P. L. BOWNESS Undertaker & Embalmer

The most up-to-date and best equipped undertaking establishment in Prince County. After twelve years experience in funeral directing and embalming, and with business increasing year after year, in order to keep abreast with the times we are obliged to install a MODERN MOTOR HEARSE, NEW IN EVERY RESPECT.

During the automobile season the majority of persons attend funerals in cars, and horse-drawn vehicles seem to be out of place. We are prepared to give city service to anyone in Prince County wishing our attendance night or day WITH NO EXTRA COST FOR MOTOR EQUIPMENT.

We still retain our prize team of black horses for those who would prefer the horse-drawn hearse.

Our policy, best equipment obtainable with services to suit.

Yours for better funeral service at no extra cost.

—MARKETS—Some potatoes are now being marketed here at 50 cents per bushel, a farmer stated that he was offered 1.50 per bushel a few weeks ago but on account of bad roads could not bring them to market. Eggs are worth 24c to 28c per dozen. Butter, dairy 30c, pressed hay \$10 to \$11 ton, oats 50c buckwheat \$1.00, wheat \$1.25 and barley 75c per bushel.—H.

—DEATH OF PROMINENT RE-
CENT—Mr. Henry Thompson passed peacefully away at his home in Grand River on Monday, June 14th, 1926, after a illness of some 14 days over many months. His death though not unexpected was a severe shock to his family who only a few short years ago were called upon to mourn the death of a loving mother. Mr. Thompson was one of the leading men of the county, always having taken a foremost part in every activity that tended to the betterment of his native place. Possessed of a pleasing personality and a keen sense of humor he was always a welcome guest whether at the private homes of his neighbors or at public gatherings. He was for many years a director of the Grand River Dairy Company and was capable of discharging the duties of president of that association when falling health obliged him to resign the post. He was secretly past the prime of life—being but fifty-nine years of age and had reason to look forward to many years of active service, but Providence willed otherwise and he readily acquiesced. He bore with suffering of his long illness with Christian resignation—death coming as a release after such a severe trial. He was blessed with a large family of fifteen children—all of whom survive. The children are, John, Alphon, Albert and Robbie in the Canadas; West; E. H. Hatt and Jennie, Moncton, N. B.; Stanley, Winnie, Florence, Roland, Hiram, Kathleen, Margaret and Olive at home. To the bereaved family we extend our sincere sympathy. N.

—PLAY ENJOYED—The three act comedy drama "Treasure Hunters" was presented to a packed house by the St. Eleanor's Dramatic players on Tuesday, June 8th in King George's hall, Port Hill. The play is replete with thrills and comic situations and was presented in such a masterly manner that the audience was kept at a high pitch of enthusiasm throughout the whole performance. All the players acted their parts with such consummate skill that it is needless to particularize. Between the acts vocal solos were beautifully rendered by Miss Kathleen McLellan. The cast of characters in order of appearance: Cyrus Quackenbush—the self made millionaire; Arthur Jones; Reggy Renford—a social idler—Harry Cannon. Simpson—a confidential secretary—James Chappell; Mrs. Daffody; Dare—the millionaire's sister—Linda Creswell; Squire Sykes—owner of Onion Center—John Pillsman; Pansy Sykes—the Squire's niece—Florence Craswell; George—the coloured butler—Roy Tanton; Jack Dawes—a young astronomer—Ralph Lockhart; Rose—Cyrus' younger daughter—Ruth Brown; Violet—the other daughter—Edythe Craswell; Bula Bula—an Amazon lieutenant—Lila Cannon; Lula Palaza—a South Sea Island Queen—Effie Jeffrey. N

Annual Meeting OF THE East Prince Liberal Conservative Assn.

L. N. McNEILL
Secretary

Malpeque

Malpeque held its annual school meeting on Tuesday afternoon, June 15th, with a representative number in attendance. Mr. D. P. MacNutt occupied the chair. The amount of \$50.00 was voted for the running expenses of the school. It was decided that the interior of the school be painted during the summer vacation. There were a number of applications to fill the vacancies caused by the resignation of Misses Ross and MacFarlane, but the matter of securing teachers was left to the judgment of the Trustees, Mr. Leslie D. MacNutt who was in rotation for retirement from the board of trustees is succeeded by Mr. Ralph Bessie.

The Baltic school meeting convened on Tuesday afternoon with good attendance. Mr. James Donald presided. The usual supplement was voted. Mr. Arch. MacDonald was appointed trustee in the place vacated by Mr. John MacGillivray.

The following is the report of the Darnley school meeting. Mr. Edward MacKay was the chairman for the occasion, Mr. James Woodside is the trustee in place of Mr. J. R. Thompson who retired. The present teachers, Misses Smith and Howatt are remaining for another term. The amount of \$260.00 was voted for the supplement and \$240.00 for repairs. This district purpose remodelling the ass'tants' department.

Sea View held a successful school meeting on Tuesday with Mr. H. L. Donald as chairman. The amount of \$250.00 was voted for supplement. Mr. Cuthbert Adams was appointed trustee in the place vacated by the retiring member of the board, Mr. Atwood Blakeney. The matter of teachers have not yet been decided.

Messrs. W. A. and Ralph Huestis, Charlottetown, motored to Malpeque on Wednesday on a business trip. M.

