FINAL CHAPTER OF **HURRICANE EXPRESS**

portance to our trade with Empire countries are indicated.

Figures clearly showed the trend toward increased trade with Empire countries. In the 10 months ended January 31 last imports from the British Empire were over 29 per cent of Canada's total trade as compared with 25.23 per cent for the previous corresponding period. Exports to Empire countries in the same period were 46.34 per cent of total trade as compared with 37.84 formerly.

"Imports from the United Kingdom, the chief gains have been in textiles, coal, manufactures of iron and chemicals," the Minister said. "So far as exports to the United Kingdom are concerned, important increases are being registered in many products of the farm, mine and factory."

Next to South Africa, Canada is now the largest producer of gold. Mr. Rhodes said, in discussing financial conditions in the Dominion. In this position she succeeds the United States. Canada expanded her output of gold from \$16,000,000 in 1913 to \$63,000,000 in 1932. It is estimated that the production for the present calendar year will be \$67,000,000.

With respect to the value of the Canadian dollar, the finance minister asserted that "it had been maintained at a moderate discount in terms of the United States dollar." It had been allowed to find its own level "and as a result it has been fluctuating about half-way between the United States dollar and the English pound." This might be a not unsatisfactory compromise" between those of our national interests which would be benefited by close and stable relations with sterling and those on the other hand which would be seriously harmed by a heavy and fluctuating discount in terms of New York."

ANNIE SOPHIA CAMPBELL HAZARD

Entered into rest on March 21st, 1933, Annie Sophia Campbell Hazard in her 77th year, dearly beloved sister of L. A. Hazard of this city and only daughter of the late George T. and Mrs. Hazard, also grand-daughter of the late James D. Hazard. Her life was one of devotion and loyalty to her family and she was ever ready to help or do for anyone in need. For several years she had been a sufferer from rheumatism which she bore with true Christian fortitude. As long as she was able, while living in Charlottetown, she was a regular attendant and Communicant of St. Paul's Church.

Besides her brother and family here she leaves to mourn one brother Harry and family in Wenham, Mass., the children of her deceased brothers, Herbert, Walter and George in Canada and the United States besides relatives on her mother's side. Mrs. C. H. Robinson and Mrs. Harris of this city are aunts.

No less than 3,216 persons have been prosecuted in six months for unnecessary noise.

"An Oil that is Famous—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

The general effect was very depressing. Indeed, I felt so wretched that I was about to give up work. nection with the 1930 crop, and also with respect to the banking accommodation guaranteed to the wheat pools in the three western provinces in connection with the marketing of the 1931 crop. In connection with the latter operations, the advances made by the banks and guaranteed by the government were repaid with the exception of small balances transferred to the present crop year, and no liability has accrued against the government in respect of its guarantee for the marketing of the 1931 crop.

"In response to urgent requests of the governments of the three western provinces, similar arrangements were effected for financing the 1932 crop and consequently, under authority of order in council of 20th September, 1932 p. c. 2077, passed pursuant to the relief act, 1932, a guarantee was authorized, subject to certain safeguarding provisions, of advances to the three provincial pools arising out of the marketing of last year's crop. In the case of the Manitoba organization, the limit of credit was established at \$1,395,000; for Saskatchewan, at \$15,000,000; and for Alberta, at \$9,000,000.

"Within the last few days, arrangements were made by which a guarantee was given to enable the pools to distribute an additional 5 cents per bushel to farmers whose grain of the 1932 crop is being marketed on the pool plan. This action was taken so that an increased percentage of the value of their grain might be available at seeding time. Under these guarantees, the liability of the Government accrues only after the crop has been marketed, and there is no ground for anticipating any less favorable outcome than in connection with the financing of the crop of the previous year.

"The guarantee of advances to Canadian co-operative wheat producers limited in connection with the 1930 crop remains in effect, and it was necessary during the past season for the company to increase its liability as a result of stabilizing transactions which it was considered expedient in the public interest to support. To these operations the government gave its guarantee. The steadiness which has developed in the wheat market has undoubtedly vindicated the action then taken and the question of ultimate liability will depend entirely upon the future course of wheat prices.

"By order in council of 28th April, 1932, P. C., 927, effect was given to an undertaking by which, in the month of February of that year, the Dominion guaranteed the chartered banks doing business in Winnipeg from loss in respect to the assumption by these banks of all liabilities of the Province of Manitoba savings office. The banks received from the Province of Man-

itoba as security for the assumption of such liabilities, 12,442 one-year 5 1-2 percent treasury bills, maturing 27th February, 1933, and on the maturity of these bills the banks were willing to accept a renewal, less the sum of \$334,098 paid on principal account, provided the guarantee was continued. This the governor in council authorized.

In connection with the Beauharnois power project, the Government has guaranteed advances of a principal amount of \$15,539,000 made by several of the banks to finance construction work. These advances are secured in practically double this sum by the deposit of first mortgage bonds of the Beauharnois Light, Heat and Power Company which, in the opinion of the Government, affords ample security.

"Finally, mention may be made of the assistance rendered jointly with the Government of the United Kingdom, which enabled Newfoundland to meet interest obligations due 1st January last. The commitment of Canada relates to the guarantee of a bank loan of \$625,000 bearing interest at the rate of 5 per cent.

tion of existing contracts." It is believed, he said, that the issue can be made at a rate which will involve "a substantial saving to the public treasury." He did not say when the loan would be floated.

Banking

A Royal Commission on banking will be appointed. It will go fully into the organization and working of the entire banking system of Canada with a view to revision of the Bank Act next year. The question of establishing a central bank in Canada will be studied. Conclusions reached by the commissioners will become the basis for study by the banking and commerce committee of the House of Commons next session.

The Government is prepared to cooperate with the chartered banks in lowering interest rates by reducing the rate paid on postal savings deposits. The Finance Minister declared in favor of reduced interest rates on savings bank deposits.

"In my judgment," he said, "this reduction is a necessary step if we are to reduce the interest rate on bank loans, on mortgages and on long-term bonds to a level where business recovery will be most effectively stimulated." He paid a tribute to the Canadian banks.

"Under the impact of the severest financial storm that history records, our banking system has fully maintained its enviable reputation, meeting every demand upon it and retaining the fullest confidence of the public," was the Minister's assertion amid applause.

the corresponding period a year ago. Mr. Rhodes found cause for congratulation.

"It is a matter of satisfaction of Canada among the great trading nations has been so well maintained," he told the House. In 1932 Canada had won back her position of fifth trading nation of the world. In 1931 she had dropped to seventh. Also, he declared, the loss in dollar value of total trade was not so great for Canada as for other important trading countries.

For the 11 months just ended, the trade of Canada had amounted to \$817,082,000, of which \$373,421,000 were imports, \$437,329,000 domestic exports, and \$6,332,000 exports of foreign goods.

The favorable balance of trade (excess of exports over imports) Mr. Rhodes placed at \$70,240,000. This, he said, was "a remarkable showing as compared with a favorable balance of \$23,490,000 in the 11 months of the previous year."

A trend toward increased trade with empire countries as a result of agreements entered into at the Ottawa Economic Conference was noted by the Finance Minister. While stating that the tariff agreements entered into at that conference had been in effect only a few months, he said that "significant developments of the utmost im-
