

THE MORNING GUARDIAN

MONDAY, AUGUST 5, 1901.

FRANCE STANDS FOR PEACE.

According to an article by M. Charles Seignobos in the International Monthly for August, dealing with the political parties of France, French politics are directed, not by parties, but by tendencies, and we should give heed not to the programs of political candidates but to the sentiments of the masses. French elections he tells us, are relatively pure. Not more than twenty out of 84 electoral districts can be carried by money. The masses are strongly for international peace, and "peace in Europe" is the one common program of all parties. This is assuring. The Franco-Russian Alliance is not valued as a means of possible aggression, but as a security against attacks from the Triple Alliance. There is a section that are hostile to the English, the Italians and the Germans and their sentiments find expression in a few Paris journals, Nationalist or Clerical, such as the Echo de Paris, Gaulois, Patrie and L'Intransigeant. "The foreign correspondents," says M. Seignobos, "who cut out these puerilities and telegraph them to their respective countries, are playing a very sorry role, for they preserve hatred and fears needlessly, and they give very poor information also, for they deceive their readers as to the condition of political opinion in France."

PROVINCIAL PROHIBITION SUSTAINED

A despatch from London brings the gratifying news that the Judicial Committee of the Privy Council has rendered judgment sustaining the validity of the Manitoba Prohibition Act. This result was from the first looked forward to and predicted by THE GUARDIAN, notwithstanding that the Court of King's Bench sitting at Winnipeg had declared the law to be ultra vires.

We had gone further than this in expressing our conviction that whether the Manitoba law was held to be good or not there would still be strong ground to hope that the P. E. Island Prohibitory Law would be upheld, inasmuch as it did not go so far and was in several respects a more cautious and conservative measure than that of Manitoba. There is now every reason for strong confidence in the validity of the Island law. The liquor sellers in Charlottetown would do well to heed the warning, pay their fines and quit their nefarious and unlawful trade. Their appeals and certioraries can only mean added bills of costs, in the end.

The decision will strengthen the hands of the Provincial Government to go forward and enforce the law they have given us. It will strengthen the confidence of temperance workers who may be expected to stamp out the rum-curse. The decision of the Privy Council was one to be expected from a body of judges, who from the first have taken an enlarged view of the powers of Provincial Legislatures.

Montreal's assessment commissioner expects to add three millions this year to the real estate valuation of that City.

The German wheat crop is unusually light this year, and Canada's crop is unusually heavy. They will need our wheat more than we will need their manufactures, says the Toronto World.

Mrs. Eddy, the head of the Christian Scientists, is 84 years of age and is said to have made over a million dollars out of the business. The earlier Christian healers, Peter, Paul and others, did not get rich by the cures they made, and did not boast of fake cures.

A well known liquor seller on learning of the decision of the Privy Council on prohibition Saturday afternoon announced his intention of quitting the liquor business for good. Another said he was glad it was settled. So far as THE GUARDIAN has been able to learn the liquor men now generally think the Island Prohibitory law will be declared constitutional.

It would not be possible in any other city in Canada, the United States or the British Islands that a man under sentence of heavy fine or imprisonment and with his fine unpaid should be at the head of the Police Committee. That disgrace is continued here from week to week by the forbearance of the Mayor who holds the power of dismissal but neglects or refuses to exercise it. Again we ask, How long is this scandal to continue? This is the second time of asking.

HAS STOOD THE TEST for over twenty-five years with thoroughly satisfactory results. Fuller's Blackberry Cordial may be relied upon as a remedy for all Summer Complaints, in Children and Adults.

The commitment of a witness to perjury, as recorded in THE GUARDIAN of Saturday, is a reminder to those who have hitherto dared to commit, or who may lightly contemplate the commission of this odious crime, that the law has not been dead though it hath slept. The crime has been unfortunately frequent in our midst, while the punishment has been rare. Within a generation past new conditions have arisen which have undoubtedly furnished new opportunities and perhaps new temptation to false swearing, notably in connection with the election courts and with trials under the liquor prohibition acts.

The crime of wilful and corrupt perjury is defined by Sir Edward Coke to be a crime committed when a lawful oath is administered in some judicial proceeding to a person who swears wilfully, absolutely and falsely in a matter material to the issue or point in question. The crime is one that has been in all ages and in almost all countries regarded with abhorrence and severe penalties have been prescribed for those found guilty of it. The reason is apparent. So long as our courts are guided by the testimony heard before them it is vital that the sworn witnesses shall tell the truth, the whole truth and nothing but the truth. False testimony may blight a fair reputation, may deprive a good citizen of his property, or of his liberty or may send an innocent man to the gallows.

Perjury may, in the blackest of crimes be a crime as grave as murder. It is absolutely necessary for the protection of social order and the rights of the individual that perjury shall as far as possible be prevented, and that when a witness swears falsely he shall be punished. We need not here enlarge upon the moral depravity, the sacrilegious character of one who can deliberately call God to witness to a lie. We have reason to believe that the crime is increasing in frequency in our midst and we most earnestly hope that the solemn and weighty words of the Master of the Rolls as recorded in our columns Saturday morning may have a wholesome effect in arousing the public conscience in regard to this matter.

A great change is coming over the railway passenger traffic of the United States and Canada, especially in the vicinity of the great cities and in the thickly populated districts. This is being brought about by the extension of the electric trolley lines. They carry passengers for about one cent per mile while the steam railways charge three cents per mile. Year by year the trolley lines are extending farther afield and are making connections with each other, until now the cheap service covers a wide area of country. Apparently the great railways prefer rather to lose this traffic than to reduce their rates.

New Color in the Cheeks Richness in the Blood

And Health, Vigor and Strength in the Whole System When Dr. Chase's Nerve Food is Used.

Palleness of the gums, lips and inside of eyelids, nervousness, weakness, indigestion, headache and despondency are the symptoms common to chlorosis and anaemia. These symptoms indicate that the blood is thin and watery, and does not contain sufficient nourishment—symptoms that disappear when Dr. Chase's Nerve Food is used to build up the body and fill the shrivelled arteries with rich, red, life-sustaining blood. Dr. Chase's Nerve Food is a special formula devised especially for all diseases arising from an exhausted condition of the blood and nerves, and has proved signally successful as a cure for anaemia and chlorosis.

In fact it cannot fail to cure these ailments, because it goes directly to form new red corpuscles in the blood, and so nourishes and restores the system to health and vigor. It is of incalculable worth to women suffering from the weakness and irregularities peculiar to their sex, and is evidenced by the grateful testimonials published from time to time in the daily press.

Dr. Chase's Nerve Food, the great blood builder and nerve restorative, 50 cents a box at all dealers, or Edman-son, Bates & Co., Toronto.

THIS Hot Weather

We have been too busy to advertise but we call your attention to the fact that we are serving

Ice cold, well flavored Soda to a thirsty public.

Our soda is as it always has been—pure, ice-cold, sparkling, our flavors are unexcelled.

Repair Work.

One of our great Specialities

Our business has been so great for past few months it has been almost impossible to turn out our orders on time. The question naturally arises. What is the reason of so great a rush? The reason is plain, our plant is fitted throughout with the latest Modern Machinery and employing none but first class workmen. We are in a better position to turn out work in a satisfactory manner than any other establishment on P. E. Island.

We have the facilities and know how to execute the work. Give us a trial and be convinced of the merits of our work.
