

### PRINCE EDWARD TODAY

MATINEE 3.15-16c, 26c. NIGHT 7 & 8.45-26c, 37c, 45c.

A HEART-TOUCHING DRAMA OF THE YOUTH OF TODAY FROM THE HEART OF YOUTH!

## NEW MORALS for OLD

with ROBERT YOUNG MARGARET PERRY LEWIS STONE LAURA HOPE CREWES MYRNA LOY JEAN HERSHOLT

They loved as only Youth can love.

They made their own mistakes—plenty of them!

See this picture, then decide for yourself whether Youth has the right to make its own decisions or let its elders make them! It's thrilling!

### Farm Notes

#### NATURE PROVIDES ESSENTIAL FOODS

In the diet of the Canadian family, varied as it is, there is no food which can be termed a perfect food. It is only by mixing a number of foods, to secure variety and a perfect balance of the essential ingredients, that a proper diet is secured. The art of the blending of foods has been handed down from mother to daughter through generations and for the most part this practical art which was developed long ago has been found to coincide with the scientific knowledge of foods as it exists today. Practically every food which is used in preparing the household meals of today fills an important and necessary niche of our dietary scheme. It is a significant fact that throughout the civilized world eggs constitute perhaps a greater part of the diet than does any other food of animal origin.

While no food can be termed as perfect from the standpoint of human consumption, it is natural that every food is perfect for the func-

tion in which it is used in nature. The grain of corn forms a sheltering coat and a source of nourishment to the corn embryo until it can develop roots and draw its own food from the soil. Similarly, the egg constitutes a perfect supply of food for the developing chick. This fact is of no small significance when it comes to an understanding of the part eggs play in the diet of the nation. The chick commences its development as a small two celled body. In twenty one days it has developed to the stage where it can seek an independent existence. Bone, flesh, internal organs and down have been formed. Strength has been supplied to enable the young chick to break from its shell. Just before it hatches the remainder of the yolk is drawn up into the body cavity, to provide nourishment for the chick until it learns to make its own way in the world. It is little wonder that a food which contains such properties should have found a large and important place in the diet of humans.

Eggs can well claim the title of "the breakfast food of the nation." Prepared in many ways and served in varying quantities they constitute the largest part of the morn-

ing meal from coast to coast. Their use, of course, is not limited to any one meal. They are an important part of practically all cooking operations and are served in a variety of ways at other meals. It is important that a food which is as widely used as this should be better understood by cooks and housewives.

There are various body processes to be carried on and various body tissues to be built and maintained by the food which we eat. These numerous functions are carried on by different kinds of food or by different elements in our foods, and it is in order to secure a uniform supply of the desired ingredients that a varied diet is required. These classes of foods which are needed to properly maintain human life are well known to every one. They are proteins, carbohydrates, fats, ash or mineral matter and, of later discovery, vitamins. It is interesting to briefly study the egg and see how close it comes to meeting human needs in these regards.

### R. C. H. A. Certificate To J. A. Thompson

A very pleasant function took place in the Town Hall, Kensington, on Saturday evening, Sept. 10th, at 7.30 when a certificate awarded by the Royal Canadian Humane Association was presented to Mr. John A. Thompson of Margate, P. E. I.

His Worship Mayor J. M. Leard presided and after stating the object of the meeting, called upon A. E. MacLean, M. P., to make the presentation who after narrating the facts in connection with case pointed out how the timely action of Mr. Thompson and others prevented what otherwise would have been no doubt another fatality such as has so often shocked us in this province.

Mr. MacLean then read the address and made the presentation. Remarks were then made by the Mayor, Rev. Mr. Spriggs, Rev. Mr. Loring, Mr. Cleve Baker, Dr. Lockhart and Mr. Heath Bonness, congratulating Mr. Thompson on the honour that had been done him by the Royal Canadian Humane Association.

After some vocal and instrumental selections by Kensington's best artists, ice cream and cake were served bringing to a conclusion a very enjoyable function.

