Be Wise . . .

Modernize And Economize With ENTERPRISE!

Before You Install Any Heating System Check The Advantages ENTERPRISE Offers:

Scientifically planned by Enterprise engineers to heat your home properly and economically.

Expertly installed by furnace men with years of experience.

Enterprise Furnaces are all cast iron — the only type for long life.

More Enterprise Furnaces in use in Prince Edward Island than all other makes combined.

Enterprise Furnaces installed in 1922 — 18 years ago — still good for many more years.

Every Enterprise owner completely satisfied.

Enterprise Furnaces cost less to operate than any other heating system.

German Bombs Fail To Daunt British

SALVATION ARMY WORKERS FIND ALL CHEERFUL IN SHELTERS AND DUGOUTS — ARMY TAKES ON NEW JOB.

"Air-raiders!" "These go!" "The alarm!" It may be "in that chill" hour before the dawn. It may be at any hour of the day. Air-raiders are coming and the siren sounds the alarm.

At Salvation Army district headquarters the staff springs to action. Warm uniforms are donned, including the "kit" hats that protect men from falling steel splinters, and out they go — the Salvation Army workers delegated for duty as visiting chaplains to the air-raid shelters. For this war is a different sort of war. Last year — Great War Number One — was a trench war, a war of attrition, a war of manpower, of guns and bayonets, of shot and shell. This war, as it has developed of recent weeks, is a war of nerves, a war of aeroplanes and bombs dropped upon cities and towns from the air. The casualties are chiefly among women and children and men engaged in carrying on the vital business of the country — civilians. And to these bomb-threatened masses in the shelters and dug-outs of London and other English centres, the Salvation Army is carrying comforts and good cheer just as it did for the soldiers in the trenches.

Taking Things Cheerfully

Reports reaching Salvation Army headquarters here in Canada show that no braver people could be found anywhere than these British mothers and fathers who take their children from their warm beds in the middle of the night and hurry with them through the darkness to the bomb-shelters to which they have been assigned. There, cramped and crowded into the space of one small brick cell or steel algum, or it may be the basement of a large building where a thousand others are seeking refuge — these families spend long weary hours. But they maintain a wonderful cheerfulness throughout. Overhead the planes drone high in the sky while the boom of explosions and the crash of falling masonry rumble in the distance.

The nature of the shelters provided by the authorities varies. The Salvation Army divides them up among its workers, and by a system of regular rounds endeavour to cover them all.

People Bring Blankets

Perhaps the first folk to be visited, when the siren sounds its warning and a Salvation Army's air-raid chaplain starts out, is one of several brick shelter huts erected for the purpose in a school yard. It is furnished with concrete seats and the people bring their own cushions, blankets and rugs, ready to make themselves as comfortable as possible for several hours, perhaps for all the rest of the night. An oil lamp gives a faint light. The Salvation Army visitor enters and spreads good cheer. Families from the neighbourhood are clustered in the same spaces they occupied on previous alarms. There is laughter and good nature. Though the novelty has worn off, British hearts are still undaunted. The Salvation Army man is greeted like a friend. Here in this corner a father, mother and seven children are concerned. A baby insists on sitting up to see the visitor. A crippled boy in a wheel chair smiles happily, as he catches sight of the Salvation Army man. A young mother exhibits her baby sleeping in a clothes basket. To all these the Salvation Army chaplain is a cheerful, helpful friend. They are glad to see him, and they say so. He radiates confidence. If there is trouble he is there to help, comfort and advise.

Life in Steel Shelters

After the school yard the next visit may be to a row of steel shelters erected in the street, the entrances protected by sandbags or bricks. Perhaps a candle fixed to a belt in a girder gives forth light enough to reveal white-washed walls, old couches and chairs, stools and rag mats. Some of these shelters are decorated with flowers. The entrance may be screened with a curtain of sack or matting. There are rows of such shelters, and the Salvation Army men visit every one, each containing forty

The King Honors Fighter Commander

Air Marshal Sir Hugh Dowding, chief of the R.A.F. fighter command, which has played a foremost part in the defence of Britain from air attack, has been made a Knight Grand Cross of the Military Division of the Order of the Bath. Known as "Stuffy" by his pilots, who idolize him, the fighter chief was chiefly responsible for putting eight synchronized machine-guns in Spitfires and Hurricanes, twice as many as Nazi fighters carry. The King appears with him in this picture during an inspection tour.

