W. C. T. U. Notes

By John Greenleaf Whittier

"The Angel of Patience" By John Greenleaf Whittier. "To weary hearts, to mourning homes, God's meekest Angel gently comes...

"There's quiet in that Angel's glance There's rest in his still countenance! He mocks no grief with idle cheer, Nor wounds with words the mourner's ear...

"Angel of Patience! sent to calm Our feverish brows with cooling palm; To lay the storms of hope and fear, And reconcile life's smile and tear...

"O thou who mournest on thy way With longings for the close of day; He walks with thee, that Angel kind, And makes our own our Father's will...

"Please let me go in by myself," she requested in a low voice of the two shadowy figures that sat with her.

"Of course we won't," Mark objected promptly. "Let me have her, Miss Gamble."

"No, no! Let me walk... I'm all right now." "Are you sure?" "You'd better let me steady you a bit."

"I was just up there," the watchman volunteered eagerly. "Took some police the boss sent for. Shall I walk?"

"No. Stick around where you can hear the bell." "Yes, sir."

"What's happened here?" was Sturges' blunt question as his eyes took in the scene. Nan pushed him aside unceremoniously and knelt at Jean's side.

"I don't believe it!" "The corners of the Cannon mouth flickered."

"No! I scarcely am surprised at your defense. But you see her here now. If she is in the habit of waiting, I suggest your other lady friend do a little searching."

"What's happened here?" "Sturges' blunt question as his eyes took in the scene. Nan pushed him aside unceremoniously and knelt at Jean's side."

Can Find Cocos' Treasure Hoard Says C. B. Miner

(By John LeBlanc, Canadian Press Staff Writer)

GLACE BAY, N. S., Aug. 15.—(A.P.)—A tricky battery spoiled the initial test to determine whether mysterious cosmic rays can endow table salt with the qualities of radium, but even in failure two scientists today found hope of eventual success.

The experimenters, Dr. Joyce C. Stearns, University of Denver, and Dr. D. K. Froman, Macdonald College, St. Anne de Bellevue, Que., have as their aim induction of radio-activity into the salt and its substitution for radium in medical treatments.

"Of course we'll try again," said Dr. Stearns. The battery, part of the measuring apparatus, was short circuited and results were too astounding for the scientists to believe. Even so, the outcome left Dr. Stearns enthusiastic.

"It seemed that the action was greater than could be explained merely by this short-circuiting of the batteries," he explained. "Apparently there was radio-activity, but we can't be sure yet."

The mishap meant that the two scientists must climb Mount Evans again and expose salt to the bombardment of cosmic rays, which occur there at a frequency six times as great as at lower altitudes.

There elaborate ionization equipment is set up to determine whether the salt has been made "jittery"—its electrons and storms left shaking by the cosmic ray bombardment, Dr. Stearns said. If the shuddering of the electrons and atoms can be induced, Dr. Stearns said, he believed rays similar to those of radium will be given off.

MacLeod's grandmother, then just a little girl, was home when the adventurer arrived with so many jewels that, dumped on a bed, it looked as if the room were afire. They were sold cheaply, but Keating hung on to the gold. When he moved to North Sydney, N. S., he was supposed to have hidden the bars around Little Bras d'Or.

When he wanted money, there would be a mysterious night excursion, and next day a package would go to Ottawa.

The miner's father doubted the treasure was there, though. The grandfather wanted him to try for it, but he would never set out. "He claimed," MacLeod says, "that Keating himself was a pirate and had stolen the gold and jewels he brought home."

"My grandmother would often urge me to make the trip to Cocos when I was a man," MacLeod recalls. "She showed me the chart after the boys went on. He and I could never find trace of it. I saw it so many times, though, that I'm certain I could find the location of the treasure, and there'd be no need of digging for it either."

There are some people who are awake to the fact that "just a little smoke" is not all there is to this act. In connection with the University of Minnesota a new cooperative residential was opened. The rules stipulated that the students patronizing the institution would refrain from the use of tobacco and liquor, the students doing all the housework and sharing the expenses. All the room reservations were taken within two weeks.

It was a venture made possible by a Professor in the Physics Department, and will prove to be a paying investment of faith and money.

There can be no doubt of the satisfying future awaiting these self-helping students who have a vision reaching beyond a self-pampered present.

A nation which can spend five hundred millions a year on alcohol and tobacco, and two hundred millions on betting and gambling, is not really poor. The call to us is that of the prophet: "Wherefore do ye spend money for that which is not bread, and your labor for that which satisfies not?"—Dean Inge, in "Things Old and New."

