SATURDAY SEPTEMBER 21, 1912.

WHAT P. E. ISLAND NEEDS.

We talk freely of the many industries which are possible for Prince Edward Island and there are many of them, many which for various reasons could be carried on to better advantage here probably than anywhere else in Canada.

It may be taken for granted that any industry started in this province will have a direct competitor in some one of the other provinces, most probably in Ontario.

"Made in Prince Edward Island" should be a recommendation that no true Prince Edward Islander would resist, except for sufficient reason.

NOTES

It is gratifying to learn that entries for the prose, poetry and photograph competition are coming in freely. Mrs. McDonald (formerly Miss L. M. Montgomery) has kindly contributed an essay on her native province but not for competition, a fact which may serve to encourage some of the younger competitors.

A correspondent claiming to be an "Indignant Citizen," in Wednesday's Patriot complains of the notoriety given the Town of Souris by correspondence and editorial comment in a recent issue of the Guardian.

Blood Poisoning Results From Digging out Corns

To really make a corn go away, to remove it for all time, there is just one way. Putnam's Painless Corn and Wart Extractor, a soothing helpful remedy that separates the corn from the good flesh, lifts it out root and branch—does it quickly and without pain.

and only on the principle that such a recommendation would ensure the ready purchase, in preference to any other, of any article manufactured here, could the success of an industry be assured.

Are we "sufficient for these things"? Could we resist the temptation of better prices—although made better only for the purpose of killing our industry? Could we resist the snobbery that prefers the "made abroad" article to that "made at home"?

We believe our people would be true to their own, but we believe, also, that they would need to be warned occasionally. We have some small-souled people even in this country of large-souled people.

Prince Edward Island needs a Boosting Club, an association of big-hearted, optimistic men and women who believe in the possibilities of their province, who will stand true to it and who will help snuff out pessimism, partyism, selfishness and snobbery wherever and whenever they stand in the way of the progress and prosperity of the province.

against the publicity given, to it by others equally indignant though for a different reason. He informs us that the prosecutor has secured four convictions since entering upon his duties, which, we find was on July 1st.

"Master Workman Tobacco is one of the best tobaccos at its price on the market today. You will enjoy smoking Master Workman. It has a delightful aromatic odor, does not bite the tongue and is kept in perfect smoking condition in our patent humidor. Price 15c a cut. The McKinnon Drug Co., corner Great George and Kent Sts. 'The Rexall Store.' 9-19Mt.

Don't let any early cough hang on. It will make more serious coughs come later. Cure every cough promptly with Jamieson's White Pine and Tar, the most successful cough mixture sold anywhere. 25c., J.G. Jamieson, Druggist. 9-16Mt.

S. S. A. W. PERRY PASSENGERS.

Following were the outward passengers by the S. S. A. W. Perry, which sailed at noon for Boston, having arrived the previous evening. U. McLeod to Boston. H. R. Wright to Boston. Mrs. Wright to Boston. F. B. Jones to Boston. J. T. Douglas to Boston.

No 3

In this space during 13 consecutive weeks will appear an "ad" of one of the 13 Retail Stores that specialize in

Cameron's Home-Made Bread

For the coming week we write

(No 3) Crabbe's Grocery

(Corner Waymouth & Euston Sts) A comparatively new business but owing to the fact that competition has never been allowed to get within close range, the store enjoys the large patronage both town and country—a clean bright store presided over by a genial, old-fashioned proprietor—telephone connection—a sk for one or two of Cameron's delicious, Home-made loaves when placing an order for groceries

A. W. Dobie to Boston. D. Curran to Boston. G. H. Jennings to Boston. A. Teveque to Boston. Mrs. A. Teveque to Boston. Mrs. H. J. McKensie to Halifax. J. Campbellton to Halifax.

IF BRITISH VOTERS COULD SEE US.

