

# ADVANCE SHOWING OF HOLT RENFREW FURS

## MAY 26th, 27th

The HOLT RENFREW representative will be at Moore & McLeod Limited Tuesday May 26th, Wednesday May 27th, and will be showing a smart collection of new FUR COATS, JACKETS, and SCARVES — Fashions designed for Spring and for next Winter.

You should, by all means, take advantage of this opportunity of seeing what the well dressed woman will wear in FURS.

The name HOLT RENFREW expresses to all a definite standard of superiority and a certainty of satisfaction.

Consult the HOLT RENFREW representative about repairs or the remodelling of your FURS.

Consultation carries no obligation and involves no charge.

## FUR STORAGE

We will be glad to arrange for you SUMMER STORAGE of your Furs in HOLT RENFREW COLD AIR VAULTS.

Safe... and insured against every risk.

## REPAIRS, REMODELLING, ALTERATIONS

The HOLT RENFREW representative will be glad to give you plans and estimates on remodelling and repairs of your present coat. Place your order now and have the work done at the more favourable prices available during the quiet summer season.

### Pasture For Pigs

(Experimental Farms News)

With the coming of spring, plans for the efficient utilization of pasture should be considered by each swine producer. Possibly the greatest fault in pasture management is that of expecting too much from the pasture. While pasture provides succulence and is a source of protein, minerals and vitamins, it does not supply all of the requirements for quick and economical growth. Rather, pasture is an excellent supplement to grain feeding under certain fairly definite conditions, says E. F. Fraser, Division of Animal Husbandry, Central Experimental Farm, Ottawa.

For the mature boar and dry sows, pasture is good and should be utilized as fully as possible. Some grain will generally be needed but only in limited amounts, for the boar and sows can get the most of their requirements from a good pasture. For young growing gilts and boars and for nursing sows and litters pasture can also be used to advantage. Here, heavier again feeding will be required. With a good pasture developed at three to four months of age the feeder pigs should be taken indoors and fed up to market weight. Some very successful swine producers do not pasture their market hogs at all but cut the green feed and supply it to the pigs in indoor pens. While this entails more work, nevertheless, it saves on the feed and the hogs will grade better than where allowed to remain too long on pasture. There are a number of pasture crops which will prove useful in the swine feeding. Either legume crops such as alfalfa and clover or annual crops such as rape or a mixture of the coarse grains can be used. A bulletin, "Swine Production," prepared at the Lacombe Experimental Station give further details on suitable pasture crops and also discusses the economy of pasture and indoor pig production.

### ONION LACKS NUTRITION, BUT FLAVOR MAKES IT NECESSARY

While vitamin tables rate the onion low in vitamins, it is one of the most important crops for the Victory Garden. The reason for its importance of course is its flavor. For centuries, vegetables of throughout the world to flavor both cooked dishes and raw salads. In Great Britain last year onions were so scarce that they were used as prizes in raffles. Onion seed is selling this spring for many times its cost a year ago, owing to a shortage in this country. But amateurs have best success with onion sets, which are plentiful and reasonably priced.

Onion sets are small onions grown last year in crowded rows, so their development was arrested. Stored over winter, they are planted this year to produce green onions or mature, whichever you wish, in much shorter time than seed will do it. If you want green onions, use large sets planted deep; for mature onions, use small sets, not so deep. To introduce the onion flavor into salads and cooked dishes in a more subtle way than by the outright use of onions, the amateur gardener may grow chives and leeks. Chives are perennial, and besides producing tubular leaves which add just the right accent to bowl salad and cottage cheese, they bear lovely mauve blossoms. You may divide the roots of established plants, or start them from seeds, or plant, and they will make a most attractive border for a garden in living many years. Leeks are always cooked, and many esteem them superior to onions in a stew. They are grown from seed, and should be transplanted for best results. The English gardeners pride themselves on exhibition leeks which may be grown in this manner: When the plants are about as thick as a lead pencil lift them, and set each one in a hole made with a dibber. Do not fill the hole, but merely cover the roots at the bottom with earth and let the hole fill naturally with washed earth. In rich soil the leeks will grow to a diameter of an inch or more. If you want to accumulate a stock of garlic, assuming your consumption of this article is larger than the average, you can do it by planting the small garlic cloves. Shallots, another form of the onion used chiefly for cooking and having a mild flavor, are grown from sets which may be planted in the fall where the winters are mild, and in the spring in colder states. Egyptian or perennial onions are true perennials, living many years in cold weather states. They are grown from sets planted in the fall and produce green onions as soon as the ground thaws out in the spring.

Highest average Junior grades — Noreen Shaw and John MacEwen, 93%. Perfect attendance — Charlotte Strang, Genevieve Shaw, Cynthia Bette, Grace Strang, Inez Shaw, Shirley MacDonald, Florence MacLean, Eleanor MacEwen, Lois MacLean, Joan Strang, Elizabeth Darrach, Louis Shaw, Miriam Strang, John MacEwen. Teacher—Eileen Shaw.

NEW DOMINION SCHOOL Report for the month of April. Grade X—1, Charlotte Strang; 2, Genevieve Shaw. Grade IX—1, Cynthia Bette; 2, Grace Strang; 3, Inez Shaw. Grade VI—1, Shirley MacDonald; 2, Florence MacLean, and Eleanor MacEwen, equal; 3, Sheldon MacDonald. Grade V—1, Lois MacLean; 2, Elizabeth Darrach; 3, Joan Strang. Grade IV—1, Louis Shaw. Grade II (a)—1, Noreen Shaw; 2, Miriam Strang. Grade I (b)—1, John MacEwen. Grade I—No tests. Highest average Senior grades — Shirley MacDonald, 96%.

### How Are Your Eyes?

If you are having symptoms of strain — headaches, sore eyes or dizziness — consult a specialist. At your service with years of experience and a thorough refracting service. Call in and discuss your difficulties.

### CENTRAL GUARDIAN LOOK OUT FOR YOUR LIVER

Buck it up right now and feel like a million!

Your liver is the largest organ in your body and most important to your health. It cleans the blood, filters out poisons, and gives you energy. When your liver gets out of order, you feel tired, nervous, and your mood is off. When your liver gets out of order, it decomposes in your intestines, and you feel sick, dizzy, and your work suffers. You feel "run-down," nervous, backache, dizziness, dragged out all day long.

For over 35 years thousands have been relieved from these miseries — with Fruit-A-Tives. So can you now. Try Fruit-A-Tives — you'll simply delight how quickly you'll feel like a new person, happy and well again. 25¢.
