# SYDNEY BASIC SLAG

(Fortified with Phosphoric Acid)

It is more interesting to know what one of our most prominent agricultural experts has to say about Slag, than anything we can tell you, and we quote what Professor Cumming said at the Fruit Growers Association meeting held at Windsor, N. S., in January, 1921.

Professor Cumming said:

"That from the standpoint of the 'theroetical chemist, I would' 'have always said, thermoically' 'that Acid Phosphate was better' 'than Slag; but we started in' '1914 a pretty extensive experi-' 'ment on an orchard land. I' 'watched results, and went over it' 'carefully this year, and I see an' 'AMAZING DISAPPOINTMENT' 'MENT IN THE RESULTS' 'FROM ACID PHOSPHATE. I' 'AM CONVINCED THAT SLAG' 'ON THE AVERAGE WILL' 'BEAT ACID PHOSPHATE. We' 'have results for six years on' 'clover, on grain, wheat and oats,' 'and then last year we had car-' 'rots on that land, and taking' 'the average all the way through' 'THE SLAG IS THE LEADER' 'IN EVERY CROP.'

Professor Cumming attributes these results to the following constituents, which are contained in the Slag-Phosphoric Acid, Lime, Magnesia and Manganese.

# CANNOT NOW ENDOW FOREIGN BRIDE WITH UNITED STATES CITIZENSHIP

## Unforeseen Complications Developing in Connection With New U.S. Law Concerning Married Women's Civil Status.

LONDON, Dec. 6.—The new United States Law concerning a married woman's citizenship presents unforeseen complications. Formerly, when an American married a foreign woman, he endowed his bride with his citizenship. But congress has made it necessary for her to live in the United States a year before she can claim American citizenship. But if her husband lives abroad she has no country and cannot obtain a passport to travel from one country to another. Only in recent weeks has the State Department made it possible for her to essay the trip to her adopted country. Furthermore if an American marries a widow of a nationality whose quota of immigrants is filled, she may go to the United States but there has been no ruling on whether she may take her children. United States consuls have appealed to the State Department for guidance, and there are indications, the department believes, amendments to the new law are necessary.

# Siki Tells Story Of Bones of 400 Chinese Taken To China To Rest In Native Soil

PARIS, Dec. 6.—Batting Siki, the Senegalese conqueror of Georges Carpentier, declared today in the presence of Deputy Dagne and two witnesses that his fight with Carpentier had been "fixed," but that during the fight he had determined to be the winner. Deputy Dagne listening to this story from the deposed black champion, recently bereft of his title by the boxing federation, told to newspapermen said it was exactly what Siki had related to him as the story Siki said he would tell in court and of which Dagne said he had proof. This was the only reason, the deputy said for agreeing to fight for the Senegalese.

# Red Stuart Likely To Be Back In Amherst

ST. JOHN, N.B., Dec. 5.—St. John's hockey team may lose the services of one of their most dependable workers in the person of "Red" Stuart, of Amherst, according to recent information. A vacancy has occurred at the Amherst freight shed and Stuart applied for the position. His seniority in the railway service gives him the preference, it is reported. Stuart is well on his way to have a brilliant career this season in the N. H. L. and the Maritimes will regret that he will halt now. However, a permanent position is more to be preferred than seasonal jobs.

zro is finished," were the fears that assailed me. "Then during the seven rounds that I was kneeling before Carpentier I made up my mind to fight. I knew I could win. You remember how I jumped up and swung my left, which caught Georges flush on the point of the jaw." Siki rose and gave a demonstration for the benefit of Deputy Dagne, who looked on with apparent pride at his compatriot. "You know the rest," continued Siki, "how Georges with a painful look of surprise on his face, went down for the count of four and clinched. "From the fourth round on, I didn't hurt him too badly. I felt him to be very weak, his blows lacking sting. I whispered to him several times that he should quit, but instead he butted me twice and hit me below the belt, which further enraged me and strengthened my determination to win especially as the crowd was now favouring me and cheering, while they booed Georges for his rough work."

At the beginning of the third round I had fully decided that I would take another count as a sign of defeat. Siki went on, "but the round had progressed two minutes before Georges hit me hard enough to give me a chance to go down. A right swing then hit me high on the cheek, and I said: 'Here goes' and I dropped to one knee, fully resolved to stay there. "The howls of the multitude reached my head, which seemed to clear: 'He is beaten; the ne-

is a doctor's prescription—doubly valuable and effective because it is for internal and external use—and for more than a century it has safeguarded every member of the family against the serious situations that too frequently develop from a Cough, Croup, Sore Throat, Grippe, Cold, Chills and many other internal and external ills and ailments.

# LYOYD GEORGE HAS BECOME OWNER OF ESTATE 40 MILES FROM LONDON

## It is Situated in One of the Least Discovered and Most Enchanting Corners of Surrey—Cottage is Not Large.

LONDON, Dec. 5.—At Churt, in Surrey, some forty miles from London, Mr. Lloyd George has become the owner of a large estate on which Philip Tilden has built a country home for him. Built on a knoll, the cottage looks southwards to Churt Hamlet and westward across the great commons of the lower green and past Kettlebury to the Hog Back. It is situated in one of the least discovered and most enchanting corners of Surrey. The house itself is exposed to every wind that blows, and is unsheltered by any neighboring trees. Just to the right, however, where the ground falls, is a profusion of oak trees with two ponds set in the quietest and most fairy-haunted woods imaginable. But there are no dreams about the house. It is all brisk and fresh and bright—yet comfortable.

