**Bengalese Students Turn From "National" Schools**

(United Press.) CALCUTTA, Feb. 21.—Nearly half of the 55,000 students who deserted government and mission schools in Bengal during the strike of 1920 have now returned, according to figures printed in a government report on the progress of education in Bengal. The student strike was a result of political agitation, and was followed by the establishment of "national" schools by means of which the non-cooperators sought to boycott all government and government aided institutions.

"These schools are ill-housed," states the report, "badly equipped and indifferently staffed. Most of them lead a precarious existence and their financial statements, if they are ever made, would probably bear little inspection. Fees, not always paid, doles from congress funds; occasional wind-falls from non-cooperators; a varying amount realized from the sale of rice brought by pupils as a sort of payment in kind, these are the main items of income.

"There seems to be no uniformity of studies. The pupils attend or not as they please. Signs are not wanting that now that the first flush of enthusiasm has passed, these institutions will die of inanition, though their establishment has probably done more than could a good deal of counter-propaganda to convince the people of Bengal of the weakness of the non-co-operation movement in education."

**Settlement of Strike**

(Continued from page 1)  
 trial struggle which is expected about the middle of April. Next time it will be the miners who have already voted in favor of cancelling their present wage agreement. The new demands which it is certain the miners will present have not yet been made public if indeed they have been formulated.

The quick settlement of both the railway and dockers' strike has proved quite favorable to the government who were obviously disturbed over the possibility of a general transportation strike which seemed a possibility twenty four hours ago. Nevertheless the success of the strikers in obtaining their demands may induce other industries to follow the dockers' example.

After a secret conference Wednesday the employers agreed to the men's demands for a two shilling a day increase. They stipulated that the increase should come in two installments and agree to an inquiry into the questions of maintenance and steady employment. If the delegates ratify the settlement the strikers will permit the removal of foodstuffs from the quayside tomorrow but general resumption of work is not likely before Monday.

**Silver Fox Furs**

(Continued from page 1)  
 farming is now on a business basis that will bring results to the farmer. There is no doubt that many conditions arise in connection with the producing of Silver Fox furs that could be greatly improved, and which would make the sale of fox skins even better each year, or at least make the average price something better. For instance, a large number of the fur farmers are killing their foxes too early in the season, thus causing blue pelted or underprime skins for the market. The highest prices realized were for prime skins and these were pelted after December 15th. One of the chief factors to be recognized is the feeding so as to produce good clear colored skins. As was evidenced on the sale the clear colored skins free from any brownish cast always realized good top prices.

**Demand Heavy of 18th Amendment**

(Canadian Press.) MORRISTOWN, N. J., Feb. 21.—Hudson Maxim, famous inventor of Lake Hopalong, who has declared that under the eighteenth amendment, tea and coffee are to be regarded as intoxicating, and traffic in them prohibited, announced today that he had retained Elmer King, a lawyer of this city, to bring friendly suit against a hotel in Newark to test the validity of the amendment. He said that he was entirely in earnest.

Mr. Maxim said that he was strongly in favor of moderation in drinking as in everything else, but that "prohibition at the point of a pistol" would never produce the co-operation "needed to destroy the evils of drink."

**NERVE—WORN WOMEN Gain Strength and Vigor by Using DR. CHASE'S**

**QUAKER FLOUR CONTEST**

**Prize Winners Announced Yesterday By Col. Peake Local Representative.**

The great interest taken in the Quaker Flour Contest was evidenced yesterday when the judging of the entries was done at the Rogers hardware store. There were in all nearly one hundred entries, and about two hundred leaves of bread, all of excellent quality.

Throughout the day the store was crowded with people interested in the contest. Entries were taken from 9 a.m. until 2 p.m. After the bread was all in each loaf was ticketed with a number corresponding to the number and name taken by Col. Peake, the agent for the Quaker Flour Company. The judges had no possible way of knowing whose bread they were examining, as the number was all they had to go by. The loaves entered were so good that in many cases the judging was a most difficult matter. The judges were: Mr. Newel, baker at Tomlin's Bakery; Mr. Rodd, baker at Hynes' bakery; and Mr. Whitlock, baker at Stewart's bakery. Tomlin's bakery and Stewart's bakery had each an excellent display of pastry and fancy bakings, all made from Quaker Flour, but also the large interest.

