

BUFFALO'S PAN-AMERICAN EXPOSITION.

Horticulturalists have abundant reason to feel a lively interest in the great Pan-American Exposition to be held in Buffalo, N. Y., in 1901. In the embellishment of the grounds the architects have planned to surround the buildings with a variety of trees and shrubs, foliage and flowering plants in quantity to dazzle the lovers of horticultural displays. The extensive grounds of the Exposition afford a magnificent room for the elaborate pageantry of the Exposition grounds. There is here contemplated. There are nearly 350 acres in the Exposition site which about one-third are the improved lands of Buffalo's beautiful Delaware Park. Upon the park lands many thousands of dollars have been expended from year to

formal flower beds wherever their presence will enhance the beauty of the courts. The various buildings of the Exposition are to have red tiled roofs and the walls are to be tinted in a variety of colors so that the brilliancy of the architectural works will vie with the blossoming beds to fascinate the lovers of fine color effects. Among the flowers and foliage plants will be many sparkling fountains to enliven the beautiful scene. The water features of the Exposition include a Grand Canal more than one mile in length which completely encircles the main group of buildings. Lagoons with sodded banks and shaded with a variety of trees shoot off

The gates of the Exposition will be opened on May 1, 1901, and closed on November 1 of the same year, giving six full months for the enjoyment of the wonderful displays there to be assembled. The buildings of the Exposition comprise more than 20 large architectural works and the smaller buildings are numbered by the hundreds. The largest of the buildings are those devoted to Machinery and Transportation and Manufactures and Liberal Arts, each covering about four acres. The Agricultural Building will cover nearly two acres and the Electricity Building the same. The Main Government Building is 600x130 feet, with a dome 250 feet above the main floor. The

capacity of 25,000 people and will contain a quarter mile track and abundant room for all the modern athletic contests. The live stock display will cover about 10 acres, and to the "Midway" or pleasure ground about 20 acres have been allotted. The Electric Tower, which is to stand in a broad aquatic basin will be 343 feet high, the main portion of the tower being 85 feet square. The position of the Tower is between the Agricultural and Electrical Buildings, dividing the Court of the Fountains from the Plaza and it will be the centerpiece of the Exposition. It is intended to have the electric displays the most elaborate ever undertaken. The nearness of Niagara Falls makes this possible, on account of the unlimited power developed from the great cataracts and transmitted to Buffalo by means of large copper cables. It is expected that

between five and six million dollars will have been expended on the Exposition buildings and grounds before the installation of exhibits begins. The work of preparing for this great, All American display is proceeding with commendable speed and system, and the plans are such that it will be completed in ample time for the opening of the gates on the date announced.—MARK BENNETT.

Andre's Expedition.

St. John's Nfld., May 9.—The consul of Sweden and Norway here offers a reward to any and all persons who may find articles connected with the Polar expedition of Herr Andre, the aeronaut. The reward is especially directed to whalers bound from this port for Davis' Strait, which connects Baffin's Bay with the Atlantic and to fishermen proceeding to the coast of Northern Labrador next month.

The impression is that Andre may possibly have reached some region touched by Newfoundland whalers, or fishermen, from which relief might be obtained from the Eskimos.

THE PAPER FAMINE.

Publishers Moving to Have Duty Removed.

Representations have been made to the government in favor of striking off for a time the duty upon newspaper, as a means of allowing Canadian newspaper publishers to obtain the large supply that is required, a supply which the Canadian paper manufacturers, since the destruction of the Eddy and Laurentides mills will not be able to meet. One direct result of the Hull fire was a sharp advance in the price of paper, and the newspaper publishers say that further advances in the price will be made unless some chance is given to bring in the foreign product. It is tolerably certain that both the Eddy and Laurentides mills will be in full blast again just as soon as the buildings can be restored and the machinery installed, so that the cutting off of the duty need be no more than a temporary measure. The point upon which the newspaper publishers will rest their plea is that the plant of the remaining Canadian mills is not large enough to meet the domestic requirements, and figures will have to be produced to back up this statement.—Ottawa Free Press May 8th.

Cumso—One thing may be said in favor of the English generals in South Africa. Cawker—What is that? They haven't begun to write for the magazines.

THE CLOSING DAYS

Of Life's Journey Need Not be Spent in Weakness.

Dodd's Kidney Pills Build New Tissue to Replace the Worn-Out Ones—Thus They Keep the Body Strong and Healthy.

St. JOHN, N.B., May 11.—When old age begins to creep upon us the infirmities of life make themselves felt. It is then that terrible effects of the follies and excesses committed in our younger days, appear.

The vital forces are weak, the stream of life is gradually drying up. The silver cord will soon be loosed, and ere long the golden bowl will be broken.

The aged and the ageing have not enough vitality to make up for the daily wear and tear. Thus many days, yes, many years, of life and strength are lost, are allowed to slip away from us, when they might be retained, to add to the sum of our earthly happiness.