The following is the address: We are gathered here tonight to present to one of our fellow citizens, a token of acknowledgement of real bravery and thoughtfulness in a moment when quick thinking and action was very necessary in the saving of a human life. There are no doubt people who can attribute the fact that they are alive to the heroism of yourself and others who were on the beach that day, and there is no doubt that time can never dim the grateful recollection that they may have of your courage and bravery.

The Royal Canadian Humane Association was formed to give due recognition to all persons who through their efforts were instrumental in assisting in the saving of human life. But they only grant this certificate that we are about to present tonight, when it can be clearly proven that the party making the rescue has really risked his own life in the saving of another.

These parchment certificates are very rare—and it does not fall to the lot of many to have the distinction and recognition that is in this case accorded to you. And we congratulate you on the honour that has come to you in this connection, and feel sure that in the future as in the past, you will always be only too ready to render assistance in time of danger to those who may be in personal distress. And now as a token of recognition I present you with this certificate which bears the following inscription:

ROYAL CANADIAN HUMANE ASSOCIATION Patron—His Excellency the Governor General of Canada. Honorary Testimonial

The Committee of awards having considered and reported thereon.

The Royal Canadian Humane Association has unanimously resolved that

John A. Thompson is justly entitled to this Honorary Testimonial of the Association—Awarded for prompt action and presence of mind in assisting in the rescue of Mrs. F. J. Higgins from drowning at Cavendish Beach, P. E. I., July 5th, 1931.

Signed. Dated at Hamilton, Ontario, this thirty-first day of March, 1932. It is certainly a great pleasure for me to have the honour of presenting you with this Parchment Certificate and to congratulate you on the receipt of same.

"Granpa, will you give me a drum for my birthday like you gave Jack?"

"Why?"

"His father gives him a shilling a week not to play it."—Karikaturen.

### A FAMOUS MAN

OVER sixty years ago Dr. Pierce, whose picture appears here, placed in all drug stores of Canada his Favorite Prescription for women suffering from weakening cramps, monthly sickness, headaches, backaches, hot flashes. Women of all ages testify to its merits. Try it now! This is one of Nature's remedies composed of roots and herbs and contains no alcohol. Dr. Pierce's Favorite Prescription is in greater demand now than ever. If you want free medical advice, write to Dr. Pierce's Clinic in Buffalo, N. Y.

### Yellow Or Red Flowers Frowned Upon For Sick

TORONTO, Sept. 17 — If it is to be flowers, send her red roses—they will make her heart beat the faster; but never, if she is ill, send her bright yellow or red flowers. They will make her worse.

Out of two years of research study into what he describes as "the psychological effect" and "emotional response" of flowers, Glenn Turner, brilliant young horticulturist of St. Louis, Mo., has discovered these two facts, and many more, as he cited at the florists' convention in the Royal York Hotel yesterday.

Red, yellow, blue, green, orange—Mr. Turner can tell you how well or how ill these colors would look if harmonized or contrasted. He can tell you what colors to take out or what to put in to make the whole artistic and pleasing. He can tell you how exactly you will react to the color of a flower.

"It has actually been proved," he said, "you react to color as you do to music. Only, with color the reaction is in the subconscious. With music it is conscious. You sense at once a discord in music. With color you do not do so immediately. But it revolts you just the same. Never on any account send the girl friend brilliant yellow or red flowers if she is ill, in the hospital, particularly if she has had an operation and is recovering from the anesthetic. They will make her worse. Trained nurses in hospital have borne me out there.

"Blue is the color that we all like. It gives a feeling of dignity and poise. Blue delphiniums are good for the sickroom, where the patient is recovering from a nervous breakdown. Blue is prescribed by physicians in sanitariums. On the other hand, people suffering from depressed spirits like red. "Violet is a shadow color, a quieting color and it expresses solemnity and royalty. There is also something religious connected with it. You find that in the robes used in some of the churches. The church cardinal is really a violet color.

