"I have much pleasure in testifying to the almost marvellous benefit I have derived from taking 'Fruit-a-tives'. I was a lifelong sufferer from Chronic Constipation, and the only medicine I ever secured to do me any real good was 'Fruit-a-tives'. This medicine cured me when everything else failed. Also, last spring, I had a severe attack of Bladder Trouble coupled with Kidney Trouble, and 'Fruit-a-tives' cured these complaints for me, when the physicians attending me had practically given me up.

I am now over eighty years of age and I can strongly recommend 'Fruit-a-tives' for Chronic Constipation and Bladder and Kidney Troubles."

JAMES DINGWALL.

"Fruit-a-tives" is the only medicine in the world made of fruit juices—and is the greatest kidney, bladder and liver medicine ever put on the market.

Box 6, for \$2.50 trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

"The carriages this year are a complete change from anything shown here before, they have new tops made of silk, the same as used on automobiles and they are deeper and wider. They have ball-bearing wheels, which need no oiling—something that mothers ought to consider, besides the oil gets on the baby's clothes and is very hard to wash out. The prices are lower, consistent with quality. About 35 different styles now open for your inspection at prices from \$1.75 to \$25.00 each. Come in and look them over. James Paton & Co. 3-11Mt.

"OSTERMOOR MATTRESSES are cheapest in the end. Cost \$11, 12.50, 14.00 and 15.00 according to size but first cost is last cost—and there is a life time of solid comfort in every "Ostermoor." "Star Felt" Mattresses are made by the same company, sell at \$10.00 for full size and are the next best. Sole agents Beer & Weeks. 3-17 Mt.

IVORY FOR BILLIARD BALLS.

The experience of the workers who turn ivory for billiard balls has shown that, as it dries, ivory shrinks. In the case of the tusk the shrinkage is greater in width than it is in length.

The tusks of cow elephants have been found best adapted to the making of billiard balls. The tusk of the female is not so curved as that of the male, and the fine "nerve passage" is not so clearly seen.

Billiard balls are turned in the rough and kept in a warm room for a long time, sometimes as long as two years. Then, after shrinking, they are turned again and to the "true."
