## Kings County Liberal Association

The Annual Meeting of the King's County Liberal Association will be held in the Town Hall, Georgetown, on **Monday, September 21st at 10 A. M.** for the Election of Officers and general business.

On the same date and place at 1.30 P. M., a Liberal Convention will be held to nominate a candidate to contest Kings County, in the Liberal interests at the forthcoming Federal Election.

Poll Directors will please call meetings to elect five delegates to attend this Convention for each organized Poll—in the event of a poll being divided and no separate organization for each division such poll or polls will be enabled to send ten delegates.

Poll Directors will please supply their delegates with certificates of their appointments. Without such certificate delegates cannot be recognized.

**W. L. POOLE, T. V. GRANT,**  
PRESIDENT. SECY-PROTEM.

## The Charlottetown Fox Breeders Protective Association

Organized by a group of Fox Ranchers in the vicinity of Charlottetown for the purpose of giving financial support to each other for the prosecution of parties who molest or steal from the members' ranches.

Protective Measures include:

**MAN-TRACKING BLOODHOUNDS  
BEST DETECTIVE AGENCY IN CANADA  
BEST LEGAL TALENT**

All ranches will bear the official placard. List of members is:

- "Unionvale," MacLure and MacKinnon, Union Road, P. E. I.
- "Vimy," Prowse and MacKinnon, Norwood Road, P. E. I.
- "International Foxes and Furs," W. Chester S. MacLure, Marshfield, P. E. I.
- "Bovyer Ranch," Franklin Bovyer, Bunbury, P. E. I.
- "North River Ranch," W. K. Rogers, North River, P. E. I.
- "Dalton Ranch," W. K. Rogers, Southport, P. E. I.
- "Bellevue Ranch," W. K. Rogers, Tea Hill, P. E. I.
- "Flood Ranch," W. K. Rogers, Southport, P. E. I.
- "Smallwood's Ranch," W. K. Rogers, Southport, P. E. I.
- "Farquharson Fox and Fur Farms," P. A. Farquharson, East Royalty, P. E. I.
- "Lawndale Ranch," C. L. MacKay, St. Peters Road, P. E. I.
- "MacDonald Ranch," J. A. MacDonald, Southport, P. E. I.
- "Silver Sheen Ranch," Walter S. Grant, Marshfield, P. E. I.
- "Brow Ranch," E. R. Brow, East Royalty, P. E. I.
- "Saunders Ranch," E. Saunders, Newstead, P. E. I.
- "General Fur Farms Ltd., Mount Edward Road, P. E. I.
- "General Fur Farms Ltd., North River Road, P. E. I.
- "Charlottetown Silver Black Fox Co., Ltd., Mount Edward Road, P. E. I.
- "Jenkins Ranch," J. D. Jenkins, Charlottetown Royalty.
- "Hopeton Ranch," W. A. Mutch, Southport.
- "Greenacres Ranch," Ray Clarke, Union Road, P. E. I.
- John Agnew Fur Farms, Brackley Pt. Road.
- Wm. L. McEachern, Mermaid, P. E. I.
- John Roper, Sherwood, P. E. I.

## THE EASTERN GUARDIAN

**SHOP from Holman's Catalog.**

**FAREWELL PARTY**—A pleasant and enjoyable farewell party took place at the residence of Joseph V. McPhee, Clear Springs, Tuesday night, the occasion being the returning to Boston of Mr. Trohon and party, who were paying Mr. McPhee a week's visit.

**THE ST. MARGARET'S DRAMATIC CLUB** staged their popular play "Aunt Jerusha on the War Path" at Cardigan, Tuesday night, with very great success, the proceeds going towards the augmentation of the building fund for the new proposed St. Margaret's Church.

**SERIOUS LOSS**—Mr. Foster Robertson of Montague, and the misfortune recently of losing a horse, the only one he had and his main stay in carrying the mail. This is a very heavy loss to Mr. Robertson, especially at this season of the year, when high prices are asked for horses. Mr. Robertson is the mail courier for the Brudenell route and a courteous, obliging and above all a thoroughly honest official, and if the people of this route are at all appreciative they will come to the rescue, a dollar from each of the prosperous farmers of Brudenell would not be missed at the same time helping Mr. Robertson out wonderfully. Knowing the farmers of Brudenell as he does the writer, is in hopes to be able to report in the course of a few days, where Mr. Robertson was waited upon by the box holders of this route and presented with a well filled purse. J.

**EASTERN AGENT**—Mr. J. W. Murdock is now Guardian agent in Montague and will be pleased to receive news items, advertising, Job Printing, new and renewal subscriptions.

**PRESBYTERIAN SERVICES**—During the absence of the Rev. D. McVicar, who is enjoying a much needed rest, The Rev. A. S. Stewart will preach every Sunday to the Presbyterians of Montague and Cardigan, during the month of September. Mr. McVicar expects to be back first Sunday in October. J.