LONDON, Sept. 19.—Referring to his Canadian visit at Dartington last night, F. E. Smith, K. O. M. P., expressed the wish that every voter in the British Isles could visit the Dominion before the next general election, he would then have no doubts as to tariff reform.

The development of Canada during the past sixty years could not equal her future development in the life time of a young man, he believed. Today, said Mr. Smith, Canada was anxious to come to an arrangement whereby every ounce of her imported manufactured goods should be made by Britishers, though she did not intend to give the manufacturers and workmen of this country an advantage over her own people.

The whole radical press of this country, declared Mr. Smith, desired the recently rejected reciprocity treaty to become law, with no other object than the base party purpose that would destroy the chance for preference between Canada and this country.

CAR SHORTAGE IN WEST.

MOOSE JAW, September 19.—At a meeting of the Associated Boards of Trade of Western Canada, which started its annual session here Wednesday afternoon, General Superintendent Taylor, of the Canadian Pacific Railway company, in the course of a lengthy statement on the question of car shortage in the west, laid the blame for the greater part of the congestion upon consignees, who prefer to pay the \$1 per day demurrage charges rather than build or rent proper warehouses for their goods.

A SWELL WEDDING.

WINNIPEG, September 19.—The marriage was celebrated in St. John's cathedral at three o'clock this afternoon, of Miss Maude Elizabeth Matheson, second daughter of the archbishop of Rupert Land and private of all Canada, and Harold Wynne Trenholm, third son of Mr. Justice Trenholm, of the supreme court, Montreal. The ceremony was performed by the bride's uncle, Venerable Archdeacon Fortin, assisted by Dean Coombs. The bridesmaids were the Misses Adele and Nora Matheson, and C. A. Richardson was groomsmen. Mr. and Mrs. Trenholm left on a trip to Chicago, Montreal, Toronto and Boston.

MET SUDDEN DEATH.

HALIFAX, Sept. 20.—There has not been of late a sharper reminder of the uncertainty of human life than that furnished in a brief dispatch yesterday from Picton to the effect that Lachlan McInnes, of Scotch Hill, four miles from Picton, father of Hector McInnes, K. C., of this city, was dead.

DEFECTIVE SHOT.

LETHBRIDGE, Alta., Sept. 19.—Former city detective Egan was shot and perhaps fatally wounded tonight in front of the Union Bank by Richard Christian, a cow puncher who had been in the city for the past few days from the Iron Springs district. The shooting is said to be the result of an old feud between the two. Christian was arrested.

BETTER DEAD.

MANCHESTER, September 19.—Perhaps it is all for the best that my daughter is dead, declared Charles Hersey, of Gloucester, father of Mrs. Estelle Roberts, the Publico girl, whose mysterious death is puzzling the local officials. Mr. Hersey said that his daughter drank heavily, and that she was often seen with men other than her husband. The declaration of Chief of Police Converse this morning that he was satisfied that the death of Mrs. Roberts was due to accident, was scouted by State Police Officer Thomas F. Eustace, who arrived here today.

Laxative For Old People—"Cascarets"

What glasses are to weak eyes—Cascarets are to weak bowels.

Most old people must give to the bowels some regular help, else they suffer from constipation. The condition is perfectly natural. It is just as natural as it is for old people to walk slowly. For age is never so active as youth. The muscles are less elastic. And the bowels are muscular.

So all old people need Cascarets. One might as well refuse to aid weak eyes with glasses as to neglect this gentle aid to weak bowels. The bowels must be kept active. This is important at all ages, but never so much as at fifty.

Age is not a time for harsh physical. Youth may occasionally whip the bowels into activity. But a lash can't be used every day. What the bowels of the old need is a gentle and natural tonic. One that can be constantly used without harm. The only such tonic is Cascarets and they cost only 10 cents per box at any drug store. They work while you sleep.

YOUR Property Insured?

