THE MORNING GUARDIAN

SATURDAY, MARCH 7, 1903.

INTERNAL COMMERCE.

While the trade of the Dominion with outside countries is carefully measured at the custom houses and the tabulated figures are afterward given to the country in the published reports, we have no means of learning with any degree of accuracy the extent of what may be called our internal trade. This is regrettable as all would be glad to learn what is the nature and value of the trade passing from Province to Province. But estimates have been made of late both of the internal trade of the United Kingdom and of the United States. For instance, the internal commerce of the United States is estimated for last year at about \$21,000,000,000. The total foreign trade of the country for the same time was \$2,330,022,888. So that the internal trade was about nine times as great as the external trade, if the estimate is about correct. But whether the words internal trade mean simply the trade from state to state, or the much larger trade between all the individuals and communities of the nation we are left to guess.

New York City may have a large interchange of trade with Boston, which would be interstate trade, while the equally large trade, say between New York and Albany would not be interstate trade, but would still be internal trade. So it is seen that while in the first place we have only an estimate of internal trade, in the second place we hardly know what the phrase internal trade may mean. In the United Kingdom it is estimated that the internal trade is fifteen times as great as the external trade. We take it that in this case internal trade means something more than that which crosses the boundaries of the Three Kingdoms. It may also be assumed that in a nation which like Britain buys nearly two-thirds of its breadstuffs and a still larger proportion of its lumber abroad the internal trade would necessarily be much larger in proportion than in a country like Canada where our breadstuffs and timber are exclusively produced at home. The total foreign trade of Britain in the year 1900, it may be mentioned was \$4,387,000,000 and the estimated internal trade \$68,300,000,000.

For the reasons mentioned it seems probable that the proportion of internal to external trade in Canada conforms more nearly to the United States than to the British standard. We may therefore make an estimate of Canada's internal trade at nine times that of our external trade. The total trade between Canada and the outside world for the year ended 30th June last was \$114,517,358. If our internal trade during the same period was nine times as great it would make the formidable value of \$3,730,656,222. Or if we take the British ratio of fifteen to one our internal trade would be over six billions. In any case our people constitute one of the most remarkable trading communities on earth. Our foreign trade last year was very nearly one fifth as great as that of the United States which has fifteen times as great a population as the Dominion. Our external trade was over \$78 per head, and our internal trade estimated as above was \$624 per head.

We have not advanced the price of our tobaccos: Amber smoking tobacco, Bobs, chewing tobaccos are the same size and price to the consumer as formerly. We have also extended the time for the redemption, of Snowshoe Tags to January 1st, 1904.

THE EMPIRE TOBACO Co., Lt

the per capita proportion of external and internal trade of the United States was respectively about one third of these figures.

It seems to be admitted that since Cuba has been given the privilege of self-government the Cubans have managed their affairs much better than was expected. One American journal says "they have manifested an agreeable and unlooked for capacity for home rule." But just now President Palma has signed a bill which has passed the Cuban Congress authorizing a loan of \$35,000,000, most of which is intended to be distributed among the soldiers who fought to make Cuba free. It seems they do not think the freedom of their country a sufficient reward for their labors. They want the cash and will get it. Not all the patriots even of modern times have been so fortunate.

Our despatches a month ago noted the publication of a miniature sea newspaper on board the S. S. Etruria. The news was received at midnight February 6-7 when the ship was seventy miles off the Marconi station at Crocks haven, Ireland on her trip eastward. It contained thirteen items of news events that had happened after the ship sailed—in all about 100 words. All the important news of the ship's passage was sent ashore and printed in the morning newspapers of Liverpool before the ship's arrival. On her return trip the Etruria when 150 miles out received 120 words of news from the shore. The editions of the first sea newspaper were made up of 500 copies each which were laid upon the tables for the passengers at breakfast.

KILLED AT THE THROTTLE.

PRITTSBURG, March 2.—When the first section of passenger train No. 5 of the Pan-Handle Road reached the big walnut bridge, just east of Columbus today, it did not decrease speed in obedience to the slow orders issued for the bridge last Monday, but rushed across at the rate of 60 miles an hour. Fireman Cristian looked over at Engineer Smith and was horrified to find the engineer crouched against the reverse lever with both arms about it. When examined a deep gash exposing the brain was found in his right temple. It is thought that, while bending out of his cab window he was struck by some protruding object and was killed.

SULTAN'S TROOPS DEFEATED.