The cottage is not very large but is unusually well-planned, standing in a pretty garden with bracken almost to the front door. Within the door is a passage-like hall and as soon as you enter, the personality of Mr. Lloyd George is felt, for an old carpet of Carnarvonshire hangs on the wall immediately opposite. As you hang up your coat in the closet provided you get another reminder, as though you were a guest, of the time you got your host's occasional relaxation, for a water-proof roll-case marked "D. G." is in the apartment to the left, commencing with the study, which occupies the whole of the southern wing. Books and old oak paneling clothe the walls, and a plaster frieze with a vine pattern on it is carried both for book-shelves and room at once. On the other side of the hall in the dining room, and from the hall the stair-case ascends. This is one of the most charming bits of the house for the treasurers of solid oak. The central loggia is set against the outside stair wall, and is attained from the dining room on one side and the ante-room on the other. "Ascending the stairs we come

# Sudden Death Of Well Known Halifax Barrister

HALIFAX, N.S., Dec. 5.—Edmond P. Allison, K.C., well known Halifax barrister, dropped dead at his home here near midnight tonight. He was a son of Dr. David Allison, former President of Mount Allison University, Sackville, N.S., and was born at Richibucto, N.B. He was 55 years of age and is survived by a widow and one son. Harry A. Allison, Calgary, is a brother, and H.A. Powell, K.C., of St. John, an uncle.

# Montreal Likely Headquarters C. N. R.

OTTAWA, Ont., Dec. 5.—Announcement likely as to the headquarters of the Canadian National Railway is not likely to be made for a month. When it is made there is every reason to believe that the previous forecast will be borne out and that Montreal will be "it." As regards the executive location it will probably be Toronto, Winnipeg or Montreal.

# Stomach Troubles Are Due To Acidity

Tells Safe, Certain, Speedy Relief For Acid Indigestion

So-called stomach troubles, such as indigestion, gas, sourness, stomach-ache and inability to retain food are in probably nine cases out of ten, simply evidence that excessive secretion of acid is taking place in the stomach, causing the formation of gas and acid indigestion. Gas distends the stomach and causes that full, oppressive, burning feeling sometimes known as heartburn. The trouble lies entirely in the stomach, and is due to the excessive secretion of acid.

## IN MEMORIAM

MR. ALLAN McDONALD.

The people of Waterford and vicinity were greatly shocked to hear of the sudden death of Allan MacDonald, which occurred Wednesday, November 22, 1922.

Mr. MacDonald retired the previous evening in his usual good health. In the morning it was found that during the night, the Angel of Death had visited him and laid claim to his reward. Mr. MacDonald was born in Antigonish, N.S., January 6, 1855, coming with his parents to Prince Edward Island when about four years of age he resided in Waterford since that time. The deceased had a large circle of friends and was highly honored by all for his honesty, integrity and hospitality; the friend and stranger were always welcome to his home. Mr. MacDonald is survived by a widow, who was Mary Shea and the following sons and daughters: J. Alfred of Tignish, Albert and Grace on the old homestead, Peter M. of Sumford, Maine, and Hilda M. of Sumford, Maine.

# STARTLES NEW YORK BY WRITING

NEW YORK, Dec. 6.—With the sky for a blackboard, a British war ace to-day spiralled 10,000 feet above the city and spelled out a greeting to the noonday crowds in letters a mile high. The performance, watched by thousands, given by Captain Cyril Turner, of the Royal Flying Corps, introduced "sky writing" in America. Flying above Park Place, Captain Turner liberated a trail of white smoke and spelled "Hello" across the sky. Above Longacre Square he traced "Hello, U.S.A." and the apparatus in the heavens. Each letter was a mile in height, and the message second.

# THE UKRAINIAN IN CANADA THE EDUCATED AND EUROPE

A movement that almost indicates a reform in it is said, now taking place in Ukraine. It is taking the form of a religious awakening, and the Bible is being welcomed with joy. The presence of nearly 400,000 Ukrainians in Canada and colleges makes this fact of more than passing interest, as some of this race scholarship students who were once in Canada and who are among the leaders in the Ukrainian movement in the Ukraine. It is intended to bring fifty students from the Ukraine to England for their education. Those who know describe the condition of the Ukraine as almost unthinkable, for the Bolsheviks, as almost murdered millions, leaving whole villages without a single inhabitant. A similar revival is taking place in Czechoslovakia where, it is claimed, thousands are without ministers or leaders and are looking for light and help.

# THE NEWER CANADA, FARTHER NORTH

1—A farm in the Peace River country. 2—Vegetables and children grow well in the newest north. 3—Vermilion Landing on the Peace River. 4—A Peru River potato patch.

So far as known, the first grain crop ever grown in what is now the Province of Alberta, was in the Peace River country. This was in 1809. Daniel W. Harmon, in charge of the Northwest Company's post at Dunvegan, records in his diary that in that year on July 21st, he cut his barley.

"I think it is the finest," he wrote, "that I have ever seen in any country. The soil on the points of land along this river are excellent." Harmon's opinion as to the possibilities of the country was supported by traders and travellers who followed. Professor John Macoun was the first scientific explorer to study it thoroughly. In a book published in 1882 he stated that "the vegetation throughout the whole Peace River valley is of the most luxuriant character, and it seems more like that of the tropics than of a country drawing near the Arctic circle." But when the Province of Alberta was formed, ninety-six years after Harmon made the entry quoted from his diary, there was less than five hundred acres under crop in the whole area of 115,000 square miles, in the drainage of the Peace River.