All afternoon a steady stream of visitors examined the exhibits and the interest was very keen at five o'clock when the judging concluded. Col. Peake announced the prize winners as follows:

1st Prize—Mrs. Fred R. Roberts, East Royalty.  
 2nd Prize—Mrs. John Connolly, 95 Kent Street.  
 3rd Prize—Mrs. A. J. Warren, 190 Weymouth Street.  
 4th Prize—Mrs. George Worth, 208 Grafton Street.

The exhibitors desiring to do so had the opportunity of donating their bread to the Orphanages.

The contest not only demonstrated the splendid quality of Quaker Flour, but also the large number of specially good bakers in Charlottetown. The judges needed all their professional experience in making the awards and from the careful manner in which they performed their duty the Company believe they made a wise selection in appointing Messrs. Newel, Rodd and Whitlock as judges.

**LARGE SMELT CATCH**—According to a recent Ottawa despatch the catch of smelts on the Atlantic coast for January totalled 35,218 hundredweights. At North Sydney, where the new cold storage plant is operating one steam trawler landed 30,000 pounds of smelt and much other fish, the largest catch registered at that port. The catch of lobsters was small.

**Rotary Club**

A short address on International Rotary was given at Rotary luncheon yesterday by Rotarian H. H. Shaw, who presided at the meeting. The Rotary message for the week, which is being celebrated by Rotary Clubs throughout the world as the 19th organization anniversary, was delivered by Past District Governor W. Grant. The guests present were W. L. Patterson, R. W. Tufts, G. Elliot Full, Rotarian V. E. Haslam, of Providence, R. I., and Pope Bagnall. Communications re the District Convention at Fredericton April 20-30, and the International Convention at Toronto next June were read by Rotarian C. H. Black and President Dr. Yeo, respectively. The musical programme included a solo by Mr. Full, who has just returned from the District Convention at Fredericton. The evening Rotary was an enthusiastic Rotarian.

**PERSONALS**

Hon. Jas. A. McNeill and Hon. A. F. Arsenault, Summerside were passengers to the city yesterday.

**Horse Racing at North River**

A large crowd attended the ice races at North River Monday afternoon; much credit is due those who got together Monday morning and in a few hours had the track in good conditions for racing.

In the class A. Trot and Pace only two horses faced the starter John R. and Keltie which resulted in a win for Keltie, owned by Mr. J. A. Murray, Clyde River and driven by Hugh M. Walker. John R. owned and driven by Mr. Bertram Younker, North River went a real good race, and no doubt with a little more fast work, the result of their next race may be different.

Class B. Trot and Pace brought together the same three horses as the previous race Canadian Belle, Lady Medium and Cress. The greatest interest of course was centred in the result of this race. Canadian Belle came through with a win in fine style in the second and third heat after losing the first heat to Lady Medium whose her sulky struck the snow bank causing her to lose her stride. Lady Medium came second and Cress third. Canadian Belle is owned by Mr. John Walker, Charlottetown and was driven by Hugh M. Walker.

Lady Medium is owned by Mr. Elmer Clow, North Wiltshire and Cress by Mr. Chester Edwards, Hampshire. Class C. Trot and Pace was won by The Miller's Maid owned by Mr. Brenton Scott, Clyde River and driven by Mr. Cecil Scott. This is the first race this mare has ever started in and she made a splendid showing.

A meeting of the Club will be held at their hall Saturday evening, Feb. 23rd.

**Between \$70,000 and \$80,000 Fire at Bristol, N. B.**

(Canadian Press.) BRISTOL, N. B., Feb. 21.—The store of A. W. Phillips was totally destroyed by fire this morning and the loss is estimated at between \$70,000 and \$80,000 with insurance of about \$35,000 on the building and contents. The store was a fine wooden building, three storeys and basement and was owned by Mrs. Annie Phillips and occupied by A. W. Phillips, as a general store. The millinery store of Mrs. Marich in the same building was also destroyed and furnishings and stock were completely ruined. Mrs. Marich carried \$2,000 insurance on her furniture and \$500 on her millinery stock.

