Happenings of The Week

Parlans enjoyed a flight from harsh reality over the Pentecost weekend when Princess Elizabeth and the Duke of Edinburgh paid an elaborate four-day visit to the capital. The visit showed that the French have lost none of their flair for staging galas with rare taste and imagination. For festivals and parades they also display a sense of organization which foreigners here feel is sadly lacking when it comes to business and office routine.

Only complaints during a sunny week-end came from the French press. They charged pompous protocol authorities with keeping them as far from the Princess as possible and the police with lunging at them with sticks. Gendarmes put up a stiff guard when the royal couple visited Versailles. The fountains were turned on the grass was specially manured, but the huge park was closed to the public and press. Reporters had to climb walls and crawl under hedges. One photographer tried unsuccessfully to disguise himself as a tree.

Every woman invited to the ceremonies honoring the couple had bought a "new look" costume. Not since prewar days has Paris seen so much chic. The latter charged costumes as often as three and four times a day. Her clothes were "new look," with full skirts and heels much higher than she wears in England. A sapphire and diamond clip worn with a deep blue ensemble, and a diamond clip pinned to an outfit of chateau-style worn with brown shoes and accessories, were particularly admired.

Mr. H. F. McPhee accompanied by his daughter Miss Eileen MacPhee were in Antigonish, N. S., this week for the closing of St. Francis Xavier at which Miss Mary is a student. Dorothy Dix Says—

Summer Camps

Idea Of Children's Resorts Gives Mothers Respite From Hard Work

Probably no greater contribution to human happiness and well-being has ever been made than the instituting of summer camps for boys and girls. Of all the inventions that the ingenuity of man has devised it comes the nearest to filling a long felt want. For it has provided an outlet for the energies of youth and thereby saved the sanity of innumerable mothers.

Time was when the mothers of children at the kid age looked upon the summer vacation with horror and dread. It was their stretch in purgatory when Johnny and Jimmie and Mary and Susie roamed through the house shouting and screaming like indians on the warpath, and when there was no peace nor rest nor quiet to be had by night or day.

It was a season when little savages defied all the rules of civilization; when they broke up all of Mother's cherished antiques to make bon-fires; when flower-beds were trampled down to make a waste of mud; when perpetually hungry youngsters gobbled up the cake prepared for company, and when Mother's nerves were worn to frazzles.

MORE ABOUT LOW-BACK PAIN

Low-back pain, often accompanied by sciatica, is so common that I write about it often so that many may obtain relief by getting an idea of the usual causes.

Low-back pain, due to infection or general disease of the body, is not relieved by lying down or by having the body assume any particular position. On the other hand, low-back pain due to injury, fall, slip, misstep or by poor carriage of the body, is relieved by lying down or putting the body in such a position that there is no "pull" on nerves and muscles of the lower back.

One of the causes of low-back pain due to faulty posture is that found in those men and women with a large abdomen. Thus in the "Quarterly Medical School, Dr. Samuel J. Lang states that if the overweight stands in the erect position, there is a deeper curve forward of the lower back, then a deeper curve backward of the upper back, together with a spasm and strain of all the muscles of the back which hold the spine bones together and the spine erect.

Despite the fact that the bones of the spine are out of line with one another, Dr. Lang states that the pain is probably due to soft tissue changes—such as muscle spasm or to inflammation of the ends of the muscles as they merge into fibrous tissue before they are inserted into the bones forming the joints.

What about treatment of low-back pain? Recent injuries, severe malformations of the spine, and disturbance of the disks between the bones of the spine are best handled by an orthopedic surgeon. The backache found in pregnant women demands adequate medical care. When the patient becomes convinced that obesity and weakness of the abdominal wall rather than pelvic displacements cause so many cases of low-back pain, she is willing to cooperate with her physician. Reducing the weight and simple abdominal exercises often relieve spasm and pain.

It must be remembered that infection—teeth, tonsils, gums, sinuses—is a very common cause of low-back pain.

Ellen's Diary

By an Island Farmer's Wife

Ending this strange but delightful week, our Saturday has been most unusual. One recalls that at home many tasks must be put in order for the Sabbath and also how this evening would reverently welcome its coming by a preceding quiet. Here the traffic continues to flow in an endless stream of machines. At the moment and easily recognized by its lights a great bus pauses almost below the window out of respect to a traffic signal at a cross-roads, then lumbers away with a changing of gears, into the darkness. This morning when ordinarily I would have been busy with my cleaning or perhaps looking for "the morrow" we attended the Movies, lunching afterwards at a favored Chinese eating place before going on to visit the stores. We ate chicken chow mein after my companions had deliberated at some length, but said with much consideration: "But Ellen's never eaten it. Will she like it?"

And as though one were to partake presently of ambrosia there were nods of assent and "Certainly Ellen will like it!" they said. Ellen did. It would have been most incredible on her part not to considerate her beaming appreciation. With an interest born of long service in pantry and kitchen I (Continued on Page 3)

Morning Smile

The nice old lady smiled at the little girl who had been left in charge of the cake shop. "Don't you sometimes feel tempted to eat one of the cream puffs, my dear?" she asked. "The little girl was quite shocked. 'Of course, not,' she replied. 'That would be stealing. I only lick them!'"

Sandy was learning to play the bagpipes. One night, while he was strutting about the room, skirling for all he was worth, his wife attempted a mild protest. "That's an awful noise you're making," she said. "Sandy sat down and took off his boots; then got up and resumed his piping in his stocking feet."