If your property is not insured you don't know what day it may go up in smoke and if this should happen it would mean a total loss to you. Don't gamble with fate any longer. Take out a good fire insurance policy with one of our strong companies and secure the strong protection that only this will bring. Any of our companies is ready to take over all risk on your property, protect you at all times and ease you of the load of care and worry that is always connected with uninsured property. Premiums mean but a few cents a day and surely protection is worth that sum. Write or call today for full information regarding your property protection.

W. K. Rogers Co. Ltd.

84 Gt. George Street.

The Greatest Ever The Charlottetown Exhibition

24th to 27th September 1912

Contract closed for Flying Machine two flight each day starting and finishing in front of the grandstand. The Aviator is the same who so successfully preformed last week in St. Johns and who has made eight successful flights at Cherryfield Maine this week. The Horse Races—seven classes all filled. The other attractions—Dewar's Comedy Animal Circus. Burgos and Clara Gymnastic Combination Act. The Three La Vans—Comedy Gymnasts. The Adelaide Trio—Tight Wire Act. The Norik off Troupe Russia Dancers. Cheapest Rates by Steamers and Railways

C. R. Smallwood Secty—Treas

8-24 St. ME 31.

A Test Proves This True

If you appreciate the importance of getting the best drugs and the economy of getting them at the most reasonable prices, we are sure that the service this store provides will please you.

Goods are Right Prices are Right Service is Right

They have always been so and we intend they always shall be. We wish to build business permanently. We seek the trade of careful buyers. We endeavor to so treat every person who enters our store that they will wish to come again. We have increased our business every year for twelve years. This means if it means anything that buying here is a satisfaction.

J. G. Jamison DRUGGIST

During Exhibition Week we will offer great inducements to watch buyers.

Our stock just now is very large in gold, gold-filled, silver and nickel, all tested and timed for prospective purchasers.

G. H. Taylor Jeweler

NEW KING GEORGE HOTEL Wm. MONTBOURQUE, Mgr. Private Bath, Running Water, and Long Distance Telephones in all rooms. Large Billiard Room. J. H. ED CUSHING, N. S.

CANADA RANKS NINTH

OTTAWA, Sept. 19.—Canada is now ninth in the tonnage list of the maritime states of the world, as published in a report for 1911 just issued by the department of marine and fisheries. The other eight, beginning at the top, are Great Britain, Germany, United States, Norway, France, Russia, Italy and Japan.

MILLION A MONTH FOR I.C.R.

HALIFAX, Sept. 20.—The gross revenue of the Intercolonial railway is now averaging more than a million dollars a month, and the traffic is the greatest in the history of the railway.

CARPENTER-MORTON ROOFING GIVES SATISFACTION. YOUR ROOF TROUBLES WILL BE OVER IF YOU USE CARPENTER-MORTON ROOFING. FULLY GUARANTEED FOR A TERM OF YEARS DEPENDING ON THE THICKNESS USED.

Fennell & Chandler Victoria Row Richmond Street

Buy The Best Roofing

Carpenter-Morton is the best roofing at its price today. It is waterproof, weather proof and fire-proof—the coldest day in winter or the hottest day in summer do not affect it. It is also a non-conductor of sound.

Carpenter-Morton is fully guaranteed—the best to buy. Send for sample and prices.

Swat the Fly FLIES KILL MORE PEOPLE THAN WARS

WHAT ARE WE GOING TO DO ABOUT IT? The American public has suddenly awakened to the fact that the supposedly innocent house-fly is the most dangerous insect in existence.

We have all of our lives seen flies come in the Spring, swarm thickly all through the Summer and gradually disappear late in the Fall. We know they were pests, but aside from screening our houses and laying sticky fly-papers around where it would be more liable to stick human beings than flies, we have watched their coming and going with indifference.

But now the house fly has been isolated in the laboratory by scientists who have discovered that it is a most important factor in the national death toll. It carries on its filth and carries known disseminator of disease germs.

Investigations made under the direction of Edwin Hatch, Jr., while connected with the Merchants' Association of New York, proved that one of the favorite breeding places of the fly was in the sewage and filth deposited along the river front by the tide.

