LOW-PRICED GEM OF LOVELY HUES
 One of the most beautiful jewels in the world is actually one of the least expensive on the market today. It is the "tourmaline," unsurpassed in colour range by any gemstone on earth, so abundant that its price is pleasingly low. Described by the gemologists of the American Gem Society as one of the finest values in gems, you can buy a tourmaline for a few dollars or for several hundred dollars. There is a tourmaline to fit every purse, and match every colour mood. Its history is ubiquitous, for many centuries, the mystic tourmaline has been known as a distinct species was not recognized. For centuries, tourmaline varied in colour through red and pink (rubellite), green (smeraldite), blue (indicolite), yellowish-green, honey yellow, violet-red, (schwarze) black (schwarz), and more expensive and uncommon specimens are the blue and red. You can even find the newly-discovered green South African tourmaline is somewhat darker in colour than the emerald but exceeds the emerald in brilliancy. Actually, according to the American Gem Society, a fine-coloured African tourmaline is far more beautiful than a mediocre emerald.