**VISITORS RETURN**—Dr. and Mrs. J. A. Lacourriere of Montague and as their guests during the early part of September, Mr. Francis Duquette of St. Simons, Quebec, and Miss Alice Lacourriere of St. Tite, Quebec, the former a sister of Mrs. Lacourriere and the latter a sister of Dr. Lacourriere. This is the first visit of these two ladies to this province and so impressed were they with the climate, the acquaintances they formed, and the picturesque and beautiful situation of the Doctor's residence, that their stay here of about ten days was far too short. Next year they will not only return themselves but will bring a number of others and spend practically the whole summer here. J.

**MARGARET'S FAMILY REUNION.**

A year in advance, Margaret's home had been selected as the most central place for the next family reunion; so she had a year to plan for it. She felt so highly honored she wanted it to be the biggest success possible. But her house was tiny and her health not so vigorous that she could stand a week of strenuous preparation. So she decided to make her ingenuity and judgment substitute for her lack of room and strength.

For a program she asked five of the oldest members of the family to tell "What Our Home Was Like in my Childhood." This was very instructive to the young people and revived sweetest memories to the elderly.

She had written to each home and asked for baby pictures of every member of the household. The guessing contest over these was the cause of much merriment and recalling of happy days when there were babies. It also brought forth great astonishment as to "How much little Jack looks like John's baby picture," and "Betty is the exact image of Great-Grandmother Smith in her babyhood," and so everybody felt more closely related.

There were thirty-seven in the whole company. She solved the sleeping problem by putting up three tents in the yard, and setting up cots in these and on the porches and in the bedrooms. She asked each auto-load to bring a supply of blankets and pillows. (There made the journey more comfortable anyhow.)

Instead of the usual reunion dinner with its hodge-podge of pickles, pastry and knick-knacks which give everybody indigestion, she wished they might have a really well-planned meal, so she applied her brain to that. The result was a menu consisting of hot buttered rolls with creamed chicken, sweet potatoes and two other vegetables, salad, a hot drink, and two desserts. There was not too great a variety, but plenty of each dish served. The meal was hot and satisfying and did not leave the eaters feeling like stuffed cabbins. It had been easy to prepare, as one article only was allotted to each house wife.

After dinner there were games in the yard and lots of pleasant association. The family voted it the easiest and the jolliest reunion they ever had—and Margaret got away with it without spending the next few days in bed.

**SCHOOL CLOTHES.**

The child who is too elaborately dressed at school is likely to become self-conscious and a snob. A shabby child will cultivate an inferiority complex, be shy and backward and this is equally bad. It is best to dress a child so inconspicuously that he will forget all about his clothing.

The clothing of a child should be so loose and easy as to permit freedom of activity. It should be of a modest color, and one which will not fade and will stand laundering. The material should be durable; as a school child gives his clothes the hardest wear. Each garment should be made in a way to be enlarged to keep pace with the growing child. It is really a pity to make it just fit when it is new and then hand it down the line to little Jennie when it is half worn out. Poor little Jennie!

It is cheaper—as a general rule—to make the garments of the best home and with the simple styles popular to-day. They can be just as attractive. Children are very conscious of their defects. A plump child should have a dress with long lines, and a too slender child a dress which gives the appearance of breadth.

A first consideration in planning the clothing of a school child is the ease with which it may be kept clean and in repair. Fussy or delicate clothing is absolutely inappropriate.

Most school-rooms are kept at a higher temperature than would be too heavy. Some mothers dress their little girls in gingham all the school year. These come from the laundry fresh and as good as new, but it is such a task to do washings in cold weather, and gingham does increase the family washings.

Children have a habit of running out of doors without any bundlings. For this reason wool dresses are desirable as they protect from sudden chills. Wool dresses keep their color well, save much laundering, and look comfy in cold weather. It is possible to get wool goods so firm that it may be laundered a time or two during the season, if necessary.

A dress of material color will usually give better satisfaction for longer, as the wearer will not become tired of it or known by it among her friends. For variety or touches of color, one may resort to a tie, a string of beads or some simple decoration.

**DOCTOR SOL.**

"Those who live in glass houses"—not only should not throw stones—but they are missing a health asset, the ultra-violet ray. Old Sol does more than make life cheerful; he makes it healthful.

Light can be divided by the prism into red, orange, green, blue, and violet. At each end of the prismatic spectrum are invisible rays—the infrared at the red end which produces heat; and at the violet end, the ultra-violet and the x-ray.

These latter have a powerful effect on living matter, destroying bacteria and helping to cure skin diseases, rickets, and tuberculosis.

When sun baths are given, the color rays and the heat rays pass through, but the ultra-violet rays do not.

Draw your own conclusions about the value of the sun parlor as a curative room. Science is disclosing that sun baths are powerful agencies of health. The weakling baby especially needs his sun bath, and it may be begun when he is three or four weeks old.