By stimulating the kidneys, and restoring them to sound health, Dodd's Kidney Pills keep off the breaking-down attacks of old age.

By putting the Kidneys in good health, Dodd's Kidney Pills ensure a full supply of pure, rich blood, on which the broken down nerves, muscles, bones and tissues feed, and which makes new tissue to replace the old and worn out matter.

Dodd's Kidney Pills thus renew the system, by entailing the provision of abundant material for the creation of new tissues; they also fortify the body against the attacks of disease and old age, by keeping the Kidneys in condition to supply the needs of the system, in the way of nourishment.

Use Dodd's Kidney Pills and be young. They will make new bone, muscle and sinew, give strength, vigor and staying power.

Try Dodd's Kidney Pills, it will cost you only fifteen cents.

PLANT LINE
... TO ...
Boston.
Commencing May 8th, the "Favorite" S. S. "HALIFAX"

Will leave Charlottetown for Boston every Tuesday at 11 on [standard time] calling at Hawkesbury and Halifax.

Returning will leave Boston every Saturday at noon.

Passengers leaving Charlottetown Wednesday morning via Picton, make close connection at Halifax with S. S. "Halifax."

CANADA FAMED AFAR.

An Australian Firm Orders More Japanese Catarrh Cure from the Proprietors of this Well-known Remedy in Canada, and Tells of its Unequalled Merit. Wonderful Results on Every Case Tried.

Messrs. Chas. Cornell & Co., 247 Copen street, Richmond, Victoria, Australia, write:—"Enclosed please find 10s. for six boxes of Japanese Catarrh Cure, which kindly mail to us at your earliest convenience. Some time ago we purchased a small supply, and must say that it has given very satisfactory results on every case tried. It certainly is an article of undoubted merit. We are sure if its wonderful merits were known more widely here a large sale would be established in this country."

The proprietors of Japanese Catarrh Cure are not only receiving the strongest letters of gratitude from the catarrh afflicted in every town, village, and city in Canada, but from every State in the Union. Japanese Catarrh Cure is the only remedy ever known to cure chronic catarrh. If cure after cure has been used without success, you will not be disappointed with Japanese Catarrh Cure. All druggists, 50 cents, or mailed post-paid by the G. and M. Co., Limited, 121 Church street, Toronto.

THE PAN-AMERICAN EXPOSITION.

year to in the past in maintaining and improving the variety and display of rare plants and trees. This portion of the landscape includes a park lake of irregular shape. It is charmingly picturesque when the shores are clad in their summer garb of foliage. This part of the park will receive special attention in preparation for the coming Exposition.

Lying directly north of the park lands and upon a higher elevation is the remainder of the Exposition plot. Included in the plan for the arrangement of the buildings is a magnificent court 3,000 feet long with a transverse court 1,700 feet from east to west, besides subordinate courts. All of these open spaces are to be beautified with palms and other tropical plants in tubs and vases placed near the surrounding buildings and beside the fountains and ponds. To these will be added sunken gardens of elaborate arrangement, and

from the main canal at various points and add their beauty to the landscape effect. The entire outer wall of the Exposition grounds is to be a bank of solid foliage. Many thousands of trees, shrubs and cuttings have already been planted in preparation for the elaborate horticultural features. Large trees which fortunately were already upon the Exposition-site have been preserved by transference to places where their stately shafts of green would heighten the color effect in contrast with the brighter hues of the buildings.

The building to be devoted to the Department of Horticulture, of which Mr. F. W. Taylor is chief, is 223 feet square. It has two areaded wings sweeping from the north and south facades to the eastward and connecting with other buildings to form a semi-circular court. West of these arcades are the conservatories in which will be displayed the palms and other plants of tropical origin. The arcades leading from the main building will be kept gay the entire season with flowering and ornamental plants. The large building will be used for the display of fruits and various other exhibits pertaining to horticulture. It is expected that the State of New York will spend at least \$10,000 in aiding the horticultural societies of the State to extend and replenish their exhibits during the season of the Exposition. The Horticultural Building will be one of the most picturesque of the entire group of large Exposition buildings. The loggias which form the eastern entrance will be richly adorned with frescoes. Two of these compositions will represent Ceres, the goddess of the harvest, bearing in her arms a sheaf of wheat, her chariot drawn by three lions led by Flora and Primavera.

