

SHOOTING ACCIDENT AT JOHNSON RIVER

Rifle Bullet Aimed at Rabbit Hits Young Man Near the Eye.

A shooting accident occurred Monday afternoon at Johnson River which narrowly missed being a fatal one. A party of eight or nine young men went to the woods on a rabbit hunt. They were all armed with shot guns, with the exception of one who carried a rifle and when they overtook the rabbit the man with the rifle undertook to do the execution. He fired and when the smoke cleared away it was discovered that one of the party, Stephen Cumiskey, aged about 16, a son of Peter Cumiskey of Johnson River, had been hit. The bullet, which was very bad, struck the frozen ground, glanced striking him near the eye, fortunately a hair's breadth outside of the centre of the outer rim of the eye socket, and glancing upward. Had it been a fraction nearer the eye the bullet would have crashed through the head. As it was he received a bad cut and his companions at very bad scores. The wound bled freely and the injured boy was assisted to the nearest house, that of Peter Trainor, about a half mile distant. A doctor was sent for and on examination it was found that the bone had just been grazed. Four stitches closed up the wound and last night the young man was reported doing nicely. The incident is another warning to young hunters. A rifle is an exceedingly dangerous weapon, not particularly to rabbits but to the human beings or the animals, valuable or otherwise, that may happen to be within several miles of the sportsman. Shots should be fired as carefully as possible for rabbits and much safer for the neighbors.

MONEY POURING INTO NEW YORK

Millions Used in Crop Moving is Now Released.

(Canadian Press) NEW YORK, Jan. 7.—Money is pouring into New York in such an enormous volume that clerks in the large banks are working past the usual hours handling the golden deluge. At the treasury offices the strain upon the employees is especially heavy and the men are at their desks late into the night sorting United States notes and gold and silver certificates handed in for redemption. The currency is coming in from all directions especially from the middle west and south. This influx of money is usual at this season when large sums sent to the interior in the fall for crop moving are released. Millions were disbursed on January 1 in heavy first year interest dividend payments and return through usual channels. The tension in the money market the latter part of last year disappeared to-day when call loans made under three per cent.

STEAMER PILED ON ROCKS FORTY PERSONS DROWNED

Remarkable Run of Ill-Luck and Disaster Before Final Smash When She Finished the Job. Names of Drowned Unknown.

(Canadian Press) NEW YORK, Jan. 6.—Thomas A. Edison sat back in his chair and chuckled yesterday afternoon as there passed upon a screen in the theatre of his laboratory in West Orange, N. J., a procession of human beings and animals and played upon musical instruments and barked and made various other noises that moving pictures never before had furnished. It was a moment of triumph, the result of four years of unremitting effort to give to the world what probably was the (Continued on page three.)

Gleason, who sues for fees for defending Thaw at his first trial for the murder of Stanford White. The case in the district court was not reached to-day.

ROCKEFELLER ILL IN NASSAU FLA.

And Not Able to Give Evidence in Trust Robbery

(Canadian Press) NASSAU, New Providence, Jan. 7.—William Rockefeller has been staying at a hotel here since his arrival from Miami, Fla., on Jan. 2. Inquiries at the hotel bring the information that he is not well enough to be interviewed on any business affairs. It is understood he will remain at Nassau for some weeks. No intimation of his intentions re the money trust probing could be obtained. NEW YORK, Jan. 6.—The New York Press prints the following: William Rockefeller's view of his long evasion of the Pujos "Money Trust" investigating committee's subpoena was given to Deputy Sergeant-At-Arms Richard White by Superintendent Hawks of Rockwood Hall, the Rockefeller estate in Tarrytown. Hawks pretended to repeat the view of his employer. "The Pujos," said White, "explained Rockefeller's position to me in the following terms: 'Mr. Rockefeller is not defying the United States Government, but he'll be damned if he'll submit to being harassed by Sam Untermeyer.'"