It is supposed that the fire originated in the basement from the furnace. There was no fire fighting apparatus available and nothing was saved.

**Summary**

Class A. Trot and Pace	
Keltie (John Murray)	1 1
John R. (B. Younker)	2 2
Class C. Trot	
Commodore S. (Brent Scott)	1 1 1
Lady Winslow (S. Holroyd)	2 2 4
Upton Todd, (H. McCluskey)	5 4 2
Edd H. (R. Horne)	3 3 3
York Prince (B. McDonald)	4 5 5
Class B. Trot	
Canadian Belle (H. Walker)	3 1 1
Lady Medium (E. Clow)	1 2 2
Cress (E. Edwards)	2 3 3

**Mopping Up Moscow Is in Full Swing**

(United Press.) MOSCOW, Russia, Feb. 21.—The Soviet authorities are continuing the "mopping up" of undesirable. Professional gamblers, money speculators and everyone else without a recognized legal occupation will be deported to certain fixed places. Their quarters will be confiscated and handed over to the Soviet officials for redistribution.

The council of people's commissaries is now considering a project of stringently regulating the functions of all Moscow visitors. The project provides that no stranger can stay longer than one month in Moscow unless he has been transferred from some state institution to Moscow to work there, or unless he has been detained by official business.

The penalty is a fine of from 100 to 500 gold rubles and expulsion from Moscow for three years.

**Brazil Invites Inspection of Her Natural Wealth**

(United Press.) RIO DE JANEIRO, Feb. 21.—For the purpose of promoting a more favorable opinion than Brazil at present enjoys in foreign financial circles, the government has invited a British mission of financial and economic experts to visit this country.

The uneasiness over the Brazilian financial situation, as indicated by low quotations on Brazilian bonds and falling exchange, in the opinion of the Brazilian government, is not justified by the economic conditions and vast resources of the country.

The foreign mission was invited to enable first hand investigation by experts chosen by the foreign investors themselves. It is the confident belief of government officials that when the true conditions are thus reported to the foreign money markets, confidence in Brazil and its future will be restored.

A British mission was chosen because British capital predominates in foreign investments in Brazil.

One of the semi-official declarations concerning the visiting mission estimated Brazil's total production this year, agricultural, mineral and industrial, at 12,000,000 contos of reis, or slightly more than one billion dollars at the present exchange.

**Pistols Common as Lead Pencils in U. S. Says Judge**

(United Press.) CHICAGO, Feb. 21.—A drastic bill to prohibit the importation of revolvers and placing an excise tax of \$100 each on those manufactured for export, introduced in the United States Senate by Senator Roy all of S. Copeland of New York, has been endorsed by the Michigan Audubon Society, Mrs. Edith Munger, of Hart, Mich., the president has announced.

The bill, largely written by Chief Magistrate William McAdoo of New York City, was recommended to the Michigan Society by its crime prevention committee chairman, Joe Beatty, of Burt.

In acknowledging the society action, Magistrate McAdoo declared that the bill has been endorsed by two international police conventions and approved by the American Bar Association, as well as New York judges and the mayor.

Those opposing it, he said, are advancing "an illusion very common" that a law-abiding citizen armed with a pistol meets an outlaw, highwayman or burglar on terms of equality. "This is absolutely not so," he declared. "The robber has carefully prepared to surprise the victim in or outdoors and I challenge opponents of the proposed law to give the number of cases within the last 10 years where the armed citizen has prevented the burglary, shot the burglar, or deterred the highwayman from carrying out his purpose.

"Pistols are as common in the United States as lead pencils. There are more people in the United States carrying pistols or possessing them outside the armed forces, than in all the rest of the world. There are more shootings and killings with revolvers in the United States than in all the countries of Europe, Asia and Africa.

"After we have taxed the pistol out of existence as far as possible in the United States, we will be in a position to deal with crooks.