The exhibits to be made by the leading florists of the United States will be situated south of the Horticultural Building. To these displays some six or seven acres of land will be devoted. William Scott of Buffalo, a prominent florist and well-known contributor to literature upon flowers, will have charge of the floral exhibits. Several prominent horticulturists have already entered for the competition of 1901. In these displays there will be over 500 beds in which will be shown every popular flower known, from the low growing verbena to the stately dahlia and hollyhock. There will be large exhibits of hardy perennial plants, such as the Delphinium and Helianthus, Phlox, Tritoma and other leading hardy flowers. Of the hardy annuals there will be many examples of choice varieties that do so well in our summer months. There will be numerous specimens of the summer climbers, conspicuous among which will be the new varieties of the Clematis. The water gardens, of which there will be a number in various parts of the grounds, will be important and attractive features which will include in their displays besides the mammoth Victoria Regia of the Amazon and the Nilibiums of the Nile, many Nymphaeas never before exhibited. When at their best there will be special exhibitions of roses, dahlias, gladiolus, sweet peas, chrysanthemums and other popular flowers. Exhibits from all the large growers of the country are assured.

Horticulture has made wonderful strides within a very few years and many of the floral specimens which will be seen at the Pan-American Exposition were not in existence at the time of the World's Fair at Chicago. The displays of the new popular canna will surpass anything yet seen either in America or Europe. One may therefore confidently expect this Exposition to be, from the view point of the horticulturist, the most brilliant ever held.

HERE IS YOUR CURE
I read of Dodd's Dyspepsia Tablets and tried them, the first dose relieved me. The second relieved me much more. Two boxes cured me completely.
To-day I am sound and well, strong and healthy, thanks to Dodd's Dyspepsia Tablets.

DEAR MADAM:
If you want a Toilet Set to complete your house-cleaning arrangements this spring, we want to tell you that we have all kinds and shapes and shades. We feel sure that you will find one here to suit your taste. We are sure you also that the prices will suit your pocket-book.
Yours Respectfully
W. P. COLWILL,
Sunnyside.

Farm for Sale.
100 acres very fertile land in southern portion of the Warren Farm—about 18 chains wide and 53 long—about 15 acres clear and in high state of fertility. 10 acres ready to stump. Good look the most beautiful Bay and Charlottetown. Bay—Plenty of seaweed.
Also in September next 50 acres of the Northern Portion of the Warren Farm in now occupied by Mrs. Margaret Miller and known as "Kingswood".
This property is in good condition—is within 5 minutes walk of R. C. Ferry Point Wharf and Ferry—and fronts on Charlottetown Harbor. Particulars apply to JOHN HARBOR, Charlottetown. May 10 1002 & w 11

lesser buildings of this group are each 150 feet square connected with the main structure by curved arcades, the three structures enclosing a semi-circular court which opens to the West. The Ethnology Building and the Temple of Music are each to be about 150 feet square. The Stadium or sporting arena with the ornamental building which forms the entrance, will cover about 10 acres. It will have a seating ca-

SUMMER SUITS

FOR MEN ARE HERE

—IN— THOUSANDS,

Choose yours at once. \$5.00 is enough, but \$10.00 would be better, \$12.00 good enough for any man.

Next we'll equip you with the snuggest underwear you ever put on \$1.00 per suit and up.

Then we'll ask you to admire the prettiest effects in neckwear that ever came to town, 10c. up. Perhaps you'll not stop until you have chosen a new hat at 50c. to \$3.00.

And a few other things, to make you a well and stylishly dressed man, there's

NOTHING LIKE IT

Prorowse Bros

In the spring the birds are singing
As they build their summer home,
Blades of grass and buds are springing,
O'er the mead the cattle roam.
In the spring your blood is freighted
With the germs that cause disease,
Humors, boils, are designated
Signals warning you of these.
In the spring that tired feeling
Makes you every duty shirk—
Makes you feel like begging, stealing,
Rather than engage in work.
But there's something known that will
Man to health and vigor lead.
You will find Hood's Sarsaparilla
Just exactly what you need.

Kerosene for the Hair.

It has been known for some time in a general way that kerosene, applied to the hair, promotes its growth. Most women who have seen this statement in print have felt that an experiment with the oil, unless it could be deodorized, would be unsatisfactory. Recently, however, a woman was found who asserted that the fine appearance of her hair was entirely due to a persistent and thorough treatment with the familiar kerosene of corner grocery commerce. It was applied regularly once a fortnight in the following way: A little was poured into a saucer, and rubbed with the fingers into the roots of the hair. The application was slow and though, the gentle massage of the roots with the finger tips being needed to open the pores for the absorption of the oil. The treatment was usually made at night, and the hair afterwards tied up in a silk handkerchief. The silk handkerchief is recommended by hair dressers as useful in retaining the natural electricity of the hair. By noon of the following day the odor of the kerosene had disappeared, and in another 12 hours the oiliness that followed its use had also gone.

The effect of this treatment on the hair was promptly noticeable; the falling out stopped, and soon new short hairs were found all over the head. As the kerosene application was continued, the hair became thick and smooth. When, after several months, it was finally discontinued, abundant, glossy locks replaced the dry and lustreless hair—the former condition still existing, though no kerosene had been used for two years.
