\*SCHOOL WORK.—The class standing of Annandale School for April, Grade V.—Mary D. Jenkins, Ruth Howlett, Dingwell Morrow, Grade IV.—Mary Howlett, Grade III.—(No. 1) Fred Morrow, Grade III.—(No. 1) William R. Howlett, Stella Howlett, Grade II.—Willie Banks, Grade I.—Mabel Robertson, Perfect attendance.—Dingwell Morrow, Mary Jenkins, Ruth Howlett, Mary Howlett, and Fred Morrow. L. Macdonald (Teacher).

\*TO ORGANIZE SCHOOL FAIR.—A meeting was held in Little Pond school, Wednesday, April 27th, for the purpose of organizing a School Fair among the schools of Cumberland Hill, Big Run, Annandale, Little Pond, Little River Fortune Head and Eglington. The teachers and pupils from the different schools were present. Mr. Cairns, the Inspector presided. He explained the benefits of a School Fair and gave the methods for preparing. The schools to carry on the work were elected from among the pupils and a well selected prize list arranged. The teachers and pupils feel sure of the hearty cooperation on the part of the parents and ratepayers which will make this their first fair the success they wish it to be.

\*ANNANDALE — The farmers are getting to work on the land and some are about ready for planting, as the land is getting in fine condition for sowing. The fishermen are quite successful, and they are also getting a nice lot of herring for bait. There has been quite a rush shipping potatoes recently, there being four or five vessels loaded already, and the price they are giving the farmers is quite a little for the schooner "Jessie" sailed on the 5th for Pictou with a cargo of potatoes valued at \$6,000. Mr. William Robertson, Big Run, was in Annandale last week on a business trip. Miss McCormick, teacher, is back to her school at Big Run after her recent illness. Mr. and Mrs. C. M. Howlett, Fortune Bridge, were in Annandale on Wednesday last.

**Quit Meat if Your Kidneys Act Badly**  
 TAKE TABLESPOONFUL OF SALTS IF BACK HURTS OR BLADDER BOTHERS  
 We are a nation of meat eaters and our blood is filled with uric acid, a well-known authority, who warns us to be constantly on guard against kidney trouble. The kidneys do their utmost to free the blood of this irritating acid, but become weak from the overwork; they get sluggish; the eliminative tissues clog and thus the waste is retained in the blood to poison the entire system. When your kidneys ache and feel like lumps of lead, and you have stinging pains in the back or the urine is cloudy, full of sediment, or the bladder is irritable, obtaining relief by taking a little of this medicine when you have severe headaches, nervous and dizzy spells, sleeplessness, acid stomach or rheumatism in bad weather, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning and in a few days your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys, to neutralize the acids in urine so it is no longer a source of irritation, thus ending urinary and bladder disorders. Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, and nobody can make a mistake by taking a little occasionally to keep the kidneys clean and active.

