BIRTHS

MITCHELL—In the city on June 27th, to Mr. and Mrs. Chas. J. Mitchell, a daughter.

COLEMAN—At the P. E. Island Hospital, on June 27th, to Mr. and Mrs. T. J. Coleman, a daughter, still born.

DEATHS

BERNARD—The death took place last week in Abram's Village of John Bernard age 38 and Mrs. John Arsenault age 78.—M

BEERS—On Sunday night, June 28th, Catherine S., wife of Mr. Fredric Beers, of the Marine Department. Funeral notice later.

ACORN—At the P. E. I. Hospital, on Sunday night, the 28th inst., John Acorn, of Mill View, in his 60th year. The body will be removed by road to the late home, Mill View, this morning. Funeral notice later.

IT WAS AWFUL BUT SHE HAD HER WAY.

NEW YORK, June 27.—How Miss Margaret Woodrow Wilson used the steam roller to put through a resolution for which she was working was told with glee at Madison, Wis., by those who knew of the incident in the Conference on Social Centres. Miss Wilson offered the resolution, put the question when the chairman of the conference hesitated, and declared the resolution carried before the presiding officer caught his breath.

"I know it is awful," she whispered as she took her seat, "but it had been discussed, and we knew no one opposed it anyhow, so what's the harm?"

The resolution recommended an amendment to the Wisconsin social centre law, providing for the naming of secretaries for social centre work. State School Superintendent Cary, presiding, did not act promptly enough to suit the President's daughter, so she put the question herself from the floor.

"Is everybody in favor of the resolution?" she asked. There was a chorus of yeas, and without waiting for the nays, she declared the motion carried and sat down victorious.

SUMMER SCHOOL OF SCIENCE

As already intimated in The Guardian the Summer School of Science will meet in Charlottetown on July 7th and will continue until July 29th. The Guardian is now in a position to say that the attendance at the school this year will be the largest since its organization. On Saturday the number of applications received by the secretary, Mr. Seaman, totaled 380 and it is conservatively estimated that the number in attendance will be over 400. Last year, when the school met in Halifax the attendance was 275, the largest up to that date. Four years ago the school was held in Charlottetown, when there were 220 in attendance.

The addition of 400 to the population of Charlottetown, especially at a time of year when there are many visitors, will necessarily tax our ordinary accommodation facilities, and realizing this, the Committee in charge of the arrangements for the school has appointed a number of sub-committees to canvas the city with a view to engaging accommodation in private residences. These committees will begin their canvass today and we bespeak for them that sympathetic co-operation for which the citizens of Charlottetown are noted. For the credit of the City and in the interests of future conventions and assemblages here it is earnestly hoped that all in a position to do so will place such accommodation as they can spare at the disposal of the committees.

It is a compliment to Charlottetown and to the province that the attendance at this school will be "the largest yet." The "Garden of the Gulf" has many charms for those who have visited it, and many a call for those who have only heard or read of it. It is up to the City to strengthen these charms and to show that the Garden justifies its reputation. We feel assured that this will be done.

It may not be out of place here—not by way of suggestion or hint, as we feel sure that Charlottetown will do its duty—to recall the pleasant experiences of those who attended the School of Science in Halifax last summer, when all their off-duty hours were most agreeably filled in through the hospitality of the citizens. A garden party was given in their honor by Lieutenant Governor McGregor. A grant of \$200 was voted by the City Council to assist in entertaining the visitors; this

sum was expended in open air band concerts, river excursions &c. The neighboring town of Dartmouth, not to be behind her big sister, Halifax, entertained the whole school during an afternoon and evening, giving them a sail on the lake, serving refreshments in their summer cottages and winding up the days proceedings with a band concert.

In addition to these and many other kindnesses the different boating and yachting clubs vied with each other in proving to their visitors that Halifax was the most agreeable place on the continent in which to spend a few weeks—and they succeeded. Halifax, as a result, still holds this record. We trust that after the close of the school here, if the Halifax record is not broken we shall be, at least, a close second.