Italians Bitter Against Franco

NEW YORK, Oct. 4 (CP) — The New York Times today published an account of conditions in Spain, obtained from a traveller who has just been through that country, in which it was stated the Italians are bitter at Gen. Franco for keeping Spain out of the war. The traveller said he was "not yet convinced that Germany is particularly anxious to have Spain in the war." He continued: "Germany has her troops at the frontiers; she has her agents throughout Spain and is gradually strengthening her grip over the Government. . . . But Spain is a valuable source of supply and means of communications as a non-belligerent, while if she gets into the war she will be a weak ally."

FISH CARGOES SOLD

ST. JOHN'S, Nfld., Oct. 4 (CP Cable) — The fish and salt cargoes of two French trawlers requisitioned here by the Newfoundland govern-

Hardwood Fuels

The best hardwood fuels are beech, yellow birch, rock elm, hickory, hard maple, and oak. The fair hardwood fuels are ash, white birch, black cherry, red, and white elm, and red and silver maple. One and one-quarter cords of the best hardwoods are computed to have the same heating value as a ton (2,000 lb.) of anthracite coal, while one and one-half of the fair hardwoods are required to produce the same amount of heat. In the case of light hardwoods, alder, basswood, butternut, and poplar, two cords are needed to equal a ton of coal.

Claim British Lost 7 Million Tons Shipping

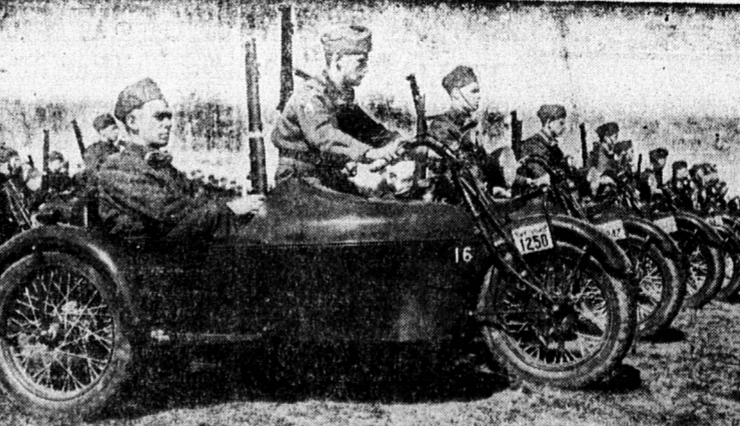

BERLIN, Oct. 5 (AP) — Diest Aus Deutschland, German news commentary, claimed today that German submarines and airplanes had sunk 7,000,000 tons of British shipping, not counting vessels of less than 2,000 tons since the start of the war.

Playing Up The Goddess Look

NEW YORK, October 5 — Dresses, shoes, hats, jewelry, bags, coiffures and make-ups, all especially designed for the fall women were presented in a fashion show yesterday. The models were willowy girls who have made names for themselves in various fields, and a showgirl, a singer, a radio-star, and a selling model from one of the large stores. All were 5 foot 9 inches or over.

The special problems of this "typical but neglected American type" were pointed out by the girls. The dresses presented the first by a designer, who is specializing in dresses for the tall girl. The designer here, self 5 feet 10 inches, commented on

MEN, TANKS, TRUCKS AND PLANES LEAVE CAMP BORDEN FOR THREE-DAY MARCH

Waiting for zero hour are these men and machines pictured at Camp Borden. They're ready to start on the three-day route march of 5,000 troops, in Canada's biggest mechanized manoeuvres.

ST. PETER NORTH SCHOOL

Honor Roll of St. Peter's North School fourth month of September: Grade IX-1. Margaret MacLaine. Grade VII-1. Mae McInnis; 2. Dorothy McKenna. Grade VI-1. Rose Marie O'Handley; 2. Joseph McInnis; 3. Flo MacLaine. Grade V-1. Emmett Griffin; 2. Merlin Jay; 3. Joseph McKenna. Grade III-1. Reuben MacDonaid. Grade II-1. Joseph Gillis; 2. Marion McNeil; 3. John O'Handley. Grade I — No tests. Lucetta Thompson, teacher.

This army moves on wheels — the wheels of 500 army trucks, tanks and motorcycles. Overhead, as the three divisions of the force move toward the coast, will be reconnaissance planes. This is the busy scene at army headquarters before the big march begins.
