Like Comfort?

Then what's the use of breaking down your vigor when there's a way to make and keep your daily life comfortable?

Most persons need all the vitality they can secure. Some have an excess and proceed to destroy it with one or more of the sedative drugs—among the most common of which are tea and coffee.

However, each one must make choice and pay the bill. The one who can cut out tea and coffee when they are known to cause sleepless nights and nervous troubles will surely win the laurels.

INSOMNIA Leads to Madness, if Not Remedied in Time.

"Experiments satisfied me, some 5 years ago," writes a Topeka woman, "that coffee was the direct cause of the insomnia from which I suffered terribly, as well as the extreme nervousness and acute dyspepsia which made life a most painful thing for me."

"I had been a coffee-drinker since childhood, and did not like to think that the beverage was doing me all this harm. (Tea is just as harmful because it contains caffeine, the same drug found in coffee.) But it was, and the time came when I had to face the fact, and protect myself. I therefore gave it up, abruptly and resolutely, and adopted Postum for my hot drink at meals."

"I began to note improvement in my condition very soon after I took on Postum. The change proceeded gradually, but surely, and it was a matter of only a few weeks before I found myself entirely relieved. The nervousness passed away, my digestive apparatus was restored to normal efficiency, and I began to sleep restfully and peacefully."

"These happy conditions have continued and I am safe in saying that I owe them entirely to Postum, for when I began to drink it I ceased to use medicines." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pgs.