The first day, expose baby's hands to the sunlight for a few minutes. But do not let them get burned. A slight reddening will result, but this will gradually change to a coat of tan. Beginning with ten minutes, the time of exposure can be lengthened from three to five minutes daily.

Never let the sun shine directly in baby's eyes. The amount of body exposed to the sunlight may be gradually increased. The head should be protected if the sun is very hot.

Loneliness' barefoot boy, with cheek of tan" had a wealth of health denied to some of our pampered darlings of today.

The need of sunlight does not cease with childhood. Elderly people particularly need it, and the middle aged would be more vigorous if "sunkist."

**FALL FASHIONS.**

For some time past there has been a noticeable tendency toward more fullness in the fashionable silhouette. Circular godets were about the first successful departure from the tubular mode and have become increasingly popular. The flounce dress, too, makes the progress of the flare. And now—most daring innovation of all—comes the dress with elaborate back fullness. This, indeed, appears as something very different now when we have grown accustomed to the perfectly plain back of Fashion, who, for so many seasons, has lavished her undivided attention on the front of the frock.

## It's here--Your Fall Hat!

WINDOWS full of them—store brimming over with them—here you'll find the hat in shape, in shade, in finish, that will appeal to you. Surely enough variety to satisfy every possible desire, in the feature groups that offer value plus—and quality plus.

### Scientific Facts

**NEWEST NOTES OF SCIENCE.**

India has become the second largest sugar producing country.

A magnetic tool has been invented for setting brads in wood.

Denmark is establishing its first plant for making artificial silk.

A gasoline torch supplied with it heats a new hair curling iron for home use.

Chile's first electric railway is a 25 mile line from Santiago to Talcahuano. There were almost twice as many births as deaths in the United States last year.

Success has attended experiments in Palestine in the cultivation of high grade tobacco.

An attachment has been invented that converts any ordinary claw hammer into a pipe wrench.

American interests will build modern water works for Athens, Greece, to cost \$1,000,000.

An acid proof cement for lining tanks, applied while in molten state has been invented.

After extensive research German chemists have produced a new motor fuel from coal and wood.

A new circular eraser is revolved by pressing a plunger at the end of the handle carrying it.

While it is the smallest nation in South America Uruguay also is the most densely populated.

An inventor has patented a case to be strapped to a person's wrist to hold pens and pencils.

An advertising card used by English automobile builders when folded up forms a toy model of their car.

Concrete pipe for sewers is being made 108 inches in diameter and weighing 220 pounds to the foot.

Work will begin in the near future on the electrification of suburban railways radiating from Bombay.

Its designer has patented a rural mail box post formed and colored to represent a figure of Uncle Sam.

The government of Yugoslavia will establish a large broadcasting station near Zagreb for official use.

The law of a new pipe wrench can be taken out and reset to enable it to turn pipe in either direction.

Germany has abandoned its unsuccessful attempts to spin kapok fibre as a substitute for cotton in textiles.

Milk can be tested for its butter fat content with a new electrical process developed by an Ohio scientist.

Hydraulic mixing is being used in

Finland to obtain peat from the bogs, the washings being pumped to the yards and dried.

An inventor has given a kitchen table a reversible top, one side being made of porcelain and the other side of hard wood.

Hawaii has established a plantation for the cultivation of trees yielding an oil useful in the treatment of leprosy.

Scientists have estimated that a man sixty years old has consumed nearly five tons of carbon to maintain his body.

Plans are under way for constructing a canal for 100 ton barges from Birmingham, England, to the sea, 83 miles away.

A metal guard has been invented to protect the hand of the user from being cut by the back of the blade of a paring knife.

Speeds up to a mile a minute have been made in France by shallow draft boats drawn over the water by airships.

A process for converting shark skins into waterproof leather is mounted on two flexible cone hubs, one of which is attached to the axle.

Plans are under way for harnessing the Bann river in Ireland for one of the most powerful hydroelectric plants in the United Kingdom.

An automatic locking device has been invented for street manhole covers to prevent accidents due to them being displaced by vehicles.

A German has invented a sled to be towed over the bottom of waterways by boats to carry divers, who can partially control its course.

An attachment for pocket electric lamps has been invented that enables them to be used to set off flashlight powder for photographers.

The Swiss government has authorized the complete electrification of its railways by 1928, five years earlier than originally planned.

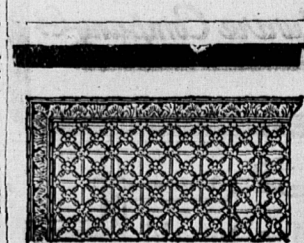

Metal clamps lined with sheet rubber

that can be applied quickly have been invented to temporarily stop leaks in fire hose while in use.

Of English invention is a baby carriage that also can be used as a bath tub and that folds to about the size of a suitcase for carrying.

An electrically warmed fountain pen has been invented for use in temperatures so low that the ink in an ordinary pen would not flow freely.

The island of Barbados will revive the cultivation of aloes, abandoned there a few years ago after being carried on for more than 250 years.