PERSONALS

—Miss Pauline Gillis, who spent the past couple of years in the United States has returned to her home in Arlington, N.

—Miss Kathleen Praught, Cross Rivers, who has been visiting friends in Cherry Valley has returned home. N.

—Messrs Romanus McDougall, Stephen R. McDonald, Grand River and Murdoch McDougall, Richmond, were in Summerside on Tuesday, attending the funeral of the late Roderick McDougall, a native of Grand River. N.

RASPBERRY CULTURE.

(Experimental Farms Note.)

The raspberry will succeed on almost any kind of soil if reasonable drainage is provided; as excessive moisture is not conducive to success. A sandy loam is the most suitable soil. A light, well drained soil, free of moisture and that may dry out at fruiting time, may prove disappointing, but such soils may be productive if supplied with humus. The adverse effect of excessive heat may be largely overcome by soil conditions that make possible a uniform moisture supply; good culture with adequate pruning to keep down excessive plant growth which tends to sap soil moisture—will aid materially.

Stable manure should be applied in liberal amounts to be well distributed to the soil to give the necessary physical soil conditions and to supply plant food. This may be followed, in later years, with a sulfate of ammonia, 500 pounds of sulphate of ammonia, 500 pounds of acid phosphate, and 100 pounds of muriate of potash, applied early in May, about the time the plant food requirements for this crop. The plants are set in rows 6 feet apart and 3 feet apart in the rows. If the rows are closer than 6 feet it is difficult to cultivate satisfactorily, and the soil moisture necessary to develop the fruit is not so readily maintained.

New canes develop from suckers produced from underground roots which are allowed to develop at will a thick mat of plants will result, and a satisfactory crop would not be possible. The ground must be confined to continuous rows about 12 to 14 inches wide, and the weaker canes be cut out leaving approximately four good canes to the foot. The plants should not be allowed to start, and frequent cultivation to keep down grass and suckering growth is necessary.

After fruit has been produced the old canes may be cut out, this giving the canes for the new year a better chance to mature. At this time weak canes may also be cut out close to the ground. Other than the cutting out of the old and surplus canes no pruning is necessary. Cutting off the top of the canes is not necessary.

It is a good plan to set stakes, with cross pieces to support wires placed at each side of the row, to keep the canes upright. Plants set 4 by 4 feet apart with growth confined to 5 or 6 canes to a hill, and a stake as a support, makes a very satisfactory method for raised culture.

Early spring planting is advised. Suitable plants may be obtained from a nearby plantation or bought from a nursery firm. The various

THE COST OF OPERATING FARM MACHINERY

(Experimental Farms Note.)

Approximately 3 per cent of the total cost of producing field crops in Eastern Canada is due to the machinery charge. This cost of operating machinery varies considerably from one farm to another. Where careful judgment is exercised in the purchase of machinery is owned, the cost has been found to be as high as \$13.46 per acre. In other cases where machinery is extensively used, yet without unnecessary duplication, so that all machines do a maximum amount of work, the machinery cost may be as low as 89 cents per acre. However, for the bulk of farms this variation is within much narrower limits. The average cost for general farm machinery in Eastern Canada is \$2.34 per acre, this does not include automobiles, tractors, threshers or motor trucks.

The chief factors affecting this machinery cost are the number of acres cultivated, the cost of repairs, housing, and the length of life of the machines. The total annual cost of machinery has been found to be, on the average, 20 per cent of the present inventory value. The length of life and cost of repairs are interdependent, in that some machines may be made to last almost indefinitely by repeated repairing but eventually the cost of repairs becomes too high and the reliability of the machine too low to warrant the cost of repairs, housing, and the length of life of the machines. The total annual cost of machinery has been found to be, on the average, 20 per cent of the present inventory value. The length of life and cost of repairs are interdependent, in that some machines may be made to last almost indefinitely by repeated repairing but eventually the cost of repairs becomes too high and the reliability of the machine too low to warrant the cost of repairs, housing, and the length of life of the machines. A PRECAUTION

Do not allow refuse to collect in your cellar. Inspect it frequently, and keep it weeded out.

Herbert is satisfactory. The Cuthbert is less hardy, and less productive, but the fruit is better for shipping and of higher quality.

A Vegetable Laxative Best For Woman

None so Mild, so Smooth, so Regulating, as DR. HAMILTON'S PILLS

Of course a woman's system is delicate, is easily injured by drastic purgatives. Bitter experience with harsh medicines makes her cautious, and to her great injury, chronic sluggishness of the system is permitted.

Few pills are suited to the actual needs of woman—they are too strong.

But there is an ideal woman's laxative, and it combines mildness with thoroughness of activity—it is known to the people of many nations as Dr. Hamilton's Pills, which never gripe, never cause nausea, and are safe to use no matter what the conditions of strength or circumstances of health may be. A naturalness and regularity of the system, so important to every woman, is quickly acquired by the regular use of Dr. Hamilton's Pills. As a health-bringer, as a tonic laxative, as an all-round ladies' medicine, there is positively nothing so efficacious as Dr. Hamilton's Pills of Mandrake and Butternut; 25c per box, five for \$1.00, at all dealers, or by mail from The Catarthzone Co., Montreal.

Red Tag Sale of Women's New Spring Coats

\$29.00