SOMETHING WRONG

Something has evidently gone wrong with the weather this year. A Canadian Press despatch, dated Guelph, June 20, says Professor Graham of the Ontario Agriculture College told your correspondent that last night's frost was a disastrous one for farmers and truck gardeners in this district. There were from four to ten degrees of frost. Bellies vegetables being spoiled, fall wheat and peas are hit very hard. At the same time a despatch from Three Rivers, Quebec, stated that at La Tuque four inches of snow had fallen and had done damage to the crops.

In Prince Edward Island the weather man has acted more moderately. We have had cold weather, but apart from a little frost early in June which, however, owing to the lateness of vegetation, did little harm, conditions have been most favorable and the crops are looking their very best, with every indication of an abundant harvest. We have no apology to offer for what has been dealt out to other countries.

FOR ORGANIZATION OF FOX BREEDERS

(By F. Peacock, Fredericton, N. B.)

Proper organization is one of the factors of success in every industry. This factor becomes more and more apparent as the industry or enterprise develops and its interests spread. Experience evolves new values and fresh problems that can be better utilized and easier solved if there is some central bureau to gather and dispense information, study new situations of supply and demand and experiment, advise, consider, formulate and control policies, protect interests, etc.

With this idea in mind the fox breeders of Prince Edward Island formed an association about two years ago. While this organization has not accomplished everything that its promoters hoped it would, it has nevertheless done much to emphasize the superiority of the P. E. I. fox, which was its chief object. Other matters such as the registration and classification of the foxes, regulations for the protection of investors and breeders, and the study of the fur markets of the world are under consideration. Already a basis is laid for organization which will be of incalculable service to the fox business of the Island.

There are many Prince Edward Island foxes and a few others of equal value in New Brunswick, Nova Scotia and Quebec, and in these places the ranching industry has abundant space and perfect conditions for expansion. It would seem therefore that the time is ripe either for a combined association, to serve these three provinces or a separate club in each. Doubtless a local organization in each would be easier to form, and would at present serve the interests of the business quite as well as the more ambitious scheme. Later when the developments of the fur farming demand it, all the local societies including that of P. E. Island might join forces in a big organization.

A comprehensive organization like this can be made a tremendous factor in the future fur production and distribution of the world and the fox men of Eastern Canada should do all in their power to develop it. Just now the fur trade is in a transition period. The supply from the wild state is becoming exhausted. The natural fur preserves are being rapidly opened up for settlement, and the hunter's field of operation restricted accordingly. The equally rapid increase in the world's consumption of fur has sent prices so high that the ingenuity and enterprise of the hunters are stimulated to a degree which begins to threaten the extinction of the most valuable fur bearers even in those remote sections, that will never be available for settlement. Fur being a staple product advancing civilization demands in increasing quantities, some other source of supply must be sought by that civilization than that which it has hitherto found sufficient. The wilderness product is to be supplanted and finally supplanted by that of the fur farm. The ranches must give us the fur that the trapper is no longer able to supply. The fact that today the hunter is endeavoring to take all the fur bearers alive and place them in ranches is a big factor in hastening the transition.

When one considers that the world annually consumes more than \$100,000,000 worth of raw or \$400,000,000 worth of manufactured furs and that the demand is increasing, the proportions of such a movement are seen to be great and the possibilities stupendous. As Eastern Canada is the home of fur farming and practically the only place where it is car-

ried on, as it has ample space and perfect conditions for its development, it is readily seen that an organization of those prosecuting the business here would have tremendous potentialities commercially. As time goes on it would control more and more of the fur products of the world. The monopoly of the Hudson Bay Company might easily be eliminated or even surpassed, and the fortunes that were made by Canadian fur traders in the early days would be outdistanced by those of the hundreds of fur farmers of the twentieth century. Long before an organization obtained such a control as this implies however it could do much by adopting a far seeing policy to hasten such control, to influence the fur markets, to eliminate the undesirable features of the fox business and generally to guide an industry which is destined to make Eastern Canada one of the wealthiest parts of the world.

Now, as was intimated above, probably the best way to take the first steps towards the consummation of an organization capable of fulfilling the functions outlined would be the formation of provincial clubs or associations. These could be organized with very little difficulty and expense, and they would serve the business in its present stage of development quite admirably.