At the behest of their Mayor the people of Vancouver flocked to church on a recent Sunday for service, humiliation and prayer. This is good news; but why should the people of any city be urged by their civic officials to attend church services in honour of their Creator?—Selected.

do happen, "just happen" to get in to the machine. During the last 17 years Ontario has lost through barn fires alone in the neighborhood of \$31,000,000, with a consequent serious effect on the farming industry, and many of these were caused by the growing carelessness of smokers.

ACADIA University

Graduate courses leading to degrees of M.A., M.Sc., B.D., and M.Med. Four-year courses leading to degrees in Arts and Science, Household Economics, Music, and Theology.

One-year special course in Education for graduates to qualify for the Teacher's License of the Province of Nova Scotia. Three-year course leading to a licentiate in Music.

Three-year course leading to a certificate in Secretarial Science. Three-year course in Engineering, with diploma, leading to final years in Nova Scotia Technical College and McGill University.

Two-year course leading to diploma in Household Economics. Two-year course leading to Home-Makers' Diploma. Pre-Medical and Pre-Dental Courses

THE HORTON ACADEMY OF ACADIA UNIVERSITY (For Pre-College Boys and Girls) A Model Academy operated by School of Education General, Business and Matriculation Courses Two-year Secretarial course in affiliation with Acadia University for university matriculants. Carefully supervised residences

A large and carefully selected faculty Moderate charges Unique opportunities for hearing world-renowned artists Ideal Location Superior Equipment Excellent Gymnasium and Swimming Pool

FOR INFORMATION APPLY TO THE REGISTRAR WOLFFVILLE NOVA SCOTIA

KING'S COLLEGIATE SCHOOL Windsor, Nova Scotia 1788

"EDUCATES THE WHOLE BOY" Stands in about 70 acres of delightful and historic grounds, which include football, hockey, and cricket fields, tennis courts, riding field, Manuel Training Shop and shooting range.

Canada's Oldest Residential School. Preparation for University, Army and Navy and Business. Upper and Lower Schools. Boys 8-18. Term begins September 17th.

For prospectus and further information apply to REV. GERALD WHITE, M. A. Headmaster

University of New Brunswick FREDERICTON, N. B.

Session 1935-36 Begins September 17 ARTS AND PURE SCIENCE

Courses leading to B. A. and B. Sc. Degrees. Special courses for those intending to enter Medical and Law Schools. Three new buildings with modern well-equipped Laboratories.

ENGINEERING AND FORESTRY Applied Science courses include Civil Engineering, Electrical Engineering and Forestry. Complete courses extending over four years and leading to the Degree of B. Sc. in Engineering and Forestry.

The Law Faculty (write A. B. Gilbert, Esq., Secretary, Saint John, N. B.) is located in Saint John. The Lady Beaverbrook Building affords first class residence accommodation for men.

Full information regarding courses, terms, scholarships, etc., is contained in the University Calendar. A copy will be mailed on request. C. C. JONES, President.

Saint John Vocational School Opens SEPTEMBER 3

Evening Classes September 30 MODERN BUILDING FINE EQUIPMENT TRAINED STAFF

A Five Three-Year High School Courses (each gives a vital combination of general and practical education and trains for a special field).

1. Industrial Arts Course 2. Practical Arts (Home Economics) High Course 3. High School of Commerce Course 4. Technical High (College Preparatory) Course 5. Commercial Art High Course 6. Junior High Course (high school entrance & guidance)

B One & Two-Year Intensive Vocational Courses (for graduates and others who can profit) 1. Motor Mechanic 2. Machine Shop Practice 3. Mechanical Drafting 4. Architectural Drafting 5. Electricity 6. Wireless Telegraphy (radio) 7. Printing 8. Building Construction 9. Dressmaking 10. Commercial Art 11. Practical Arts (foods, clothing, art, expression, French, chemistry—graduates of this course get one year credit on B. Sc. degree.) 12. Hairdressing & Beauty Culture (5 months) 13. Stenography & Secretarial Studies (Short-hand, typing, correspondence, French, etc.) 14. Business Administration (accounting, law, economics, money & banking, merchandising, transportation, typing.) C Evening Study Programme This includes all the above mentioned subjects and all general subjects from Grade I to Grade XII. Write for Prospectus to FLETCHER PEACOCK—Director Saint John, N. B.

THE TORONTO CONSERVATORY OF MUSIC 49th Season Opens Sept. 2nd, 1935

EDGEHILL Church of England School for Girls. WINDSOR, NOVA SCOTIA Junior School with special attention for younger girls. Senior School for High School students.