"Green? Yes, green is nature's favorite color. It expresses everything that is fresh and delightful. Green is probably one of the loveliest colors."

### O'Leary And Vicinity

A very severe north-easterly wind storm swept this section of the province over the week end (Sept. 1). No damage to boats or lobster traps was reported from the West Point section of the Straits. Ten Caraqueet fishing schooners beat in to port there on Saturday morning, in the height of the gale from Bradley Banks, where they had been fishing. No rain accompanied the storm in this locality where there has been dry windy weather now for the past month, giving farmers splendid harvesting weather.

The school districts of Dunblane, Milburn, Glenwood and Montgomery held a very successful school fair at Glenwood Hall, and school on Sept. 12. There was an exhibition in the school room, school work of a very high order, which won the commendation of Inspector Auld, by whom it was judged. In the Hall were exhibited selections from gardens and farms of these prosperous farming districts, which were judged by Mr. Reid of the Department of Agriculture. The culinary efforts of the future "homemakers" won high praise from Miss Rodd, Domestic Science expert, who also judged the display of flowers and fancy work. Mr. L. W. Roper judged the three classes of calves on exhibition. Inspector Auld conducted the sports, many of the contestants showing promise of future Olympic material. There were on display a large number of special prizes donated by prominent business men of Prince County who have the sincere thanks of the school fair committee for the same.

Rev. Ronald McDonald, East Point has been a recent visitor to Brae and West Point, where he was a former pastor.

Mr. St. Clair Trainor, M. A., Charlottetown, was a recent visitor at the home of his sister, Mrs. Walter Stewart, West Point.

Mr. Amos Davison, Burlington, was a visitor in Dunblane on Sept. 13.

Mr. and Mrs. Charles Butler, Jamaica Plain, Mass., arrived by motor on Sept. 12 to visit the latter's mother, Mrs. Catherine McPherson, Dunblane.

Among those present at Glenwood school fair were, Rev. John Sterling and Mrs. Sterling, Springfield West, and Mr. W. E. Brooks, and Mr. Garland Brooks, O'Leary.

## WRIGLEY'S RELIGIOUS SERVICES

### THE BAPTIST CHURCH

Large congregations were in attendance at all services yesterday. The Rev. A. C. Vincent, D.D., took as his theme for the morning service "The Abiding Life" preaching on this occasion the first of a series of "The Rewards of the abiding life," based on the fifteenth chapter of the gospel of St. John. The subject of the evening sermon was "Follow Me." At the morning service a former popular member of the choir of this church, Mrs. Walter G. Stiff, of Princetown, Mass., took the contralto solo, singing in good voice Morris' "The Stranger of Galilee." Miss Frances Wood was the soloist at the evening service, her clear and pleasant soprano giving excellent effect to her selection, "The Lord is my Light." The Sunday School which meets at 2.30 p. m. had a very encouraging attendance, considerably in excess of the same day of last year. During the absence of Mrs. Full, Miss Margaret Stentford gives tastefully efficient service in charge of the organ.

Announcement was made of the regular mid week prayer meeting for Wednesday at 7.30 p. m., and of a social in charge of the Young Peoples' Society on Thursday at 7.30 p. m. to which students of the various colleges are cordially invited.

"And did he have the dentist take an X-ray of his wife's jaw?" "He tried to, but all they could get was a moving picture."

A process has been invented in Germany for giving wood a polish so high that it can be used as a mirror.

Palette shaped blades feature a noiseless electric fan invented by a Washington University professor the blades also having a tendency to push away objects coming in contact with them.

### TRINITY UNITED CHURCH

The times are out of joint,—society needs healing and in his sermon yesterday morning, Rev. Dr. Ramsay declared that what was required was the touch of the Master Christ. His text was Exodus 15-26 "I am the Lord that health thee." Dr. Ramsay pointed his
