Waterway Aid To Inland Cities

ST. JOHN'S, Nfld., Aug. 3.—(By The Canadian Press)—Newfoundland likes the idea of developing the St. Lawrence River for ocean traffic.

snatch from us the opportunity that is now within our reach. By that the editor meant the development of the fresh fish business and establishment of Mortimer Bay as a free port for a clearing house of fish gathered from the numerous bays and inlets along the coast of the island dominion.

The Mortimer Bay project was outlined before the St. John's Rotary Club by H. O. Thompson, who visions Newfoundland as a great exporting country mid-way between the greatest markets of the old and new worlds.

"All these requirements are found in Newfoundland. The supply of fish is immense and the fishing grounds are of such extent that they have hardly yet been touched. No country in the world has so many natural land-locked deep-water harbors, so close to the fishing grounds that they almost form part of them. The Newfoundland fishermen do not need to go far to sea to get their fish, nor do large sums of money have to be spent in creating harbors as has been the case on the exposed north east coast of Scotland."

For years Newfoundland fishermen have been urged to get together and organize their business. Their operations are scattered and more or less individual. Returns are uncertain, and some of the fishermen do not see money very often.

SAYS WALKER ANNUAL QUE. UNWORTHY RIFLE SHOOT OF BELIEF

NEW YORK, Aug. 4.—Caustic charges of contradiction, evasion and falsification were directed tonight at Mayor James J. Walker's defence of his administration by Samuel Seabury, who told Governor Franklin D. Roosevelt the New York Mayor had proven himself "unworthy of belief" about his official conduct.

The Hofstadter Legislative committee counsel, who spent a year and a half investigating the New York City Government, reviewed the whole Walker case in a 20,000-word document.

It was his rebuttal to the Mayor's defence of charges on which his removal has been asked.

"The record now before you clearly proves the Mayor is glibly of the acts set out in the specifications," Seabury wrote referring to his previous analysis of the evidence produced in committee hearings.

The despatch of the document to Albany, where Governor Roosevelt ordered it made public, made more imminent a decision in the bitterly-argued case which has attracted international interest.

Although the Governor has firmly stated no political consideration would influence his decision, his presidential campaigning has been delayed by the case and there has been widespread speculation about the effect the outcome might have on the state and national political situation.

Seabury dwelt at length on Walker's contention that the charges against him were not grounds for removal because they concerned his previous term. Seabury wrote:

"It is a plea which one is not obliged to make if he is willing to meet the issues on their merits. 'It is a sorry sight indeed to see a person occupying high public office, whose honor is impugned, taking the position that the people must suffer him to continue in his public office because he was fortunate enough not to be caught in time.'"

Seabury made detailed rebuttal to every phase of Walker's defence and branded the Mayor's explanations "false," "not satisfactory," "attempted excuses," "evasive" and "not real answers."

"To us it seems shocking that a Mayor should even be heard to urge that for misdemeanors and misfeasance in office, indeed for corruption in office, he may escape removal because he succeeded in concealing his unfitness long enough for another election to intervene."

HOME-MIXED FLY SPRAYS

A reader asks for recipes for fly sprays for home and barn use, stating that the prepared brands are too expensive to use all the time. The following recipes are given by different agricultural experiment stations. If smaller amounts are desired each ingredient can be cut down so as to keep the same proportions:

Fly Spray No. 1 Mix, fish oil, 1 gallon; oil of tar 1-2 pint, crude carbolic acid, 1 ounce.

Fly Spray No. 2 Mix, fish oil, 1 gallon; kerosene 1-2 pint; oil of tar, 2 ounces; oil of pennyroyal, 2 ounces.

Fly Spray No. 3 Common laundry soap, 1 pound; crude oil, 1 gallon; powdered naphthalin, 4 ounces; water 4 gallons.

Fly Spray No. 4 Mix kerosene, 1 gallon; fish oil, 2 gallons; oil of tar, 4 ounces; pyrethrum powder, 1-2 pound.

Fly Spray No. 5 Put pyrethrum powder and kerosene in container, seal and let stand for 24 hours, shaking occasionally. Pour off liquid and mix with the fish oil and oil of tar.

