A Remarkable Five Years' Growth

Approximately 250,000 families have purchased kitchen utensils made by The Club Aluminum Utensil Co., an Illinois corporation with factories in Chicago and Baltimore.

From less than 100 salesmen in 1923, the year the company was established, the sales force has grown to 1,000.

Gross sales have increased from $1,133,177.29 for the year ending June 30th, 1925, to $5,512,720.46 for the year ending June 30th, 1927. Profits for 1923 were $128,648.09, and for 1927, $800,357.99.

We are offering the common stock of this company for sale. Full particulars on request.

ANOTHER PLEASED RECIPIENT — A lady subscriber writes: "The shopping bag arrived and a beauty it is. It is really a great convenience. When doubled up it holds my purse and small purchases, and can bring a good marketful of useful things or a good mercant's order when let out full length. I find it very useful, as when I have no merchandise to carry it can hold a book or papers —many thanks."

GENERAL CURRIE SUES PAPER, CHARGING LIBEL

General Sir Arthur Currie, commander of the Canadian Corps in France, and now Principal of McGill University, has issued a writ claiming unstated damages for libel against F. W. Wilson, editor of the Port Hope Guide, and W. T. R. Preston, who is alleged to be the author of the article complained of.

The article complained of was entitled "Mons," and appeared in the Port Hope Guide on June 13.

The article alleged that the lives of Canadian soldiers were needlessly sacrificed in the forward movement towards Mons just before the Armistice was to come into effect for no other reason than to glorify the headquarters staff.

HENS LAY 16 HOURS A DAY

By introducing artificial sunlight in their chicken houses, poultry farmers of Preesall, England, are making their hens lay 16 hours a day. The artificial light is turned on at 4.35 o'clock in the morning and continued until the sun rises. Laying has increased, and the fertility of eggs used for hatching has improved 20 per cent, raisers say. January hatched chicks get as much exercise as if they were hatched at the normal time, April. One farmer installed the light in October, when the output of eggs was decreasing, and was rewarded by an increased production of 60 eggs a day.

Premier's Pipe Ash As A Souvenir

(Canadian Press.)

CALGARY, Alta., Sept. 20.—Souvenir hunters are known to do some very peculiar stunts in pursuit of their hobby, but surely here is one of the most unusual. Prime Minister Stanley Baldwin recently had just come into the C. P. R. station at Calgary shortly after his arrival when he decided to empty his pipe. Accordingly he knocked the aches out onto the floor of the waiting room. A woman standing near hurriedly swept up the ashes and put them into an envelope. Possibly there was some tobacco left, and henceforth she or her hubby will place it in a pipe and be able to say, "I smoked a pipe with England's Prime Minister."

Round Garter Is Condemned

(Canadian Press.)

TORONTO, Sept. 20.—Mlle. Marceline D'alroy, the famous Parisian fashion authority, whom Paul Poiret has called "Goddess of the Styles," has long proclaimed the ugliness of the round, ornate garter, which women have been wearing so prominently of late. Now, Dr. Frank Furch, president of the Illinois Association of Chiropidists, adds real emphasis to her opinion when he says:

"Thousands of girls are imperilling their shapely limbs with stockings rolled over circular garters and unrolled but still with the same support." Circular garters, adorned on the outer side with various doodads, may look attractive, but girls and women who desire to retain smooth skins and avoid varicose veins, will not wear them, says this authority. That garters tight enough to hold up the hose are a prolific cause for varicose veins has long been known to the medical profession.

BELIEVE AUSTRALIA HAS AT LAST STRUCK OIL

SYDNEY, N. S., Sept. 20. — Keen interest is being taken in reports from Roma, Central Queensland, that during the last few days a gas pressure bore there for petroleum was increased to 450 pounds per square inch. Liquid gas was encountered yesterday which forced the slush 40 feet up the derrick.

This excites the hope that Australia is on the eve of her first commercial petroleum supply, search for oil wells having been in progress a long time.

HIS QUALIFICATIONS

Sir,—Just noticed in the Guardian a list of government appointments. I see you know how Mr. Wonnacot got his position. I wish to state the qualifications of one by a government member, is that of the other appointments as given "He and his wife attended a great many of the political meetings. At the eastern end of the Island, and had taken part in the discussion of the day and which helped, as they thought, the candidates."

Blonde Athletes Show Strength

(Canadian Press.)

TORONTO, Sept. 20.—No longer need anyone look upon the beautiful blonde lady as a fragile and etherial girl who swam farthest, a blonde who stayed in the water longest. The only brunette who was awarded a prize was the dark-haired Edith Hedin, the last Toronto girl to leave the water, and she was frightened by an eel when she vaulted into her boat. The blondes displayed more presence of mind than the brunettes and were, on the whole, calmer. The women entered in the swim certainly showed much greater endurance, generally, than the men, for, when at four o'clock, an official check-up of the swimmers was made, of the 35 women in the competition 20 per cent. were still going on with the terrific endurance test while only marked that the physical endurance of the women swimmers was better than the men. The women officials who had examined the girl entrants declared that they had never seen a finer group of woman and the admission, from all, who watched the swim, was that those 35 mermaids made a better showing than the male competitors.

Girls Circle Globe By Automobile

EDMONTON, Alta., Sept. 20. have reached Edmonton in the powerful automobile in which they are circling the globe and visiting every country. They started from Atlanta, Georgia, in September, 1919, and after visiting 21 states, Honolulu, Alaska, Canada, Mexico, Central America and Cuba, they shipped from New Orleans on a tramp steamer to London, England. Later crossed the Channel and visited France, Spain, Italy, Switzerland, Belgium, Holland, Germany, Poland, Russia, Greece, Turkey, Egypt, China and Japan. The car is equipped with a special body, which has travelled 370,000 miles, while the present tries. The car bears the insignia of practically every auto club in the world, and scratched on the hood are the autographs of many famous persons.