MADRID, March 3.—A despatch to the Imparcial from Ceuta Morocco, reiterates the report that the Sultans troops have been defeated and that War Minister Manebhi has been killed. The message does not indicate the date of the engagement or the place where the battle occurred.

WORN OUT

A woman worn-out, who never has to lift a hand for herself, who does not know the meaning of the word "worry"! How can it be possible? That it is possible is proved by the experience of many a woman who, because of sleeplessness, nervousness, backache and other womanly ills, becomes an utter physical wreck.

Dr. Pierce's Favorite Prescription gives new life and new strength to weak, worn-out, run-down women. It establishes regularity, dries unhealthy drains, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

"I suffered for five years with inflammation which caused violent pain and often torture so bad at times that I could not be about to attend to my daily duties," writes Mrs. Julius C. Bell, of Bathrood, Kingston, Ont. "Life was simply misery to me and I did not know which way to turn for relief. Had tried doctors but found they did not help me. My druggist advised me to try Dr. Pierce's Favorite Prescription—curing it in glowing terms. I decided to give it a trial and brought a bottle home. I am happy to say that after the use of the first bottle I felt so much improved I decided to take another and after that a third bottle. I have good reasons to be pleased for I am today a well woman, work is easy and the world looks bright. I have perfect health, thanks to your medicine."

Sick women are invited to consult Dr. Pierce by letter, free. Address Dr. R. V. Pierce, Buffalo, N. Y.

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

Intestinal Indigestion

Cannot be reached by stomach medicines or digestants because the LIVER AND KIDNEYS ARE DERANGED and the bowels are constipated. MR. BERNHARDT'S case is a good example of what thousands are suffering.

By far the most important part of digestion takes place in the intestines, as has been repeatedly shown in cases where the stomach has been removed and the patient has lived and digested food without the aid of the stomach.

MR. BERNHARDT

It frequently happens that people who continually dose the stomach for indigestion and use pepsin and various kinds of digestive tablets and powders, can obtain no relief from such treatment, because the real trouble is in the intestines, the liver and the kidneys.

There is fullness and pains after meals, coated tongue, headache, loss of appetite, pain in the limbs and in the back and shoulders, flatulency and constipation, frequently alternating with diarrhoea.

There has yet to be a remedy discovered that is so prompt and thorough in curing intestinal indigestion as DR. CHASE'S KIDNEY-LIVER PILLS, and as this is the most common and severe form of indigestion it can well be claimed that DR. CHASE'S KIDNEY-LIVER PILLS are the most successful treatment extant for indigestion and dyspepsia.

Mr. Hubert Bernhardt, George Street, Galt, Ont., states: "I was troubled for years with kidney and liver derangements and stomach disorders, and suffered a great deal from pains in the back. My digestion was very poor, gas would form on my stomach, and I would often feel great distress after meals. Ordinary medicines did not seem to suit my case at all, but I found that Dr. Chase's Kidney-Liver Pills were both prompt and thorough in their action. They have entirely cured me of my old troubles, my digestion is excellent and I do not know what it is to have a pain in my back now. I can heartily recommend these pills as a splendid medicine for kidney and liver troubles and indigestion."

Dr. Chase's Kidney-Liver Pills

It is not unusual for persons who have long been suffering from chronic indigestion, biliousness and constipation to be thoroughly cured by DR. CHASE'S KIDNEY-LIVER PILLS, which have by far the largest sale of any similar remedy. You may be skeptical, as others have been before you, but a single trial of DR. CHASE'S KIDNEY-LIVER PILLS will convince you of their unusual medicinal value. One pill a dose, 25 cents a box. At all dealers, or EDMANSON, BATES & CO., Toronto.

MR. KIPLING'S LATEST.

LONDON, March 2.—Mr. Rudyard Kipling's poem, "The Settler," in the Times, is based on Mr. Chamberlain's words: "I am convinced that natural forces are drawing the people of Africa together and are more potent than the evil influences tending to separation. It begins: 'Where my fresh-turned furrows run and the deep soil glistens red, I will repair the wrong that was done to the living and the dead.'"

The poem has seven verses, the whole tone of which is regret at the war. The second is typical of all:

Here in a large and sunlit land,
Where no wrong bites to the bone,
I will lay my hand in my neighbor's hand:
And together we will atone
For the set folly and the red breach,
And the black part of it all,
Giving and taking counsel with each,
Over the cattle kraal.