Dr. L. O. Howard, Chief of the Bureau of Entomology of the United States Department of Agriculture, discovered that the fly prefers as its habitat and nursery for its young the filthy stable or outhouse, the garbage can or the dirty corner under the sink.

There has been a nationwide agitation started against the fly. Extermination is the word. State Boards of Health, City Health Departments and clubs of patriotic citizens all over the land are organizing in a determined effort to stamp out this death-dealing pest.

The services of the Boy Scouts have been enlisted in many localities and through their efforts millions of flies have been destroyed, and more important still, their breeding places, the filthy nooks and corners, have been cleaned up.

"Swat the Fly" has been adopted as the slogan of different clubs and societies interested in their extermination, and many effective posters and circulars have been distributed to arouse communities to the danger and disgusting filth of flies as well as to teach the best means of fighting them.

When we realize that flies come into our homes fresh from the garbage can, the privy vault, the manure pile, the cesspool, the sick room, from decaying animals and vegetable matter, that they alight on our food and deposit filth and disease germs wherever they alight, that these germs may infect us with tuberculosis, typhoid fever, scarlet fever, diphtheria and other infectious diseases, every man, woman and child should do his or her utmost to stamp out this menace to health. Do not be misled by a false sense of humanity. Kill them ruthlessly or they may kill you.

While a good start has been made, the surface has scarcely been scratched as yet. It will take years of unflagging labor to put flies where they belong—out of existence. In the mean while we should take every precaution to prevent flies from poisoning our food and murdering helpless infants. A fly in the milk may mean a baby in the grave. It is undoubtedly true that every year thousands of babies are killed by flies. Flies are attracted by milk. Wherever milk is exposed, there you see flies accumulating. They walk around the mouths of milk bottles. They crawl inside milk pans and jars. They fall into the milk. Wherever they alight they leave death dealing germs.

Germs multiply with frightful rapidity in milk which rises to a temperature of 50 degrees or above. One germ in a bottle of fresh milk will breed 7,000 more germs within 34 hours at a temperature of 85 degrees. Each of these 7,000 germs will breed 7,000 new germs within the next 34 hours. These germs in milk are the prime cause of the terrible infant mortality during the hot months.

Screen your house to keep out flies. Whenever you see a fly kill it. Keep your house and yard clean, thus doing away with breeding places for flies. Keep your garbage cans covered. Keep flies away from the sick. Screen the patient's bed. Immediately isolate and disinfect all discharges from the sick with a powerful germicide. Do not eat food on which flies alight. Protect your baby's food. Your baby is helpless and cannot protect itself. Buy pure milk. Keep the milk cold. Do not allow flies to come near the milk. The simplest and best method of keeping milk cold, clean, germ and fly proof is to chill the milk to a low temperature as soon as it is received and pour it into a Thermos Bottle. The Thermos Bottle will keep the milk ice-cold for three days and as it is sealed with a cap no flies can get near the mouth of the bottle or come in contact with its contents.

The Thermos Bottle not only insures the milk coming out as pure and cold as it went into the bottle but it is the greatest convenience to mothers with young infants, as it is a portable refrigerator which can be taken everywhere the baby goes, thus making it possible for mothers and infants to spend long hours in the open air. Two Thermos Bottles, one filled with cold milk and the other with hot water, save many needless footsteps and loss of time in preparing the baby's food day and night. At feeding time the cold milk is reduced to the proper mixture by adding hot water, which brings both milk and water to the proper feeding temperature. This method has been approved by leading physicians all over the world. Mr. William B. Walker, President of the American Thermos Bottle Co., is deeply interested in all organized efforts to cut down the appalling death rate of babies. Last summer he contributed hundreds of Thermos Bottles to the poor of New York. These wonderful bottles are now made in Toronto, Canada. Prices \$1.25 up. Ask your druggist or Sporting Goods Dealer to show you Thermos Bottles.