Fly Spray No. 6 Certainly the most economical way to get a perennial bed established is to plant the seed. This is particularly true where a fairly large number of plants are wanted and also where unusual colors or varieties are desired.

PERENNIALS FROM SEED Certainly the most economical way to get a perennial bed established is to plant the seed. This is particularly true where a fairly large number of plants are wanted and also where unusual colors or varieties are desired.

Parents Should Divide Duties

TORONTO, Aug. 4.—(By The Canadian Press)—There is just as much responsibility on a father as on a mother to stay home at nights and mind the baby, the magistrate in Women's police court told a man charged with threatening his wife. He was bound over to keep the peace.

An odd angle of life that came into the Magistrate's purview was that of a woman complainant who brought a charge of trespass against another woman. "Did she trespass on your property?" "No, on the telephone. I told her my brothers weren't home, but she kept on telephoning." "No trespass on the telephone," the magistrate pointed out, dismissing the charge.

Good Advice For Councillor

LONG BRANCH, Ont., Aug. 4.—(By The Canadian Press)—A municipal by-law governs the wearing of bathing costumes in this vicinity, so a certain ratepayer appeared before the Council and said he wanted something done about women walking along the streets in one piece bathing suits. "Why don't you get a pair of dark glasses?" said one unsympathetic councillor. "You see them at Sunnyside in one piece suits."

His wife—"It's about time to think about where we shall spend the summer."

Clothesman—"I wish you'd say 'pass the summer,' Helen; 'spend' is so confoundedly suggestive."

ed when they promised to leave the capital immediately.

Rev. A. E. Smith, secretary of the Canadian Labor Defence League, attended the court session today, prepared to obtain legal counsel for the accused men.

Farm Notes

GIVE THEM ROOM

Two of the most common mistakes made by the average gardener are planting the seed too deep and crowding. A safe rule to follow is never to plant deeper than about three times the diameter of the seed, which will mean mere pressing into the soil for carrots, lettuce and such vegetables, one to three inches for beans and peas, six to ten inches for Gladiolus, Dahlias and fall bulbs and again mere pressing for such flower seeds as Alyssum, Calliopsis, Popples and Delphiniums. Practically all things sown from seed whether they be vegetables or flowers require some thinning. One should bear in mind the size of the mature plant and allow half as much space between the plants as the plant is high. Even quickly used up things such as lettuce, radish and spinach require a little thinning and the same is true for rows of Alyssum. Thinning results in sturdier and quicker growing plants.

STANLEY BRIDGE SCHOOL CLOSING

On Wednesday afternoon June 29th a goodly number of parents, children and visitors gathered to attend the closing exercises of Stanley Bridge School.

The various classes in each department were examined and gave evidence that they had been thoroughly taught. The teachers were assisted in examining the classes by Mrs. Frank Weir, a former teacher.

A short program of drills, recitations and choruses were much enjoyed.

The following prizes were awarded in the Principal's department: Attendance — Marion Bell and Isabel Reid.

Department — Nora Reid and Bertha McGuigan. Stars — Isabel Reid.

General proficiency in Grade X — Clare Quinn. Grade VIII — Alban Bolger, Cor. Liffitice.

Grade VII — Nora Reid. Grade VI — Isabel Reid. Grade V — Marion Bell. Prizes in primary department: Attendance: Kathleen Reid, Francis Bolger, Robert Reid.

Department: Maurice Reid. Most Stars: Francis Bolger. Grade IV — James Bennett. Grade III Sr. — Edith McGuigan. Grade II Sr. — Elva McKay. Grade II Jr. — Norbert Reid. Grade I — Gertrude McGuigan.

The following address was read to Miss Woodside by Nora Reid. Presentation made by Isabel Reid. Dear Teacher:— We have arrived at the close of another school year and before parting we wish to acknowledge our sincere appreciation of your work in our school during the past three years. You have endeared yourself to us in many ways by your kindness, patience and encouragement.