**Mr A.E. McLean on Taxation Bill**  
 The following is a report of the speech delivered by Mr. A. E. McLean on the Taxation Measure:  
**A. E. McLEAN;** Mr. Speaker: I am sure that we are all aware of the fact that we need more revenue and I may say in looking over the estimates submitted by the different departments it is appalling to see the amount of revenue required, more especially as we have to raise an additional amount of taxes for educational purposes. There has been some question between the different members as to the amount required, \$100,000, and I have no doubt that will be spent to carry on the schools as we hope to do. It will be the aim of the Government to improve education as far as possible and have a teacher in every school. In addition to that there is a pressing need from all other services. The public services have to be kept up.  
 We agree with the other side when they say they had no voice when they were in power. But we are still face to face with those increases and prices are still soaring and there is no doubt every department will require more funds for the coming year.  
 There is one thing which cannot be slighted, that is the public service of the country, such as Falconwood, our Courts of Justice, the Jails, and Prince of Wales College, expenditure over which we have no control and we have to meet the requirements of those institutions whether they be big or small.  
 The question of the mode of taxation has been discussed from different stand points and reasons advanced from both sides, and no doubt each member whether representing country districts or city, wishes as far as possible to see fair play and equally dealt out to the people he represents.  
 The Hon. Member for Charlottetown, Mr. Higgs, the gentleman who has just sat down made a strong plea for the working man of the town and I strongly agree with him, and there is no doubt the tax about to be imposed will be rather a heavy one for the people of the town who have not been contributing directly to the Government of the Province but have rendered contributions largely for the upkeep of civic affairs. This will also come with more or less of a shock to the young men of the country, and especially to families where there are more than one person over 21 years of age in the home or on the farm. I would wish my city friends to remember while we agree with them that there are poor men in the town still who have a hard time to get along. We all know the high price of everything at the present day; the laboring man in the country as well as the town is having a very strenuous time. Probably the same country have not advanced to the same extent as in the cities.  
 There is one thing that possibly I would like objection to and that is the poll tax, if that poll tax could be put on a graduated scale in some respects, where there are more than one man in a family the first one pay \$2.00 and the other \$1.00, I think that would be beneficial and would appeal to every one. The same thing could apply in the towns, and would I believe possibly improve the working of the bill and impose less hardship on families.  
 There are other features of the bill which I think are good and there are others which I would wish to reserve the right, when the bill is going through committee, to express my opinion on.  
 Different theories have been advanced with regard to the Fox Tax, Income Tax, and with regard to the re-valuation of the farms and what per cent should be placed on the farms. I myself am not very strongly in favor of re-valuation of farms. I would like a little higher percentage than a re-valuation. The plea has been set forth that farms have not been fairly and equitably valued. We may be still up against that if another system of valuation is being made, and it is pretty hard to see a real and just valuation of all farm lands of the Province.  
 Adjournd to 8 p. m.

will have to be uniform, as it would create dissatisfaction to have one amount for the town and another for the country and I trust the lowest possible amount will be agreed upon.  
 Now we hear a great deal about the prosperity of the farmers in this Province, and I grant you, Mr. Speaker, that the farmers are receiving an excellent price at the present time. But have you seen a farmer become immensely rich from his occupation? It is quite true that he makes a comfortable living, and through hard work and industry he builds up a comfortable home, but he has to practice economy to do it. Now under present conditions you must not think that the high prices received for produce is all profit. The farmer is of necessity a very heavy buyer, and look at the cost of machinery and all kinds of hardware today. He is buying nothing of other requirements; can the farmer today buy more goods at the store with his basket of eggs, or tub of butter than he bought previous to the war? I do not think so.  
 Another thing being such a heavy buyer he pays a larger amount of indirect taxes than people in other occupations.  
 If you can get the Dominion Government to pull down the Tariff Walls and admit the farm machinery free of duty that is imported to this country, the farmer will then pay and could well afford to pay any additional taxes that this act will impose. Some people speak about the farmer not paying as

**Won't Stain the Pockets**  
 The younger men, and particularly the better dressed men, prefer STAG Chewing Tobacco because it is so clean to carry, as well as so rich and satisfying in flavor.  
 STAG may be carried in the pocket without the need of it being wrapped.  
 All dealers have STAG, the flat Chewing Tobacco that is  
**"Ever-lastingly Good"**

much tax as the city man. Well we must remember that the man in the country has first to pay his School Tax, his Horse Tax also his Road Tax, which compares quite favourably with the Civic taxes in the city, so that all are about on a par as far as taxation goes. And we are sorry that any additional tax has to be added on either.  
 The Hon. the Attorney General spoke about the Fox Tax, and stat-

ed that taxes were a luxury, and all luxuries should be taxed. Now we have always been paying a pretty high tax on foxes, but I cannot see how they can be classed as a luxury to the ranchers of this Province.  
 The polls in their final state are no doubt a great luxury, but to the ranchers and ranchers here they are no more a luxury than cows, horses or other farm stock.  
 Now it looks to me that this tax will hit the industry pretty hard. A party may invest in one or two pairs and have no revenue from them, and still be taxed 1/2 per cent on them although they are putting him in debt every day.  
 Then take the case of the big company, they may have to have