"From my experience as former police commissioner and eleven years as chief of police of the city of New York, my advice to law-abiding citizens, if they have revolvers, is to get down the river and throw them in."

**No Starvation in Hebrides**

(Canadian Press.) MONTREAL, Que., Feb. 21.—That there is no starvation in the Hebrides and "little ground for alarmist reports" is stated in a special despatch this morning contradicting previous reports that the Hebrides were in a critical condition.

A former New York despatch that Lord Balfour had applied to the American Sulgrave Institute on behalf of the Hebrideans, was also denied.

**French Chamber**

(Continued from page 1)  
 ment grants him its confidence, thus setting at rest all talk that he was inviting defeat on a question of internal politics providing that if implied no rejection of his foreign policy.

He has no intention of withdrawing, he told the Senate "I intend to bring to a conclusion the heavy task you have entrusted to me. It has been said that I am notaverse to going down on a question of difference of opinion between the chamber and the senate on a purely internal matter but I have too much respect for the Senate and for parliamentary procedure to seek such a pretext. I shall continue as long as I have your confidence.

Undeterred by the strong opposition manifest against the electoral bill the Premier has staked the life of his Cabinet upon an uncompromising relation of the measure as sponsored by the government. Never since M. Poincare assumed power has the Senate appeared so evenly divided upon any thing. The government's supporters who were counting upon a majority of 30 to 40 last Saturday now admit the Upper House may give the government a reduced majority of around 20.

"You know me well enough," continued the Premier in his address, "not to classify me among those seeking subterfuges to evade responsibility. I have the sincerest desire to continue the work to which I have consecrated two years of my life. If I am successful in passing this measure I will come before you also to ask you to ratify other measures recently passed by the Chamber of Deputies of utmost importance to the country.

In this the Premier referred to the fiscal measures now in the Lower House. "However he continued "should you not to continue me in your confidence I will come back among you and resume my place in the ranks with the feeling that I am leaving to my successors pledges that will facilitate their conversations with our allies."

**Toronto to Have 21 Storey Building**

(Canadian Press.) TORONTO, Feb. 21.—A 21-storey office building, costing \$1,200,000, is to be erected at the southwest corner of Adelaide and Victoria streets, in the downtown section of the city. This is announced by James O'Neill, owner of the site, who has just returned from New York where arrangements as to the financing of the proposition were made. It will be probably the tallest office building in Toronto.

**Germany Prospers**

(Canadian Press.) BERLIN, Feb. 21.—Germany's revenues during January showed an unexpected and encouraging growth, according to the financial editor of the Deutsche Allgemeine Zeitung, who estimates the total income at 500,000,000 gold marks, which represents a gain of 191,000,000 gold marks over the government revenues for December.

This showing has caused a most pleasant surprise in financial circles, says the newspaper, because December revenues already had shown a growth of approximately ten times those of November.

"No one style is suitable to the flexible demands of the modern world, with its varying phases of a highly complex civilization. In spite of the fact that there is much that is crude and disgusting in our present literature the best of it points to something finer

**Church Leader Explores Modern Trend of Youth**

(British United Press.) CHICAGO, Feb. 21.—One phase of what has been called the "revolt of youth" today may be truthfully called the "collapse of restraint," according to Dr. W. S. Board, corresponding secretary of the board of Sunday schools of the Methodist Episcopal church.

Parents have almost quit raising their children; teachers who no badge of authority, and society in general refuses to train up children in the way they should go," Dr. Board asserts. "Even moral distinctions are denied if they offer the slightest barrier to the complete satisfaction of life's many appetites.

"Any hesitation to follow one's natural instincts to the fullest is branded as cowardice or hypocrisy. This teaching is finding its way into the thinking and living of our day.

In the critical transition of authority it is our solemn duty to arouse the teaching capacity and kindle to a flame the spiritual devotion of the church in order that the on-coming generation may have an adequate personal experience of God."

**Electricity May Uncover Millions in Alaskan Gold**

ANCHORAGE, Alaska, Feb. 21.—The use of electricity, generated from coal slack in the subbituminous mines of the Healy fields, is one of the plans under consideration as a means of uncovering the estimated \$200,000,000 in placer gold believed to lie in the gravel of the Tanana valley around the banks, Chatanika and adjacent points.