You have faithfully taught us by word and example and although we regret to hear of your leaving us, yet we will have many pleasant memories of the happy days we spent in Stanley school. We wish you health and continued success in your next school and hope that you will be as much appreciated as you are here at Stanley. Before concluding we wish you to please accept this little gift and to sometimes think of the boys and girls of Stanley school.

SIGNED BY PUPILS. Address read to Miss McCabe by Gladys Quinn and presentation made by Mary Bulman. Dear Teacher:— You came to us as a stranger last year but as our classes and lessons progressed we soon became acquainted and now, at the end of the school year we feel as close friends.

We thank you for your efforts and appreciation. Meeting closed by singing National Anthem after which the National Anthem after which the members and visitors were favored by a demonstration of Appealing Appetizers by Miss L. Andrews. The guests were then treated by the hostess in her usual capable manner.

for our welfare and ask you to please accept this little gift, hoping you will have a pleasant vacation.

SIGNED BY PUPILS The teachers then treated the pupils and all present to ice cream and the Women's Institute treated the pupils to candy.

Remarks were made by a number of visitors present expressing regret at Miss Woodside's departure and closed by singing "For She's a Jolly Good Fellow."

The examination was brought to a close by singing the National Anthem.

Business Prospects Better In U. S.

WASHINGTON, Aug. 4 — The United States States Department of Commerce believes business is improving. Improved bond prices, increases in the return on a number of commodities, cessation of gold withdrawals and a stop in stock market liquidation are among the signs on which the opinion is based.

The favorable factors in July were considered especially interesting in view of June recessions. In July, several industries showed increased activity after allowing for seasonal changes. Automobiles, textile, cement and tobacco were among them.

The department did not say so, but experts recalled that the end of previous deflations had been chronicled by gradual upward movements beginning in the summer months.

EAST ROYALTY INSTITUTE The July meeting of East Royalty Women's Institute was held at the home of Mrs. A. Holmes on July 13 with 12 members and two visitors present. Meeting opened by Institute Ode after which roll call was answered by "Different Combinations of Cheese and Potatoes." It was moved and seconded that half the proceeds of the play "The Lone Ace" be given towards rink fund. New slot committee appointed. Meeting closed by singing the National Anthem. It was decided to hold August meeting in the hall. A very dainty lunch was then served by Mrs. A. Holmes in her capable manner.

The June meeting of the East Royalty Women's Institute was held at the home of Mrs. Darrach on June 14 with 14 members and four visitors present. The roll call was answered by "Uses of Baking Soda or Preventions for Moths." The sick committee reported finding one of the members who was indisposed to be recovering. Delegates for coming convention were appointed. Meeting closed by singing National Anthem.

Her interviewers appealed to a nearby passenger, Lennox Smith, of Bermuda, formerly of Montreal and Ottawa, who is said to be the only Canadian teaching in the school in Bermuda or the West Indies. He said Hilda was quite right.

He said Hilda was quite right. He said Hilda was quite right. He said Hilda was quite right.

He said Hilda was quite right. He said Hilda was quite right. He said Hilda was quite right.

FREE TALKIE TUESDAY NIGHT AT SHOW ROOM

At 8 p. m. we will present the talking picture "BEHIND THE SCENES," a commercial film said to be outstanding in dramatic and artistic quality. A famous Hollywood director made the picture and it has been ranked as one of the finest in dialogue as well as photography. Radio has made intimate descriptions of scientific marvels popular. "BEHIND THE SCENES" is said to provide not only brief and interesting descriptions of new scientific development but also some very unusual glimpses into one of the most famous laboratories in the world. In addition there are scenes of thrilling travel by motor through the Rocky Mountains. While the film was being made a truck knocked a car off the narrow mountain road and the camera caught the picture of the car somersaulting down the mountain side. Other extraordinary sights are in store for those who go to our show Monday night. The picture starts at 8 p. m. and is free to the public. Every car owner and those who are thinking of becoming owners should see this wonderful explanation of the new principles developed in automobile construction during the past year. You will find many stories which you have heard from your friends to be flatly contradicted by this talking film. It is certainly a great education to see it and to study the explanations contained in it. Let us meet you Monday night at 8 p. m. at our show room.
