medicine has done me. You may publish this if you wish." —Mrs. HERMAN SLEETH, Pound, Wis.

The excess of Lydia E. Pinkham's Vegetable Compound from roots and herbs, is unparalleled. It is used with perfect confidence by women who suffer from displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, bearing down feeling, flatulency, indigestion, dizziness, or nervous prostration.

For thirty years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills, and suffering women owe it to themselves to at least give this medicine a trial. Prying abundance of it has cured thousands of others, and why should it not cure you?

If you want special advice write Mrs. Pinkham, Lynn, Mass., for it. It is free and always helpful.

11.15 a.m.—Paper and Discussion, Miss McLeod. 3.00 p.m.—Paper and Discussion, Miss Ross. 4.00 p.m.—Paper and Discussion, Lads Dykes. A meeting held in Board of Trade Rooms, Market Building. The first meeting of the Seed Fair which was held in the Market Hall yesterday was a success. Rev. P. D. McGuigan, Tracadie, presided. The first speaker was Prof. Stevenson of Ancaster, Ont. His subject was Dairying. He pointed out first that conditions at present will not allow some to dairy but he said that in order to become successful a farmer had to keep the right kind of stock and feed them the products of his farm. He said that a lot depended on keeping the soil fertile. He pointed out that a farmer should separate beef and dairy cattle and not try to combine the two, and in doing so pointed out by means of a chart the impossibility of this on account of the difference in shape and appearance between a beef and dairy cow. He said that the milk of each cow should be weighed and tested so that the cows would be able to give more done away with and make room for better ones. He said that the fault did not lie with the feeder. He advised the farmers to pick out a good reliable breed and stick to that in order to avoid a mixed breed. Some questions were then asked by the audience and a lot of information gained from his accurate answers. Mr. Thomas A. Peters, Ottawa, was the next speaker. His subject was Fruit Growing. He said that ripe fruit was one of the most healthful of foods. Besides that, fruit growing yields greater profits per acre than anything else. He said that what yields an income of about \$25 per acre and oats about \$12 while fruit yields about \$100 per acre. He said that the question might arise as to the time lost from the time a tree is set out until it begins to bear fruit. He said that if properly set out the trees will only require about one-quarter of the land while the other three-quarters may be used for the regular crop so that it really does not amount to much in the long run. He said that the selling price of apples was not governed by the appearance, but by the flavor. He showed the best way to set out trees and to protect them from the rain. The roots should be kept covered until ready to set out in order to protect the small roots which take root first and keep the tree alive. He said that sometimes the land is cultivated too late in the season so that the tree takes on wood which is too tender to withstand the frost. A cover crop should be used to take the moisture which the tree would otherwise take up and then plough it down and cultivate it in the spring. He said that an advantage in fruit growing is the fact that almost all the enemies of fruit trees can be fought at the same time.

Prof. Ross, of the Dept. of Agriculture, Charlottetown, delivered a very forcible address on the Status of Agriculture. He said that something more should be done for agriculture than is being done at present on the Island. He said that the young men from the country are flocking into the towns increasing their populations and leaving a decided decrease in the farming circles. The result of this is that prices are advancing and making it harder for both parties. He said that the Press is becoming alive to the fact that the subject of Agriculture requires more attention than almost anything else. Ten years ago we had only three papers in Canada dealing with agriculture, while today there is more than a score. He said that in almost every farmers' meeting the question of agriculture is discussed with a view to obtaining scholarships so that young men might attend the Teachers' Association spent considerable time on the question at their last meeting. He pointed out the difference between Denmark and Prince Edward Island. He said that Denmark is seven times as large as

Prince Edward Island and supports twenty-one Agricultural High Schools while Prince Edward Island is not able to support one.

The speaker exhibited several carefully prepared charts showing the growth of agriculture in the different portions of Canada and the United States. John A. Dewar, M. L. A., was the next speaker. Referring to exhibitions as being closely connected with agricultural interests, he expressed the opinion that the small exhibition has proved to be the most beneficial, and he considered the country at large had not received good value from the money spent on provincial exhibitors. How can agricultural education be improved in Prince Edward Island? He considered that the system of education in the rural schools of the Province is not very good. This is not so much the fault of the system. The teachers are not paid sufficient salary; there is no inducement for them to remain permanently in any one place and consequently they are continually changing. The cost of living has gone up, and they can make more money in other professions. This has left the rural schools in a very bad condition. How this is to be remedied is the great question today; one that should engage the serious attention of the Legislature and all interested in the school system.

In dealing with the various elementary branches necessary for the making of a good citizen, the speaker remarked that it would not be out of place to have a text-book on agriculture, and teach the child a love of nature. If the farmer's sons are to be kept at home the fathers should take their sons into partnership, and cultivate in them an interest in all matters pertaining to agriculture. "We want an agricultural college here in our midst, or we could have one in connection with Prince of Wales College." If the farmers want a proper and thorough system of education they cannot get it without paying for it. The Chairman here invited any of the audience who desired to do so to address the meeting.

R. H. Campbell expressed the opinion that if a good system of agricultural education is to be built up here, it must be built on a strong foundation, and that foundation, in his estimation, is the elementary public schools. The farmers cannot expect their sons to be agriculturally educated in a school presided over by a girl, perhaps sixteen years of age, and receiving a salary of say \$130. It is out of the question. The son could learn a good deal more of agriculture from the farmer himself.

Other speakers were J. D. Seaman, T. P. Cullen and A. E. Dewar, whose remarks dealt with the necessity for better elementary education, the advisability of the establishment of an agricultural college in this Province, and the introduction of agricultural education in all provincial schools, with trained teachers to deal with agricultural subjects.

After a few additional remarks by Professor Ross and Rev. Father McGuigan, the meeting came to a close. The following is the prize list to date: PRIZE LIST. WHEAT. White Five—1, A. E. McLean, Southwest, Lot 16; 2, W. K. McGregor, Lot 16; 3, James Carruthers, Carleton; 4, A. A. McBeath, Marshfield; 5, N. Drummond, Brookfield; 6, E. J. Vespa, Little York; 7, W. B. Drake, Cornwall; 8, Locke Jones, Pownal; 9, Hector McLean, New Dominion; 10, Howard Parkman, New Glasgow. White Chaff—1, Horace Wright, Bedeque; 2, Duncan Stewart, South-