The proposal is being investigated by Professor Charles E. Bunnell, president of the Fairbanks agricultural college and school of mines. Experts have expressed the opinion that electricity will solve a problem that has been baffling. With the exhaustion of the shallow ground in the Tanana valley, placer operations have been confined to hydraulic, dredge and shaft work, entailing heavy expense and many hazards in prospecting. To sink shafts requires a shaving outfit and highpriced fuel, even with mines near by.

In the frozen creek beds there is no trouble from water and pumping is obviated. Yet in other places it often happens that "live" water is encountered just when the prospector is ready for sampling, and elaborate pumping operations are required. Electrical thawing is said to be feasible, while pumping, when necessary, would be reduced greatly in cost by the use of an electric pump.

If electricity is employed, it will be transmitted a distance of approximately 110 miles to Fairbanks and distributed over an area of 50 square miles.

Lack of capital has retarded the development of this region. It is held that the cheapness of the electricity would remove this obstacle.

One mine operator of the district reported that last year he took out more than \$100,000, but made a profit of only \$2,000, owing to the overhead cost.

With seemingly inexhaustible coal fields supplying fuel for winter generation, and the released water power of summer producing electricity during the open months, it is predicted that the next decade will see electricity supplanting all other power in Alaska and supplying the means through which the mining of precious metal, especially gold, will become a conservative commercial venture instead of a romance with attendant hazards.

**Asks Cooperation of All Parents in School Problems**

CHICAGO, Feb. 21.—If the school is to accomplish anything more than the transmission of technical knowledge from one generation to another, the existing attitude of indifference toward the child's education must give way to the realization that the visit of the parent to the school is an opportunity. Mrs. Edith E. Bristol, dean of girls at Soldan High School, St. Louis, told members of the National Association of Deans of Women in convention here today.

"Educators alone cannot direct the mind of the child in the proper channels, technically and socially," Mrs. Bristol said. "We must realize that preoccupations with school affairs tends to keep us from envisaging the community which we serve. Our teaching of single subjects endangers the main object of education, rearing well informed and useful citizens to carry on the world's affairs. If we can see the utility of too much faith in our single handed methods we shall make use of the criticisms expressed by parents, to build up a better mutual understanding and to encourage democratic participation in community life."

In discussing the duties of parents and teachers in relation to schools, Mrs. Bristol urged more interest by parents and an active interest in school life, both educationally and socially.

"The teachers need the suggestions furnished by the parents as much as the parents need them to give the child a technical education. The dean can be the connecting link between the teacher and the parent and on her depends the success of the school. To bring fruitful relations between the school and community, which results in raising the standards of civilization among the younger generation, is one of the many problems confronting educators.

"We have lost sight of the fact that without close co-operation between the school and community the parent and the teacher, the best results cannot be obtained in advancing civilization."

**Compares Laxity of Modern Living to 13th Century**

(British United Press.) IOWA CITY, Ia., Feb. 21.—Celebrating 700 years ago consisted of calling out the army and "mopping up" everybody and everything offensive to the ruling puritanical minds," according to Prof. Nellie S. Arner, of the English department, University of Iowa.

"From about the middle of the twelfth century to early in the thirteenth, sheiks and Sahara Sarabes were having their heyday in the romantic literature of southern France and "black oxen" roamed wild through Provence," says Prof. Arner. "Troubadour poetry reflected the spirit of the times.

"So romantic had the people of this region become that they put loyalty in one's liege lady above everything else, even the church and state.

"This smacked too much of the heretical to suit those in power. The Albigensian crusade of 1209 was begun to correct the situation. Southern France saw so much bloodshed and brutality people sickened of the affair. Troubadour poetry and all its kind went into decline. When the smoke lifted the censors had won, but the ideas carried over in the stories that grew up about King Arthur and the knights of the Round Table.

"The present school of sentimental literature is a recrudescence, with important differences, of the thought of the earlier period. The church in both instances has disapproved of any departure from the puritanical style which character-