In New Brunswick for instance a local organization would be of great service and should be formed at once for the following reasons:

1. To Protect Investors in Fox Propositions. In this as in all other new enterprises which pay large dividends many abuses are showing themselves. Men of standing cannot afford to be connected with a business which is being abused without providing to the public a means of assuring itself that that business is a legitimate and proper one with a permanent basis; and when properly organized and managed, a desirable one to engage in. An association of the responsible fox ranchers, by collecting information as to breed and quality of foxes, experience of breeders, market quotations, by establishing certain standards, keeping a record of foxes and discouraging over capitalization could do much towards protecting the investing public and enlisting its confidence.
2. To Protect the Fox Rancher.—The product of those ranches that have been in existence for years and the fur value of which has been demonstrated, is undoubtedly and admittedly much more valuable than animals that have been recently taken from the wild state. The breeder who goes to the expense of stocking his ranch with high grade pedigreed foxes at \$15,000 per pair should have his product recognized and should not be compelled to compete with his neighbor who perhaps gets his foundation stock from Alaska for \$5,000 per pair. Eastern pedigreed animals hold the world's record for pelt values. With the present scarcity of foxes for breeding purposes, however, there is a splendid opportunity to introduce inferior stock at big prices. The actual injury result-

(Continued on page three)

You will see here some of the daintiest selections in talcum powder that you could want to look over, Yucca, Violet Dule, Rose, Trailing Arbutus, Violet and Carnation, and many other delightful preparations at 25c., a box. McKinnon Drug Co., Cor. Great George and Kent Streets, Mt.

FOX AND FUR COMPANIES

ANSWERS TO CORRESPONDENTS.

L. L. R. SALEM, MASS: Thanks for information. The future is assured. (1) A good dividend payer. (2) Nos. 3, 4 and 7 answer your description.

UBIQUE, MONTREAL: We don't know the company, but if it says its headquarters are here, they probably are. Write and ask particulars from the Secretary, and then write us again.

M. J. M., NEW WATERFORD, C.B.: (1) About 15 per cent; (2) About 30 per cent; (3) About 35 per cent.

NISBET, HALIFAX: See list Saturday's Guardian.

R. P. POSTON (1) Yes. (2) See Saturday's Guardian.

W. C. A., QUINCY POINT: Will write giving all the information.

E. N. S., MONTREAL: See Saturday's list. Will send further information you want later.

RIDEAU, TORONTO: (1) It is not true. (2) Yes. (3) Yes.

MRS. T. M. S., ST. THOMAS: You are just getting into it, the results next year should be even better than the present. Send a list—you will see plenty ads in The Guardian—and we will tell you what we know about them.

L. M. H., NEW YORK: Nos. 4, 5, 7, 8, 11, 15—spread your money over these, and you are certain of an average of at least 25 per cent.

SKEPTIC, CHICAGO: We don't know the company, the name is not at all familiar. Don't invest in any Company without submitting the name to someone who is familiar with the Island. We shall be pleased to advise you if you select a list for our personal.

F. N. R., HAMILTON (1) Next year's dividend payer. (2) Directors men of standing, and the foxes of the best stock.

B. E. AMHERST: We shall be pleased to accommodate you. (2) Nos. 1, 2, 2, are all that could be desired.

ANGLOIS, LEVIS: You were well advised and will come all right.

CROSS, BOSTON: The future is good, but the success depends more on the chance of throwing silvers than the value of the pelts. For pelt value nothing equals silvers as a permanent investment.

INVESTOR, OSHTAWA: The facts are as stated. Many bankers and bank officials are in up-to the ears; don't let any such tales dissuade you. Nos. 1, 2, 3, 5, 7—put a hundred in each.

M. C., SPRINGFIELD, MASS: You should spread it in the following proportions.—No. 3, \$300; Nos. 1, 2, 7, \$200 each; and \$100 each in Nos. 4, 5, 6, 8, 9, 10.

DISASTROUS FIRE IN GRIMSBY

GRIMSBY, Ont., June 26.—There was a quarter of million dollars loss in the fire which swept the Dock District today.
