THE STOCK MARKET

By Hugh M. Creighton.

Commercial Paper:
Minimum rate 6 per cent.

The advance in the Bank of England's discount rate from four to five per cent., was not unexpected, although the nervousness which has pervaded all European centres as a result of the European war scare, no doubt hastened the bank's action. The unusual rates for money demanded throughout Europe has had little effect on rates in our market, but the fact that European rates has moved up to a higher level, will no doubt result in higher rates here would otherwise have prevailed. The outlook is that money will remain around 6 percent until after the January half yearly disbursements have been made.

The STOCK MARKET.

A comparison of the decline in prices for American and European stocks, as a result of the European war sacre, demonstrates that prices for American stocks are at this time on a very firm foundation. During the past week some of the more speculative European issues showed a decline of as much as $50 a share, while the decline in American stocks was but from three to five points. This stability of prices for our stocks is the result of odr splendid commercial and industrial position at the present time. Another factor which has aided in sustaioing prices is the strong technical position of our market. The length of time it has taken to accomplish the advance in prices to the present level has resulted in steady investment absotption of the stocks which have been offered for sale. Consequently stocks being in the hands of the investor, rather than the speculator, there was no volunerable speculative account to throw stocks over wholesale, as was the case in Paris, Berlin and St. Petersburg. London and the United States have both been buyers on the decline. This is a good omen for the future of prices.

ANSWERS TO INQUIRIES.

American Malt Corporation.— Net earnings for the fiscal year, ending August 31st, are expected to equal at least 9 per cent on the Preferred stock. An increase of the dividend rate on this issue from four to six per cent, seems highly probable.

American Public Utilities Company Preferred Stock.—This issue receives dividends at the rate of 6 per cent, and is in fair demand at present prices. The Common stock of this Company has great speculative possibilities and will probably have a good advance from the present level.

Bethlehem Steel—.There are rumors current that this company will absorb the Pennsylvania Steel Company and Cainbria Steel Company. Sucn a combination would have a capato approximately $2,000,000. The tons of pig iron per year. Bethlehem Steel Preferred has had a sharp advance due to the above rumor and the possibility that the stock will be put upon a 5 per cent basis.

Northern Pacific.— The result of the past year's operations shows a balance for the surplus account equal to approimately $2,000,000. The earnings for the first three months of the presect fiscal year are in excess of last year.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

DAILY SELECTIONS FOR GUARDIAN READERS

HOME HAPPINESS.

Probably nineteen-twentieths of the happiness you will ever have, you will get at home. The independence that comes to a man when his work is over, and the feeling that he has run out of the storm into the quiet harbor of home, where he can rest in peace, and with his family, is something real.

It does not make much difference whether you own your house or have one little room in that house. You can make the one room a true home to you. You can people it with such moods, you can turn it with fancies that it will be fairly luminous with their presence, and it will be to you the very perfection of a home. Against this (home none of you shall transgress.

You should always treat each other with courtesy. It is often not so difficult to love a person as it is to be courteous to him. Courtesy is of more value and is a more royal grace than some (people seem to think. If you will be but courteous to each other, you will soon learn to lose more wisely, profoundly, not to say lastingly, than you ever did before.

PRINCE EDWARD ISLAND AS A PLACE TO LIVE IN.

(CLASS w., NO. 2).

The advantages are many. As a health resort it can't be beaten. I and my family have been here seventeen months and have never had a day's sickness. In the old country I was always paying doctors' bills. As an agricultural and horticultural country it can't be beaten. You can grow everything necessary for farm and house on your own land and there is a good market for any surplus. Dairying and poultry prices are equal or better than Englands. Dairies and cheese factories are in all districts convenient for all. Churches are also within reach of everyone. Education is the best. In all schcols, besides the ordinary subjects the children are taught Greek and Latin and prepared for college if you wish to send them. All free.

The people are very sociable and neighborly and will help you in any way they can. Speaking generally of the Island it is a cheap place to live in.

Yours faithfully,
Rowland, Lloyd, Day.
York, 9-30-12.

NOTE BY W. S. LOUSON.

I consider if one hundred thousand or more of this excellent testimonial, by one of our settlers, were printed say on past cards, or circulars, and sent through Great Britain it would be a most excellent advertisement for this Province.

There are thousands of farmers in Prince Edward Island alone.

Is it not hard to believe that only one of every five read a farm paper at all?