ALLIES' DEMANDS BEFORE POWERS

(Canadian Press) LONDON, Jan. 7.—The Allies today placed their demands for a division of Turkey in Europe before the powers. The Greeks want all the Islands in the Aegean Sea. Serbia asks for the Eastern part of Sanjak of Novi-Bazar and the whole region eastward from the River Drina to lake Ochrida beside the City of Monstr. Montenegro wants the western part of Panjak and the districts of scutari and 20 miles additional coast line on the Adriatic. Montenegro is bound to get prompt occupation of Scutari and the possibility is the formation of a Balkan federation in reality as has been in sympathy during the war. A great federation of all the Balkan States in matters of tariff, defence, defence and external relations is looked for with the separate nations in the federation regulating their own internal affairs.

ENGLAND WILL BID WELCOME

OTTAWA, Jan. 6.—A despatch received by the government from the secretary of state for the colonies throws some new light on the proposal that the self-governing dominions be given representation on the Imperial defence committee. Mr. Harcourt's despatch is dated Dec. 10th, and was sent to the governors of all the self-governing dominions of the Empire. It shows that the proposal, as now likely to become effective, was considered during the Imperial conference of May, 1911. A resolution put forward by His Majesty's government having been unanimously accepted by the members of the Imperial conference at the committee of Imperial defence. This resolution provided for the invitation of one or more ministers from the respective governments to the Imperial defence committee, and for the establishment, in each of these dominions, of a defence committee to be constituted according to the decision at each dominion. Following the change of government in Canada, advantage was taken of the visit of Premier Borden and his colleagues to London to put these proposals before them, and Mr. Borden provisionally accepted them. It will be seen from the text of the despatch that Premier Borden reached an understanding involving an important addition to the arrangement already proposed, namely by providing that the representatives of the dominions on the Imperial defence committee be informed on all questions of Imperial policy.

FIRE CONDITIONS AT SPRINGHILL

AMHERST, N. S., Jan. 5.—The fire situation in the slopes here is improving from day to day. The company is busily engaged in shutting off the approaches in the mines from the fire section to the other of the slopes and it is expected that when this is done that the fire will shortly die out. This is the opinion not only of the officials of the company but also of the old miners—the men who were temporarily thrown out of employment are now at work in other parts of the mine and many of the men look upon the fire as rather a blessing, as it has hastened the opening of the new slope which the company has been proposing to sink for some months. Work has already been begun on this new slope and it will be pushed forward with all possible speed. D. McDonald, Glace Bay, and other officials of the Dominion Coal Co. recently visited Springhill, and the beginning of the work on the new slope is the outcome of their visit. Conditions are very much better in Springhill than they have been for some time.

WIVES LEVELLED ON ATLANTIC COAST

NEW YORK, Jan. 6.—Belated returns of the damage done by the storm of yesterday and last night, reaching the telegraph companies here today, revealed that a clean sweep of the wires had been made from Jacksonville, Fla., to Maine, and that the storm was the most severe of recent years. Thousands of men are at work today repairing the damage done to telegraph wires alone. Perhaps the greatest damage was done by the fall of the storm in East Buffalo, which levelled telegraph poles for a mile. A 60-mile gale raged there simultaneously with the passage of the main storm to sea from the New England coast. High winds prevailed today all along the northern Atlantic seaboard, but the wire trouble, it was reported, was slight compared to that of yesterday. The most serious instances today was the break near Philadelphia, of more than 60 near through wires between New York and Washington. Indications were that the wires would be in normal condition this afternoon.

DEVoured BY CANNIBALS

SYDNEY, Australia, Jan. 6.—Butchered by natives in New Guinea was the fate of two planters named James and Hermann Weber, brothers. They were set upon by cannibals who came from the unexplored regions. No trace of their bodies has been found and it is believed that they were devoured. The news was brought here to-day by friendly natives, who stated that the same tribe has been carrying on a campaign of butchery throughout the district. A punitive expedition has been planned by the Government. Papuans, the name given the black inhabitants of New Guinea, a British possession, under the rule of the Australian Commonwealth, are supposed to be amenable to discipline, but occasionally an outbreak of cannibalism occurs and whites are slaughtered. The more civilized Papuans have a wholesome dread of the British law.