No More Morning Growling.

The introduction of Malt Breakfast Food to the homes of Canada has brought joy and contentment to young and old. Wherever Malt Breakfast Food is made the first dish at breakfast, grumbling and growling about taxed digestion, irritation of the stomach, redness of the skin and skin eruptions is a thing of the past. Malt Breakfast Food is a true health friend: it suits weak and strong stomachs. It does not contain a particle of insoluble starch, and furnishes a quality of nutriment for brain and body that no other cereal food can give. Try a package and note its superiority over all forms of oatmeal. Your Grocer sells it.

GOES TO GLASGOW FIRM.

OTTAWA, March 3.—The A. C. Kiltson & Co., of Glasgow, Scotland, were the successful tenders for the supply of 25,000 tons of steel rails to the Railway Department.

PHYSICAL TRAINING URGED.

LONDON, March 2.—Major-General Sir John Frederic Maurice, K. C. B., in an address here urging physical training of children, said that England was threatened by physical degeneracy. Three out of every five who offered as recruits for the army were wholly unfit. Some children were fed on cold cabbage; others possessed six livers! They could not build up a nation on gin and cold cabbage. The future depended upon the training of both mothers and children.

EDISON AFTER CANADIAN NICKEL.

TORONTO, Mar. 2.—Mr. Thomas Edison the famous American inventor, has recently acquired several nickel properties in the vicinity of Sudbury. It is understood that he requires a considerable quantity of this mineral in making his new storage battery. Several applications have recently been received by the crown lands department, and it is surmised that Edison will construct reduction works in Northern Ontario.

EXAMINED AT THE FRONTIER.

OTTAWA, March 3.—A memorandum has been issued by the Customs Department that in future all baggage property of tourists and travellers shall as far as possible be examined at the frontier instead of transported in bond to its destination.

SHIPWRECKED ARRIVE.

NEW YORK, March 3.—About 40 of the excursionists of the wrecked steamer Madia are among the passengers who arrived to-day on the steamer Pretoria from Bermuda.

DR. A. W. CHASE'S CATARRH CURE... 25c.
Is sent direct to the diseased parts by the Improved Blower. Heals the ulcer, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

P. E. ISLANDER'S MURDERED.

DOVER, Me., March 3.—The Piscataquis county Grand jury today returned an indictment charging Edward Balford with the murder of Martin Stanton, of P. E. Island in township 7, last October. It is expected the trial will begin March 12th.

THE AGE OF BRAIN WORK.

"In these days, half our diseases come from the neglect of the body in the over work of the brain. In this railway age the wear and tear of labor and intellect go on without pause or self pity. We live longer than our forefathers but we suffer more. They fatigued only the muscles, we exhaust the finer strength of the nerves." Dr. Chase's Nerve Food is the greatest medicine of this age because it is best suited to the needs of the present day. It restores and revitalizes wasted nerve cells and makes the pale, weak, and exhausted strong and healthy and vigorous.

KILLED BY LOCOMOTIVE.

PORTLAND, ME., March 2.—Wm. J. Kemp, night yard master in the Grand Trunk was killed at 9.30 to-night by being run over by a locomotive. No one saw the accident. Mr. Kemp was 45 years old and leaves a widow and three children. He was a native of Quebec.

HALIFAX BAKERS BAKING BETTER BREAD.

A few years ago the bread furnished by bakers in the City of Halifax was of a very poor quality, and only those bought it, who by reason of various circumstances, were unable to make bread at home. But the tables have been turned. Two or three of the bakers who enjoy the best trade make as good bread as most householders are able to do, and people have thus been so encouraged to buy bakers' bread, that the making of home-made bread is coming to be a lost art in the Provincial capital. The chief reason for this is that the bakers are using better flour. The baker who enjoys the largest trade uses Oatley's flour exclusively.

Canadian Public Opinion

All over the Dominion you will find the better class of people report their experience has taught them that McLaughlin Vehicles being built by Skilled Workmen from the Best Materials give better satisfaction than any other vehicles and it is their opinion that it is better to pay a little more money and get a McLaughlin. "One grade only and that the best."

McLAUGHLIN CARRIAGE CO., Ltd. Eastern Branch St. John, N.B. "Mention The Guardian".

NOW

Is the time for new shoes. In dropping the rubbers our old shoes look a little off—so a new pair is needed. Try a McPherson or a P. S., the best shoe made for
