**Profit from changing conditions**  
Don't fight changing conditions — protect your hard-to-replace capital. Do as you would in problems of law or medicine — get competent advice.  
Will the earnings of gold mines decline further? Will the price for gold move in the foreseeable future? Should gold stocks as a class be bought or sold?  
Will the earnings of oil companies increase rapidly, costs remain stable and prices improve? Will shortages in gasoline and fuel oil increase or diminish? Should the oils be bought or sold?  
What would be the reaction of members of the International Bank if Canada increased the price of gold without their consent?  
All these important questions which must affect all who are investors are discussed in detail in our Bulletin, "Gold Versus Oil", which is just coming off the press. We believe every wise investor should obtain a copy of this informative Bulletin, which will be mailed to you, free of charge, upon request.
